

Invesco International ADR Growth Portfolio

Fourth Quarter

Portfolio Management Team

Clas G. Olsson
Senior Portfolio Manager
Industry since 1994
B.B.A., University of Texas

Matthew W. Dennis, CFA
Senior Portfolio Manager
Industry since 1994
B.A., University of Texas
M.S., Texas A&M University

Jason T. Holzer, CFA
Senior Portfolio Manager
Industry since 1994
B.A., M.S., Stanford University

Shuxin (Steve) Cao, CFA, CPA
Senior Portfolio Manager
Industry since 1993
B.A., Tianjin Foreign Language Institute
M.B.A., Texas A&M University

Mark Jason, CFA
Portfolio Manager
Industry since 1998
B.S., California State University at Northridge

Richard Nield, CFA
Portfolio Manager
Industry since 1995
B.Com., McGill University

Brent Bates, CFA, CPA
Portfolio Manager
Industry since 1996
B.B.A., Texas A&M University

Supported by the Europe/Canada/MEA and Asia Pacific/Latin America Groups

Andrew Pringle, ASIP
Senior Client Portfolio Manager
Industry since 1985
B.S., Bristol University

Gregory Allison
Senior Client Portfolio Manager
Industry since 1987
B.B.A., University of Texas
M.B.A. Columbia University

We believe companies that have sustainable, above-average earnings growth, efficient capital allocation, and attractive prices may provide long-term growth of capital.

Current Portfolio Positioning

Global equity markets finished the year on a weak note as most markets declined during the fourth quarter, largely due to currency effects. Economic growth in the US continued to gain traction during the fourth quarter, even as globally, other markets - including in Europe and Japan - continued to struggle. These trends in global economic growth, along with ongoing geopolitical tension, and growing concerns regarding the impact of falling oil prices provided the backdrop for increased market volatility.

The Invesco International ADR Growth Portfolio was modestly down for the quarter, but meaningfully outperformed the MSCI All Country World ex-US Growth Index. Outperformance versus the index was driven by portfolio exposure in the consumer discretionary, financials, information technology and materials sectors.

Within the consumer discretionary sector, results were driven by a combination of stock selection and an overweight exposure in a relatively strong sector. Stock selection in the financials sector, particularly in banking and diversified financials, enabled the portfolio to deliver a positive return versus a negative index sector. Stock selection in the IT sector, primarily across the semiconductor and internet software industries, contributed favorably to relative and absolute results as well. In the materials sector, stock selection enabled the portfolio to deliver a positive return versus an index sector that was negative for the period. From a geographic perspective, portfolio exposure in China, Australia, and Singapore delivered positive returns adding to both absolute and relative returns. 0% exposure in the weak Russian market was supportive on a relative basis as well.

Despite delivering strong outperformance over the quarter, there were some areas of relative weakness in the portfolio. An overweight exposure in the period's weakest sector, energy, detracted from relative results. Regardless of volatility in the energy sector, names owned in the portfolio continue to have attractive valuations, long-life reserves and strong balance sheets - even in a depressed commodity environment. An underweight in the consumer staples sector, an area we continue to believe is overvalued, detracted from relative results as well. From a geographic perspective, the portfolio's Canadian exposure, particularly energy names, was drag on both absolute and relative results.

Activity in the portfolio was relatively modest over the period. We added Japan Tobacco and completely liquidated out of French energy company Total SA, a name we have been trimming back on for the past few months. Sector and regional allocations were relatively unchanged during the quarter.

The near-term investment outlook remains relatively mixed as many headwinds continue to tug on investor sentiment as we enter 2015. Within Europe, these headwinds include persistently weak economic growth, high unemployment, low inflation as well as political uncertainty. At this stage investors are increasingly focused on the need for the European Central Bank to adopt urgent, more aggressive policies to boost economic growth rates and escape the risk of deflation. In Japan, December's election result was viewed as the green light to continue pursuing Abenomics - however, in the absence of key structural reforms, the jury remains out on the prospects for its long-term success. Emerging markets slightly outperformed developed international markets (ex-US) in 2014 but there was wide performance dispersion between regions (with Asia outperforming Latin America and the Middle East Africa regions).

In summary, recent market consolidation/corrections are starting to make stock valuations more interesting but we still believe that investor expectations for improving economic and corporate fundamentals in 2015 may be too optimistic.

* "Pure" gross of fees returns do not reflect the deduction of any expenses, including trading costs. "Pure" gross of fees returns are supplemental to net returns. See note 5.

** The Custom International Growth Index is an index comprised of the MSCI EAFE® Growth Index from composite inception to February 28, 2013, and the MSCI AC World ex US Growth Index thereafter.

Invesco Worldwide has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®).

- Invesco Worldwide ("The Firm") manages a broad array of investment strategies around the world. The Firm comprises U.S.-based Invesco Advisers, Inc. (excluding Unit Investment Trusts) and all wholly owned Invesco firms outside of North America. All entities within the Firm are directly or indirectly owned by Invesco Ltd. Invesco Canada Ltd. is also a GIPS-compliant firm whose assets are managed by a subsidiary of Invesco Ltd. Invesco Senior Secured Management, Inc. Invesco Private Capital, Inc. and Invesco PowerShares Capital Management LLC are also affiliates of the Firm. Each is an SEC-registered investment adviser and is marketed as a separate entity. Invesco Great Wall Fund Management Co. Ltd is a fund management company established under China Securities Regulatory Commission's approval. Their assets are excluded from total Firm assets. During 2012 new guidance was issued requiring firm assets be calculated net of leverage. This guidance will be applied for years ending 2012 and forward.
- Invesco Worldwide claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Invesco Worldwide has been independently verified for the periods January 1, 2003 through December 31, 2013. The legacy firms that constitute Invesco Worldwide have been verified since 2001 or earlier. The verification reports are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.
- A complete list and description of Firm composites and performance results is available upon request. Additional information regarding policies for calculating and reporting returns is available upon request. All returns are expressed in U.S. dollars and are gross of nonreclaimable withholding tax, if applicable.
- For periods after January 1, 2011, the Invesco International ADR Growth Wrap Composite includes all discretionary, fee-paying wrap accounts styled after the Invesco International ADR Growth Model Portfolio, which seeks long-term growth of capital by investing in international companies located in developed markets that the portfolio managers believe have strong earnings momentum. Prior to January 1, 2011, the composite included all discretionary, nontaxable and fee-paying wrap accounts. The composite is managed in comparison to, not duplication of, the benchmark. The composite was created in August 2001.
- "Pure" gross of fees returns do not reflect the deduction of trading costs or any other expenses, and are supplemental to net returns. Performance results are presented both net and gross of total wrap fees. Net returns reflect the deduction of the maximum total wrap fee, which is currently 3.00% per annum. A model fee the highest wrap fee a client could pay (3.00% annually as charged by the program sponsor, inclusive of up to a maximum investment advisory fee of 0.75%) is used. The total wrap fee includes all charges for trading costs, portfolio management, custody and other administrative fees. The standard wrap fee schedule currently in effect is as follows: 3.00% of total assets. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size.
- The benchmark results for the Custom International Growth Index are a combination of the MSCI EAFE® Growth Index and the MSCI ACWI ex US Growth Index. The MSCI EAFE® Growth Index was used solely prior to March 1, 2013 and the MSCI ACWI ex US Growth is used thereafter. This change was made to better align the benchmark with the increased emerging market exposure in the model. The MSCI EAFE® Growth Index is a subset of the MSCI EAFE® Index and constituents of the Underlying Index include securities from Europe, Australasia and the Far East. The MSCI AWI ex Growth Index captures large and mid-cap securities exhibiting overall growth style characteristics across Developed Markets (DM) counties and Emerging Markets (EM) counties. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. The benchmark return is net of withholding taxes from a Luxembourg tax perspective. For comparison purposes the index is fully invested which includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.
- Prior to January 1, 2009, the dispersion of annual returns is measured by the asset-weighted standard deviation of account returns included in the composite for the full year. For periods after January 1, 2009, the dispersion of annual returns is measured by the equal-weighted standard deviation of account returns included in the composite for the full year.
- The three-year annualized ex-post standard deviation measures the variability of the monthly returns of the composite and the benchmark over the preceding 36 months.

Past performance is not indicative of future results. As with any investment vehicle there is always the potential for gains as well as the possibility of losses.
