

IDHQ Invesco S&P International Developed Quality ETF

As of March 31, 2019

Fund Description

The Invesco S&P International Developed Quality ETF (Fund) is based on the S&P Quality Developed ex-U.S. LargeMidCap Index (Index). The Fund generally will invest at least 90% of its total assets in common stocks that comprise the Index. The Index tracks the performance of stocks in the S&P Developed ex-U.S. LargeMidCap Index that have the highest quality score, which is calculated based on three fundamental measures, return on equity, accruals ratio and financial leverage ratio. The Fund and the Index are rebalanced and reconstituted semi-annually on the third Friday of June and December.

Growth of \$10,000

Data beginning 10 years prior to the ending date of March 31, 2019. Fund performance shown at NAV.

Fund Performance & Index History (%)

	YTD	1 year	3 year	5 year	10 year	Fund Inception
Underlying Index						
S&P Quality Developed Ex-U.S. LargeMidCap Index	12.10	-0.39	7.01	-	-	-
Benchmark Index						
MSCI EAFE Index	9.98	-3.71	7.27	2.33	8.96	1.43
Fund						
NAV	12.14	-0.29	7.25	4.78	11.27	1.27
Market Price	11.49	-1.69	7.18	4.62	11.25	1.10

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

3-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
S&P Quality Developed Ex-U.S. LargeMidCap Index	-	-	-	0.56	10.36
MSCI EAFE Index	0.20	0.93	0.94	0.58	10.47

Alpha, beta and correlation are that of the underlying index.

A Smart Beta Portfolio

Fund Inception: June 13, 2007

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

S&P Quality Developed Ex-U.S. LargeMidCap Index* performance prior to 3/1/2012 reflects that of the original Underlying Index, QSG Developed International Opportunities Index. From 3/1/2012 to 3/18/2016, performance reflects that of the previous Underlying Index, S&P International Developed High Quality Rankings Index (net). From 3/18/2016 forward, performance reflects that of the Underlying Index, S&P Quality Developed Ex-U.S. LargeMidCap Index AND IS NOT INTENDED FOR ANY THIRD PARTY USE.

Neither the underlying Index nor the benchmark

indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The QSG Developed International Opportunities Index seeks to identify global equities with strong potential for capital appreciation.

The MSCI EAFE® Index is an unmanaged index considered representative of stocks of Europe, Australasia and the Far East. The index is computed using the net return, which withholds applicable taxes

for non-resident investors.

The S&P International Developed High Quality Rankings Index is designed to provide exposure to international high quality stocks.

The S&P Developed ex. U.S. LargeMidCap Index is designed to measure the performance of large- and mid-cap securities in developed markets, excluding the U.S.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The performance of an investment concentrated in issuers of a certain region or country, is expected to be closely tied to conditions within that region and to be more volatile than more geographically diversified investments.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk.

A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Beta** is a measure of risk representing how a security is expected to respond to general market movements. **Smart Beta** represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.
