PowerShares International BuyBack Achievers Portfolio

As of June 30, 2016

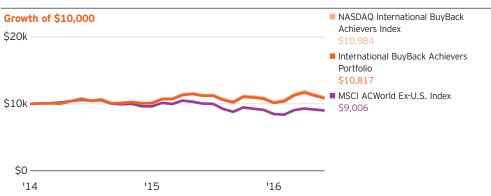

Fund Description

The PowerShares International BuyBack Achievers™ Portfolio is based on the NASDAQ International BuyBack Achievers™ Index. The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index is designed to track the performance of common stocks of foreign companies that meet the requirements to be classified as BuyBack Achievers™. The NASDAQ International BuyBack Achievers Index is comprised of securities issued by corporations that have effected a net reduction in shares outstanding of 5% or more in its latest fiscal year. The Fund and the Index are reconstituted annually in July and rebalanced quarterly in January, April, July and October.

Underlying Index Data

NASDAQ International BuyBack Achievers DRBXUSN Index Provider The NASDAQ OMX Group, Inc.

Data beginning Fund Inception and ending June 30, 2016. Fund performance shown at NAV.

Fund Performance & Index History (%)						
	YTD	1 year	3 year	5 year	10 year	Fund Inception
Underlying Index NASDAQ International BuyBack Achievers Index	0.82	-2.75	-	-	-	4.10
Benchmark Index MSCI ACWorld Ex-U.S. Index	-1.02	-10.24	1.16	0.10	1.87	-4.38
Fund NAV Market Price	0.62 1.08	-3.44 -3.14	- -	- -	- -	3.42 3.35

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invescopowershares.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

1-Year Index Statistics					
	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
NASDAQ International BuyBack Achievers Index	-	-	-	-0.17	16.57
MSCI ACWorld Ex-U.S. Index	6.50	0.85	0.94	-0.57	18.15

Alpha, beta and correlation are that of the underlying index.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from

securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The MSCI ACWorld Ex-U.S. Index is an index considered representative of stock markets of developed and emerging markets, with the exception of US-based companies. The Index is computed using

the net return, which withholds applicable taxes for non-resident investors.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prepared to the proposed to t current prospectus for more information regarding the risk associated with an investment in the Fund.

The Fund may engage in frequent trading of securities in connection with the rebalancing or adjusting its Underlying Index.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to

The Fund may invest in foreign markets and because foreign exchanges may be open on days when the Fund does not price its shares, the value of the non-US securities in the Fund's portfolio may change on days when you will not be able to purchase or sell your

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues. Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns.

Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance.

Correlation indicates the degree to which two investments have historically moved in the same direction and manitude. Alpha is a measure of direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted** Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis. Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value. Weighted Harmonic Average is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. Weighted Average Return on Equity is net income divided by net worth. Weighted Market Capitalization is the sum of each underlying securities' market value. The 30-Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The 30-Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absonce of these temperature inclusivements or absence of these temporary reimbursements or waivers. **Beta** is a measure of risk representing how a security is expected to respond to general market movements. Smart Beta represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or

both. Smart beta funds may underperform capweighted benchmarks and increase portfolio risk. Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.
