

# DBO Invesco DB Oil Fund

As of March 31, 2019

## Fund Description

The Invesco DB Oil Fund seeks to track changes, whether positive or negative, in the level of the DBIQ Optimum Yield Crude Oil Index Excess Return™ (DBIQ Opt Yield Crude Oil Index ER) over time, plus the income from the Fund's holdings of US Treasury securities, money market funds and T-Bill ETFs, less the Fund's expenses. The Fund is designed for investors who want a cost-effective and convenient way to invest in commodity futures. The Index is a rules-based index composed of futures contracts on light sweet crude oil (WTI). You cannot invest directly in the Index.

This Fund is not suitable for all investors due to the speculative nature of an investment based upon the Fund's trading which takes place in very volatile markets. Because an investment in futures contracts is volatile, such frequency in the movement in market prices of the underlying futures contracts could cause large losses. Please see "Risk and Other Information" and the Prospectus for additional risk disclosures.

## Fund Data

Fund Symbol	DBO

*Performance data quoted represents past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, and Shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data quoted. Returns less than one year are cumulative. Call 800-983-0903 for the most recent month-end performance. An investor cannot invest directly in an index. The Fund's performance from inception up to and including February 23, 2015, reflects performance associated with the predecessor managing owner. Performance on and after February 23, 2015, reflects performance associated with the current managing owner, Invesco Capital Management LLC. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.*

## 10-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
DBIQ Opt Yield Crude Oil Index ER	-	-	-	-0.22	26.64

Alpha, beta and correlation are relative to the underlying index.

## A Smart Beta Portfolio

Fund Inception: Jan. 5, 2007

Index history has certain inherent limitations and does not represent actual trading performance or returns of the Fund. Index history does not represent trades that have actually been executed and therefore may under or over compensate for the impact, if any, of certain market factors, such as illiquidity. No representation is being made that the Fund will or is likely to achieve profits or losses similar to the Index history.

Because the Fund collateralizes its futures positions primarily with US Treasuries, money market funds and T-Bill ETFs, the results of the DBIQ Optimum Yield Crude Oil Index Total Return™ (DBIQ Opt Yield Crude Oil Index TR) (DBCMOCLT) are also displayed. Please see [invesco.com](http://invesco.com) for indicative intra-day NAV and last end-of-day NAV.

The S&P GSCI Crude Oil Index – Total Return™ (S&P GSCI Crude Oil) is an unmanaged index used as a measurement of change in oil market conditions based on the performance of a basket of crude oil futures.

S&P GSCI Crude Oil Index – Total Return™ is a trademark of Standard & Poor's, a Division of The McGraw-Hill Companies, Inc.

**Shares are not FDIC insured, may lose value and have no bank guarantee.**

**Shares are not individually redeemable. Shares may be acquired from the Fund and tendered for redemption to the Fund in Creation and Redemption Units only, typically consisting of 200,000 Shares.**

As of March 31, 2019

Top Fund Holdings (%)	Weight
<b>Futures</b>	
WTI Crude	99.99
<b>Collateral</b>	
United States Treasury Bill	93.65
Premier US Government Money Portfolio	3.98
Invesco Treasury Collateral ETF	1.64

A negative in Cash or Other, as of the date shown, is normally due to fund activity that has accrued or is pending settlement. Please see the website for complete holdings information. Holdings are subject to change.

2019 YTD	24.84	25.57	30.68

**How the Fund Invests and Potential Advantages**

The Fund invests in liquid futures contracts trading on regulated exchanges and has the following potential advantages:

- **Enhanced commodity index:** The Fund follows the Index which utilizes and Optimum Yield™ methodology designed to provide a more sophisticated strategy for investing in commodities than that provided by conventional commodity indexes.
- **Cost savings:** The Fund does not incur either the cost of storing a physical commodity or the cost of entering into a commodity-linked note with a dealer, a cost that is usually much higher than entering into an exchange-traded futures contract.
- **Interest earned:** Owning physical commodities provides an investor with no interest income. The Fund collateralizes its futures contracts primarily with US Treasury securities, money market funds and T-Bill ETFs and earns interest on these securities. Interest income can enhance Fund returns.
- **Transparency and liquidity:** The Fund invests in liquid futures contracts at publicly available prices determined by trading on regulated futures exchanges. We believe that this allows the Fund to gain a more direct and cost-effective exposure to commodities than if the Fund either bought commodity-linked notes, which are not publicly priced, or less liquid futures contracts.

**About risk**

This fund issues a Schedule K-1.

**Commodities and futures generally are volatile and are not suitable for all investors.**

**Please review the prospectus for breakeven figures for the Fund.**

**The value of the Shares of the Fund relate directly to the value of the futures contracts and other assets held by the Fund and any fluctuation in the value of these assets could adversely affect an investment in the Fund's Shares.**

**The Fund is speculative and involves a high degree of risk. An investor may lose all or substantially all of an investment in the Fund.**

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Market returns** are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. **Beta** is a measure of risk representing how a security is expected to respond to general market movements.

**Smart Beta** represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.
