

PSCD PowerShares S&P SmallCap Consumer Discretionary Portfolio

As of Dec. 31, 2014

Fund Description

The PowerShares S&P SmallCap Consumer Discretionary Portfolio is based on the S&P SmallCap 600® Capped Consumer Discretionary Index. The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index is designed to measure the overall performance of common stocks of US consumer discretionary companies. These companies are principally engaged in providing consumer goods and services that are cyclical in nature, including retail, automotive, leisure and recreation, media and real estate.

The Index is a subset of the S&P SmallCap 600® Index, which is a float-adjusted, market-capitalization-weighted index reflecting the US small-cap market. The Fund and the Index are rebalanced and reconstituted quarterly.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index.

Fund Data	
S&P SmallCap Consumer Discretionary Portfolio	PSCD
Intraday NAV (IIV)	PSCDIV
CUSIP	73937B506
Listing Exchange	NASDAQ
Number of Securities	94
30-Day SEC Yield	0.54%
30-Day SEC Unsubsidized Yield	0.54%
Total Expense Ratio	0.29%

Underlying Index Data	
S&P SmallCap 600 Capped Consumer Discretionary	SPSU6CDT
Index Provider	S&P Dow Jones Indices, LLC

Growth of \$10,000

Data beginning Fund inception and ending Dec. 31, 2014. Fund performance shown at NAV.

Fund Performance & Index History (%)

	1 year	3 year	5 year	10 year	Fund Inception
Underlying Index					
S&P SmallCap 600 Capped Consumer Discretionary Index	4.83	24.63	–	–	16.46
Benchmark Index					
S&P SmallCap 600 Index	5.76	20.24	17.27	9.03	15.56
Fund					
NAV	4.67	24.33	–	–	16.14
After Tax Held	4.34	24.08	–	–	15.96
After Tax Sold	2.63	19.34	–	–	12.98
Market Price	4.67	24.31	–	–	16.16

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

3-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
S&P SmallCap 600 Capped Consumer Discretionary Index	–	–	–	1.71	14.36
S&P SmallCap 600 Index	3.75	1.01	0.88	1.61	12.53

Alpha, beta and correlation are that of the underlying index.

Fund Inception: April 7, 2010

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from

securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The S&P SmallCap 600 Index is a market-value weighted index that consists of 600 small-cap US stocks chosen for market size, liquidity and industry

group representation.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Leading the Intelligent ETF Revolution®

About risk

Investing in securities of small-capitalization companies may involve greater risk than is customarily associated with investing in large companies.

Equity risk states that the value of equity securities, including common stocks, may fall due to both changes in general economic and political conditions that impact the market as a whole, as well as factors that directly relate to a specific company or industry.

Investments focused in a particular industry or sector, such as the consumer discretionary sector, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Beta** is a measure of relative risk and the slope of regression. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by

earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.
