

PIN PowerShares India Portfolio

As of Dec. 31, 2014

Fund Description

The PowerShares India Portfolio is based on the Indus India Index. The Fund will normally invest at least 90% of its total assets in securities that comprise the Index and American depository receipts based on the securities in the Index. The Index is designed to replicate the Indian equity markets as a whole, through a group of 50 Indian stocks selected from a universe of the largest companies listed on two major Indian exchanges. The India Index has 50 constituents, spread among the following sectors: Information Technology, Health Services, Financial Services, Heavy Industry, Consumer Products and Other. The India Index is supervised by an index committee, comprised of representatives of the Index Provider and members of academia specializing in emerging markets. The Fund and the Index are rebalanced and reconstituted quarterly in January, April, July and October.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index.

Data beginning Fund inception and ending Dec. 31, 2014. Fund performance shown at NAV.

Fund Performance & Index History (%)

	1 year	3 year	5 year	10 year	Fund Inception
Underlying Index					
Indus India Index	23.37	11.96	1.68	-	0.14
Benchmark Index					
MSCI India Index	23.87	14.49	2.66	11.39	0.76
Fund					
NAV	21.89	9.87	-0.28	-	-1.75
After Tax Held	21.35	9.61	-0.45	-	-1.90
After Tax Sold	12.38	7.63	-0.22	-	-1.31
Market Price	20.60	9.78	-0.22	-	-2.12

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

5-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
Indus India Index	-	-	-	0.07	24.14
MSCI India Index	-0.94	0.94	0.99	0.10	25.35

Alpha, beta and correlation are that of the underlying index.

Fund Inception: March 5, 2008

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from

securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The MSCI India Index is an unmanaged index considered representative of Indian stocks. The index is computed using the net return, which withholds

applicable taxes for non-resident investors.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

The Fund is considered non-diversified and may be subject to greater risks than a diversified fund.

As a developing country jurisdiction, Mauritius may be subject to political and/or economic volatility from time to time, which may make its legal and political structures more uncertain than the comparable structures in developed countries. Such instability could adversely impact the Subsidiary.

Investing in securities of small and medium-sized companies may involve greater risk than is customarily associated with investing in large companies.

American Depositary Receipts (ADRs) involve many of the same risks as those associated with direct investment in foreign securities. In addition, the underlying issuers of certain depositary receipts, particularly unsponsored or unregistered depositary receipts, are under no obligation to distribute shareholder communications to the holders of such receipts or to pass through to them any voting rights with respect to the deposited securities.

The dollar value of the fund's foreign investments will be affected by changes in the exchange rates between the dollar and the currencies in which those investments are traded.

The Adviser is registered as a foreign institutional investor (FII) with the Securities and Exchange Board of India (SEBI), and the Subsidiary is registered as a sub-account with the SEBI to obtain certain benefits relating to the Subsidiary's ability to make and dispose of investments. There can be no assurances that the Indian regulatory authorities will continue to grant such qualifications, and the loss of such qualifications could adversely impact the ability of the Subsidiary to make and dispose of investments in India.

Global Depositary Receipts involve the same risks as those associated with ADRs. They are also subject to currency, political, economic and market risks because their values depend on the performance of non-dollar

Annual Index Performance (%)

denominated underlying foreign securities.

A natural or other disaster could occur in a geographic region in which the Fund invests, which could adversely impact the Fund's investments in the affected region.

Indian securities have additional risks, including exchange-rate changes, decreased market liquidity, political instability and taxation by foreign governments. There may be instances in which the Underlying Index must liquidate a security because the security has exceeded the limitation of foreign ownership set by the Index's methodology. This liquidation in the index may occur at an inopportune time which may result in a significant variation between the Index's return and that of the Fund.

Investments focused in a particular industry are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Unlike most ETFs, the Fund currently intends to effect redemptions principally for cash and partially in-kind, rather than primarily in-kind redemptions because of the nature of the Fund's investments. As such, investments in Shares may be less tax efficient than investments in conventional ETFs.

Equity risk states that the value of equity securities, including common stocks, may fall due to both changes in general economic and political conditions that impact the market as a whole, as well as factors that directly relate to a specific company or industry. The fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Beta** is a measure of relative risk and the slope of regression. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net
