

PXMG PowerShares Russell Midcap Pure Growth Portfolio 

As of March 31, 2017

Fund Description

The PowerShares Russell Midcap Pure Growth Portfolio is based on the Russell Midcap[®] Pure Growth Index. The Fund will invest at least 90% of its total assets in the component securities that comprise the Index. The Index is composed of securities with strong growth characteristics selected from the Russell Midcap[®] Index. Securities are weighted based on their style score. The Fund and the Index are rebalanced and reconstituted annually.

Russell Midcap Pure Growth	RMCPGROT
Index Provider	Frank Russell Company

Growth of \$10,000

Data beginning 10 years prior to the ending date of March 31, 2017. Fund performance shown at NAV.

Fund Performance & Index History (%)

	YTD	1 year	3 year	5 year	10 year	Fund Inception
Underlying Index						
Russell Midcap Pure Growth Index	9.61	18.72	-	-	-	-
Benchmark Index						
Russell Midcap Growth Index	6.89	14.07	7.88	11.95	8.13	8.93
Fund						
NAV	9.52	18.30	4.92	9.18	5.85	7.54
Market Price	9.65	18.58	4.95	9.20	5.85	7.53

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See powershares.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

1-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
Russell Midcap Pure Growth Index	-	-	-	1.35	13.35
Russell Midcap Growth Index	3.16	1.08	0.94	1.16	11.68

Alpha, beta and correlation are that of the underlying index.

 **A Smart Beta Portfolio**

Fund Inception: March 3, 2005

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Russell Midcap[®] Pure Growth Index* performance prior to 6/16/2011 reflects that of the original Underlying Index, Dynamic Mid Cap Growth Intellidex Index. From 6/16/2011 to 5/22/2015, performance reflects that of the previous Underlying Index, RAFI Fundamental Mid Growth Index. From 5/22/2015 forward, performance reflects that of the Underlying Index, Russell Midcap[®] Pure Growth Index AND IS NOT INTENDED FOR ANY THIRD PARTY USE.

Neither the underlying Index nor the benchmark

indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The RAFI Fundamental Mid Growth Index is composed of common stocks of mid growth US companies based on fundamental weight.

The Russell Midcap[®] Index is an unmanaged Index considered representative of the mid-cap segment of the US equity universe. The Russell Midcap[®] Growth

Index is an unmanaged index considered representative of mid-cap growth stocks. The Russell Midcap Growth Index and the Russell Midcap Index are trademark/service marks of the Frank Russell Co. Russell[®] is a trademark of the Frank Russell Co.

The Dynamic Mid Cap Growth IntellidexSM Index seeks to provide capital appreciation while maintaining consistent and accurate style exposure.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Stocks of medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a

company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Beta** is a measure of risk representing how a security is expected to respond to general market movements. **Smart Beta** represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.
