IMPORTANT INFORMATION

Suitability of Investment

You should inform yourself as to (a) the possible tax consequences, (b) the legal and regulatory requirements, (c) any foreign exchange restrictions or exchange control requirements and (d) any other requisite governmental or other consents or formalities which you might encounter under the laws of the country of your citizenship, residence or domicile and which might be relevant to your purchase, holding or disposal of the Shares.

The Shares are not principal protected. The value of the Shares may go up or down and you may not get back the amount you have invested. See the section headed "Risk Factors" of the Prospectus and the section headed "Other Information – Risk Factors" of this Supplement for a discussion of certain risks that should be considered by you.

In addition to investing in transferable securities, it is the intention of the Company to invest on behalf of the Fund principally in financial derivative instruments ("FDIs") for investment and efficient portfolio management purposes (as detailed below under "Use of Derivative Contracts") where applicable.

The Fund's Shares purchased on the secondary market cannot usually be sold directly back to the Fund. Investors must buy and sell Shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units/shares and may receive less than the current net asset value when selling them.

Certain risks attached to investments in FDIs are set out in the Prospectus under "Risk Factors". The Directors of the Company expect that the Net Asset Value of the Fund will have medium volatility through investments in the FDIs.

An investment in the Shares is only suitable for you if you (either alone or with the help of an appropriate financial or other advisor) are able to assess the merits and risks of such an investment and have sufficient resources to be able to bear any losses that may result from such an investment. The contents of this document are not intended to contain and should not be regarded as containing advice relating to legal, taxation, investment or any other matters.

Profile of a typical investor

A typical investor would be one who is a private or professional investor and is seeking capital appreciation over the long term. Such an investor is also one that is able to assess the merits and risks of an investment in the Shares.

The Directors (whose names appear under the heading "**Directors of the Company**" of the Prospectus) accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement when read together with the Prospectus (as complemented, modified or supplemented by this Supplement) is in accordance with the facts as at the date of this Supplement and does not omit anything likely to affect the importance of such information.

General

This Supplement sets out information in relation to the Shares and the Fund. You must also refer to the Prospectus which is separate to this document and describes the Company and provides general information about offers of shares in the Company. You should not take any action in respect of the Shares unless you have received a copy of the Prospectus. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent of any

such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety before any investment decision with respect to Shares is made.

As of the date of this Supplement, the Company does not have any loan capital (including term loans) outstanding or created but unissued and no outstanding mortgages, charges or other borrowings or indebtedness in the nature of borrowings, including bank overdrafts and liabilities under acceptances or acceptance credits, hire purchase or finance lease commitments, guarantees or other contingent liabilities.

Distribution of this Supplement and Selling Restrictions

Distribution of this Supplement is not authorised unless accompanied by a copy of the Prospectus and the latest annual report and audited accounts of the Company and the Fund (other than to prior recipients of the Prospectus) and if published after such report, a copy of the then latest semi-annual report and unaudited accounts. The distribution of this Supplement and the offering or purchase of the Shares may be restricted in certain jurisdictions. If you receive a copy of this Supplement and/or the Prospectus you may not treat such document(s) as constituting an offer, invitation or solicitation to you to subscribe for any Shares unless, in the relevant jurisdiction, such an offer, invitation or solicitation could lawfully be made to you without compliance with any registration or other legal requirement other than those with which the Company has already complied. If you wish to apply for the opportunity to purchase any Shares, it is your duty to inform yourself of, and to observe, all applicable laws and regulations of any relevant jurisdiction. In particular, you should inform yourself as to the legal requirements of so applying, and any applicable exchange control regulations and taxes in the countries of your respective citizenship, residence or domicile.

Definitions

Words and expressions defined in the Prospectus will, unless otherwise defined in this Supplement, have the same meaning when used in this Supplement.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to achieve the total return performance of the NASDAQ Biotechnology Index (the "**Reference Index**") less fees, expenses and transaction costs.

The Reference Index is designed to represent the performance of biotechnology and pharmaceutical securities on the

NASDAQ Stock Market®. Further information on the components of the Reference Index is set out below under "**General Description of the Reference Index**".

Investment Policy

In order to achieve the investment objective, the Company will on behalf of the Fund invest all or substantially all of the net proceeds of any issue of Shares in:

(i) a basket of global equity securities and equity related securities (the "**Basket**") whereby the Fund, in exchange for the performance/return of the Basket with an Approved Counterparty, will receive the return of the Reference Index through unfunded Swaps being an agreement between the Fund and the Approved Counterparty to exchange one stream of cash flows against another stream pursuant to a master agreement in accordance with the requirements of the International Swaps and Derivatives Association; or

(ii) equities and equity related securities (which may include common stock and preferred stock) where such instruments will provide the performance of the Reference Index. The Fund will invest directly in these equities and equity related securities as opposed to entering into a Swap as detailed at (i) above. The equities and equity related securities may include both constituents of the Reference Index and constituents not included in the Reference Index and shall be listed and/or traded on the exchanges and markets set out in Appendix 1 of the Prospectus. Consequently, the prime criterion for selecting the individual equity and equity related securities is not their perceived attractiveness or potential growth or value but rather their suitability in terms of attaining the investment objective of delivering the performance of the Reference Index.

The current intention of the Fund is to gain exposure to the Reference Index via an unfunded Swap as detailed at (i). However, the Fund may, having due regard to the best interests of Shareholders, decide from time to time to switch partially or totally between the above described policies at (i) and (ii), and shall inform the Shareholders in advance of any such switch and the Supplement shall be updated accordingly.

Each Approved Counterparty to the Swaps and the Company on behalf of the Fund have entered into a master agreement (including any supporting agreements) and will enter into confirmations for each Swap transaction. Such confirmations may be entered into before or after the relevant transaction and may be in electronic form.

The Fund will not be leveraged for investment or efficient portfolio management purposes and will therefore not be subject to any shortfall risk. Any financial obligation arising in respect of the use of the financial derivative instruments shall never exceed the available capital in the Fund.

The Swaps, the Basket, equities and equity related securities and ancillary cash held by the Fund shall constitute the "**Fund Assets**" for the purposes of the Prospectus.

Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under **"Investment Objectives and Policies"** and under **"Investment Restrictions"**.

The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities outlined in Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment.

Index Tracking Strategy

The Manager aims to keep the "**Tracking Error**" of the Fund (being the standard deviation of the difference in returns between the Fund and the Reference Index) below or equal to 0.50% under normal market conditions. However, exceptional circumstances may arise which cause the Fund's Tracking Error to exceed 0.50%.

Use of Derivative Contracts

Swaps

As per the investment policy, the Fund may enter into Swaps to receive the performance of the Reference Index. For the avoidance of doubt, the Approved Counterparty may, where necessary, provide appropriate Collateral to the Company, on behalf of the relevant Fund, in accordance with the Investment Restrictions so that the Company's risk exposure to the Approved Counterparty is reduced to the extent required by the Central Bank.

In order to reduce the tracking difference and/or improve the performance of the Fund, the return on the index provided for the purposes of calculating the Swap may reflect a lower rate of withholding tax than ordinarily applied within the Reference Index.

The Swaps may be terminated by either party at any time at their fair value or on the occurrence of certain events with respect to either the Fund or the Approved Counterparty including, but not limited to, an event of default (such as a failure to pay, breach of agreement or bankruptcy) or a termination event (which is not due to the fault of either party, for example, illegality or a tax event).

If the Swaps are terminated, due to an event of default or termination event, a close-out amount will be determined with respect to the Swaps. An amount equal to the relevant close-out amount (calculated in accordance with the terms of the Swaps) or such other amount as agreed between the parties will be settled between the Approved Counterparty and the Fund. The Swaps will at all times be valued in accordance with the provisions of the Prospectus. The Fund may then enter into new Swaps unless the Directors resolve that it is inadvisable to enter into new Derivative Contracts, or to invest directly in the underlying securities of the Reference Index or, if the Directors determine that there is no reasonable way to achieve the performance of the Reference Index, the Fund may be terminated in accordance with the provisions of the Prospectus.

The Swaps are unfunded payments and are linked to the return on the Basket. The Swap provides the difference between the payments received for the Basket and the performance of the Reference Index.

The Company on behalf of the Fund has filed with the Central Bank its risk management policy which enables it to accurately measure, monitor and manage the various risks associated with the use of Financial Derivative Instruments. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments.

The Company will use the commitment approach for the purposes of calculating global exposure for the Fund. The Fund's total exposure to the Reference Index will be limited to 100% of Net Asset Value.

Investment Restrictions

Investors in particular must note that the general investment restrictions set out under "**Investment Restrictions**" in the Prospectus apply to the Fund.

The Fund shall not invest more than 10% of its net assets in other UCITS or other open or closed ended CIS.

Efficient Portfolio Management

Further information on efficient portfolio management is contained in the main body of the Prospectus under the heading "**Use of Financial Derivative Instruments and Efficient Portfolio Management**".

Collateral Policy

Further information on the collateral policy is contained in the main body of the Prospectus under the heading "**Collateral Policy**".

The Fund may post or receive collateral in accordance with the Company's collateral policy.

Consequences of Disruption Events

Upon the occurrence of a Disruption Event (and without limitation to the Directors' personal powers as further described in the Prospectus) an Approved Counterparty may make adjustments to determine the value of the relevant Swaps and the Net Asset Value may be affected by such adjustment; and/or the Directors may (i) temporarily suspend the calculation of the Net Asset Value and any subscription, repurchase and exchange of Shares in accordance with the provisions of the Prospectus under the section "**Suspension of Calculation of Net Asset Value**"; and/or (ii) the Directors may, in certain circumstances as set out in the Prospectus, terminate the Fund.

Limited Recourse

A Shareholder will solely be entitled to look to the assets of the Fund in respect of all payments in respect of its Shares. If the realised net assets of the Fund are insufficient to pay any amounts payable in respect of the Shares, the Shareholder will have no further right of payment in respect of such Shares nor any claim against or recourse to any of the assets of any other Fund or any other asset of the Company.

Leverage

The Fund does not use leverage in its investments methods or contain any leveraged instrument.

Borrowings

In accordance with the general provisions set out in the Prospectus under the heading "**Borrowing and Lending Powers**", the Company on behalf of the Fund may borrow up to 10% of the Net Asset Value of the Fund on a temporary basis. Such borrowings may only be used for short term liquidity purposes to cover the redemption of Shares.

Dividend Policy

There are no dividend entitlements for the Class Acc Shares.

With respect to Class Dist Shares only and at the discretion of the Board of Directors, the Fund aims to pay quarterly dividends usually on or around 20 March, 20 June, 20 September and 20 December in each year calculated by reference to the embedded reinvested dividends within the Reference Index during the relevant dividend period less taxes or other withholding. The Reference Index seeks to track the price performance of the companies contained within the Reference Index and distributions made by those companies. There is no guarantee that any dividend will be paid. It should be noted that the payment of any dividend will be calculated in a manner such that the declared dividend will never be more than the excess performance of the total return performance of the Fund as calculated by reference to the price return performance of the Reference Index, over the relevant calculation period.

The Company will declare dividends in accordance with the terms of the Prospectus. Only investors who purchase Shares prior to the date on which the relevant dividend is declared by the Board of Directors and remain in the Fund until the date on which the Board of Directors pay the relevant dividend, will receive the declared dividend, otherwise they are not entitled to such dividend. Details relating to the declaration and

payment of dividends shall be set out on the Website. One of the economic consequences of the payment of a dividend (if any) is that the Net Asset Value of the Class Dist Shares will be reduced accordingly.

Trading

Application will be made to the LSE and/or such other exchanges as the Directors may determine from time to time (the "**Relevant Stock Exchanges**") for listing and/or admission to trading of the Shares issued and available to be issued on the main market of each of the Relevant Stock Exchanges on or about the Launch Date. This Supplement and the Prospectus together comprise listing particulars for the purposes of trading on the main market of each of the Relevant Stock Exchanges.

Exchange Traded Fund

The Fund is an Exchange Traded Fund ("**ETF**"). The Shares of this Fund are fully transferable among investors and will be listed and/or traded on the Relevant Stock Exchanges. It is envisaged that Shares will be bought and sold by private and professional investors in the secondary market in the same way as the ordinary shares of a listed trading company.

GENERAL DESCRIPTION OF THE REFERENCE INDEX

The Reference Index is the NASDAQ Biotechnology Index (the "**Reference Index**"). The Reference Index is further described below but such description only represents a summary of the information available from public sources and neither the Directors, the Manager, NASDAQ OMX Group, Inc. or Nasdaq, Inc. (the "**Index Provider**") nor the Investment Manager take any responsibility for the accuracy or completeness of such information.

The Reference Index is a net total return modified market capitalisation weighted index. The securities eligible for inclusion in the Reference Index include common stocks, ordinary shares, ADRs, and shares of beneficial interest or limited partnership interests. To be eligible for inclusion in the Reference Index, a security must have a market capitalization of at least $200 million, an average daily trading volume of at least 100,000 shares and be classified according to the Industry Classification Benchmark (ICB) as either biotechnology or pharmaceutical. The Reference Index has approximately 116 components and is rebalanced on a quarterly basis with changes to the components becoming effective after the close of trading on the third Friday in March, June, September and December.

The rebalancing frequency of the Reference Index has no direct impact on the transaction costs associated with the Fund itself as any rebalancing within the Reference Index is not expected to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Reference Index to be static.

The Manager monitors the investment restrictions applicable to the Fund. As soon as the Manager becomes aware that the weighting of any particular component stock in the Reference Index exceeds the permitted investment restrictions resulting in the Reference Index no longer being eligible for UCITS investment, the Manager will seek to utilise the Index Disruption Events detailed in the prospectus so as to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations in respect of financial indices.

Exposure to the Reference Index will give an indirect exposure to the individual securities comprising the Reference Index of up to 20% of its Net Asset Value.

Risk Factors

Certain risks relating to the Shares are set out under the heading "**Risk Factors**" in the Prospectus. In addition, Shareholders must also note that:

(a) The return payable under the Swaps with an Approved Counterparty is subject to the credit risk of the Approved Counterparty. In addition, the Approved Counterparty will act as the calculation agent under the Swaps (the "**Calculation Agent**"). Shareholders should note that not only will they be exposed to the credit risk of the Approved Counterparty but also potential conflicts of interest in the performance of the function of Calculation Agent by the Approved Counterparty. The Approved Counterparty has undertaken to use its reasonable endeavours to resolve any such conflicts of interest fairly (having regard to its respective obligations and duties) and to ensure that the interests of the Company and the Shareholders are not unfairly prejudiced. The Directors believe that the Approved Counterparty is suitable and competent to perform such functions. In addition the valuations provided by the Approved Counterparty in its role as Calculation Agent will be verified at least weekly by a party independent of the Approved Counterparty who shall either be the Administrator or sourced by the Administrator as appropriate and who has been approved for such purpose by the Depositary.

(b) A Fund may be exposed to a single country or small number of countries. A geographically concentrated investment strategy may be subject to a greater degree of volatility and of risk than one that is geographically diversified. The Fund's Investments will become more susceptible to fluctuations in value resulting from economic or business conditions in the country where the Fund is invested. As a consequence, the aggregate return of the Fund may be adversely affected by the unfavourable developments in such country.

(c) The Fund primarily invest in securities within a specific or small number of sectors and/or industries. Adverse developments within such sectors and/or industries may affect the value of the underlying securities of the Fund investing in such securities. Investors should be prepared to accept a higher degree of risk when investing in a fund (such as the Fund) that primarily invests in securities within a specific or small number of sectors and/or industries than a fund that is more widely diversified across different sectors.

(d) Although the Fund may enter into derivative transactions with one or more Approved Counterparties, there is no requirement for the Fund to execute transactions with more than one Approved Counterparty and consequently counterparty risk may be concentrated in a single counterparty or a small number of counterparties. Further, there is no agreement between any Approved Counterparty and the Fund for any such Approved Counterparty to substitute themselves for another counterparty which defaults under a derivative agreement or to make good any losses which the Fund may incur as a result of a counterparty default.

(e) Dividends are subject to assumed tax rates - Any announced dividend in respect of a component stock comprising the Basket will be reduced by an assumed tax rate (which may be zero), which is intended to reflect the withholding tax rate levied, or the potential tax rate that may be levied, by the country of incorporation or residence of the issuer of such component stock. The assumed tax rate will be determined by the Index Calculation Provider based on its view of applicable law and/or regulations, observable sources and/or market practice. The assumed tax rates may be amended from time to time by the Index Calculation Provider. If the assumed tax rate in respect of one or more component stocks is increased then the performance of the Reference Index may be affected.

(f) The Fund synthetically replicates the performance of the Reference Index through Swaps. Investment in the Fund does not constitute a direct or indirect purchase or other acquisition or assignment of any interest in any component stock of the Reference Index. As such, the risks and returns of an investment in the Fund may differ significantly from a cash investment in the relevant

component stocks of the Reference Index. There can be no assurance that the Reference Index will be successful at producing positive returns consistently or at all, and in exceptional circumstances, the value of the Reference Index could fall to zero. In those circumstances, the Fund's net economic exposure will be to the Reference Index and not to the physical holdings of the Fund.

(g) Liquidity risk exists when a particular instrument is difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid as is the case with many privately negotiated derivatives, it may not be possible to initiate a transaction or liquidate a position at an advantageous price or at all, and this may impact the Manager's ability to process subscription and redemption requests.

Investors should also refer to the Prospectus for additional disclosure of risks and conflicts of interest.

An English version of a term-sheet summarising the general terms of all derivative contracts, such as swap agreements, are available to investors upon request at the Company's registered office.
