

PHB PowerShares Fundamental High Yield Corporate Bond Portfolio

As of Dec. 31, 2014

Fund Description

The PowerShares Fundamental High Yield® Corporate Bond Portfolio is based on the RAFI® Bonds US High Yield 1-10 Index. The Fund will normally invest at least 80% of its total assets in high-yield corporate bonds that comprise the Index. The Underlying Index is comprised of US dollar-denominated bonds that are registered with the SEC or that are Rule 144A securities that provide for registration rights and whose issuers are public companies listed on a major US stock exchange. Only investible, non-convertible, non-exchangeable, non-zero, fixed coupon high-yield corporate bonds qualify for inclusion in the Underlying Index. Based on the Fundamental Index® methodology developed by Research Affiliates, LLC, the Index is compiled and calculated by Ryan ALM, Inc. The Fund and the Index are rebalanced monthly and reconstituted annually in March.

Fund Performance & Index History (%)

	1 year	3 year	5 year	10 year	Fund Inception
Underlying Index					
RAFI Bonds US High Yield 1-10 Index	2.97	7.08	8.29	-	-
Benchmark Index					
Barclays US Corporate High Yield Index	2.45	8.43	9.03	7.74	8.59
Fund					
NAV	1.85	5.97	6.70	-	2.97
After Tax Held	-0.05	3.97	4.51	-	0.47
After Tax Sold	1.06	3.74	4.30	-	1.21
Market Price	2.44	5.52	6.62	-	2.68

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

5-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
RAFI Bonds US High Yield 1-10 Index	-	-	-	1.59	5.18
Barclays US Corporate High Yield Index	1.00	0.80	0.98	1.42	6.30

Alpha, beta and correlation are that of the underlying index.

A Smart Beta Portfolio

Fund Inception: Nov. 15, 2007

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

RAFI Bonds US High Yield 1-10 Index* performance prior to Aug. 2, 2010 reflects that of the original Underlying Index Wells Fargo® High Yield Bond Index. From Aug. 2, 2010, forward, the Index performance reflects that of the Underlying Index RAFI Bonds US High Yield 1-10 Index AND IS NOT INTENDED FOR ANY THIRD PARTY USE.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The Wells Fargo High Yield Bond Index is comprised of US dollar-denominated bonds registered for sale in the

United States whose issuers are public companies listed on major US stock exchanges.

The Barclays US Corporate High Yield Index covers the US dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 100,000 Shares.

Leading the Intelligent ETF Revolution®

About risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index.

Investments in fixed-income securities, such as notes and bonds, carry interest rate and credit risk. Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa. Credit risk is the risk of loss on an investment due to the deterioration of an issuer's financial health. Due to anticipated Federal Reserve Board policy changes, there is a risk that interest rates will rise in the near future.

The Fund may invest in illiquid securities, resulting in a decline of the Fund's returns.

The Fund's underlying securities may be subject to call risk, which may result in the Fund having to reinvest the proceeds at lower interest rates, resulting in a decline in the Fund's income.

The Fund's use of a representative sampling approach will result in its holding a smaller number of bonds than are in the underlying Index, and may be subject to greater volatility.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe

Ratio indicates better risk-adjusted performance.

Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Credit ratings** are assigned by Nationally Recognized Statistical Rating Organizations based on assessment of the credit worthiness of the underlying bond issuers. The ratings range from AAA (highest) to D (lowest) and are subject to change. Not rated indicates the debtor was not rated, and should not be interpreted as indicating low quality. Futures and other derivatives are not eligible for assigned credit ratings by any NRSRO and are excluded from quality allocations. For more information on rating methodologies, please visit the following NRSRO websites: standardandpoors.com and select "Understanding Ratings" under Rating Resources and moody.com and select "Rating Methodologies" under Research and Ratings. **Average Yield to Worst** is the lowest of all yield to calls or the yield to maturity. **Effective Duration** is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for bonds with embedded options. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Beta** is a measure of risk representing how a security is expected to respond to general market movements. **Smart Beta** represents an alternative

and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.
