

Exotic Itinerary

Invesco Asia Pacific Growth Fund

An all-cap investment strategy that offers access to rapidly growing Asia Pacific markets via quality growth-oriented companies. Invesco Asia Pacific Growth Fund pursues long-term capital growth by investing in stocks that have three key qualities: sustainable profitability, sound business fundamentals and reasonable prices.

Reasons to invest

Stocked markets

The Asia Pacific area is home to numerous emerging markets, and investors may benefit from the region's rapidly growing economies. Invesco Asia Pacific Growth Fund invests in companies supported with multinational operations, as well as businesses that focus on their home countries and local consumers.

All caps East

Intriguing travel destinations are located everywhere from sprawling cities to country villages, just as investment opportunities may be in every market cap range – from large global corporations to smaller locally oriented companies. That's why the fund's management team seeks quality growth stocks of all sizes in the Asia Pacific region.

Shrewd guides

The fund's management team picks stocks using its investment process, not benchmark weightings or prevailing industry opinion – much like experienced travelers who feel attractive destinations aren't always on the map. The team's off-the-beaten-path approach helps create a fund that may enhance overall portfolio diversification.

Enhancing Overall Portfolio Growth and Diversification Potential

Over the last five years ended March 31, 2012, Invesco Asia Pacific Growth Fund has provided higher returns than broad stock markets and peers while providing diversification potential with higher allocations to small-cap companies.

Overall Morningstar Rating™ (As of March 31, 2012)

★★★★★ (load waived)
★★★★ (load)

Morningstar ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance (including the effect of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable. Load-waived shares are not available to all investors, so sales charges, loads and redemption fees should be considered when making investment decisions. Class A shares received four stars overall, and four stars for three, five and 10 years (load); five stars overall, and five stars for three and 10 years and four stars for five years (load waived). The fund was rated among 65, 65, 41 and 35 US-domiciled Pacific/Asia ex-Japan stock funds overall and over three, five and 10 years, respectively.

Sources: Invesco, StyleADVISOR, Lipper Inc. Past performance does not guarantee comparable future results. Returns for Class A shares do not include sales charges. For more information on indexes and performance, please see definitions and performance disclosure on the back.

Diversification does not guarantee a profit or eliminate the risk of loss.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their advisors for a prospectus/summary prospectus or visit invesco.com/fundprospectus.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or loss when you sell shares. Performance shown at NAV does not include applicable front-end sales charges, which would have reduced performance. Performance for other share classes will differ due to differing sales charge structures and class expenses. Returns less than one year are cumulative; all other performance figures are annualized.

The gross expense ratio is 1.55% for Class A shares. Expenses are as of the fund's fiscal year end as outlined in the fund's current prospectus.

1 Source: StyleADVISOR. Beta is versus the MSCI All Country Asia Pacific Ex-Japan Index. Beta (cash adjusted) is a measure of relative risk and the slope of regression. Standard deviation measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations.

2 Holdings are subject to change and are not buy/sell recommendations.

3 Sources: Invesco, Lipper Inc. Fund results shown are for Class A shares at NAV.

The Chartered Financial Analyst® (CFA®) designation is globally recognized and attests to a charterholder's success in a rigorous and comprehensive study program in the field of investment management and research analysis. CPA® and Certified Public Accountant® are trademarks owned by the American Institute of Certified Public Accountants.

The MSCI EAFE® Index is an unmanaged index considered representative of stocks of Europe, Australasia and the Far East. The MSCI All Country Asia Pacific ex-Japan Index is an unmanaged index considered representative of Pacific region stocks, excluding Japan. The Morningstar Pacific/Asia ex-Japan Stock Category average represents an average of all the funds in the Morningstar Pacific/Asia ex-Japan category. An investment cannot be made directly in an index. Index returns do not reflect fees, expenses or sales charges.

Morningstar ratings are as of March 31, 2012, and are subject to change every month. With-load ratings include the effect of sales charges, loads and redemption fees. Load-waived ratings exclude sales charges, loads and redemption fees, and are only applicable to investors not subject to sales charges. A fund is eligible for a Morningstar Rating three years after inception. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. (Each share class is counted as a fraction of one fund within this scale and rates separately, which may cause slight variations in the distribution percentages.) Ratings for other share classes may differ due to different performance characteristics.

About risk

The fund's foreign investments will be affected by changes in the foreign country's exchange rates, political and social instability, changes in economic or taxation policies, difficulties when enforcing obligations, decreased liquidity and increased volatility.

Securities issued by foreign companies and governments located in developing countries may be affected more negatively by inflation, devaluation of their currencies, higher transaction costs, delays in settlement, adverse political developments and lack of timely information than those in developed countries. Foreign companies may be subject to less regulation resulting in less publicly available information about the companies.

Because the fund's investments are concentrated in the Asia Pacific region, the fund's performance is expected to be closely tied to social, political and economic conditions within the Asia Pacific region and be more volatile than the performance of more geographically diversified funds.

Growth stocks tend to be more expensive relative to their earnings or assets compared with other types of stock. As a result they tend to be more sensitive to changes in their earnings and can be more volatile.

The investment techniques and risk analysis used by the fund's portfolio managers may not produce the desired results.

Fluctuations in the values of synthetic securities may not correlate perfectly with the instruments they are designed to replicate. Synthetic securities may be subject to interest rate changes, market price fluctuations, counterparty risk and liquidity risk.

The performance of derivative instruments is tied to the performance of an underlying currency, security, index or other instrument. In addition to risks of the underlying instruments, derivatives may include other, possibly greater, risks including counterparty, leverage, correlation, liquidity, tax, market, interest rate and management risks. The fund may lose more than the cash amount invested on investments in derivatives. While the fund intends to use derivative strategies, it is not obligated to actively engage in these transactions if the investment manager elects not to do so.
