Invesco US Enhanced Equity UCITS ETF EUR Hdg Acc

IQUE

Fund objective

The Invesco US Enhanced Equity UCITS ETF EUR Hdg Acc is an actively managed fund that aims to achieve a long-term return in excess of the S&P 500 Index, less the impact of fees. To minimise exposure to fluctuations in the exchange rate between USD and EUR, the EUR Hedged share class enters into foreign exchange transactions.

The fund is not managed in reference to a benchmark. An investment in this fund is an acquisition of units in an actively managed fund rather than in the underlying assets owned by the fund.

Risk indicator

The Risk Indicator is subject to change and is correct based on the data available at the time of publication.

¹ Ongoing charge includes management fee, custody and administration costs but excludes transaction costs. Costs may increase or decrease as result of currency and exchange rate fluctuations. Consult the legal documents for further information on costs.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested. The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults. The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified. The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund. Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.

About the ETF

The fund will seek to achieve its investment objective by applying an optimisation process based on Value, Quality and Momentum factors. The investment manager uses its proprietary model to assess the attractiveness of equities in a broad universe of liquid large- and mid-capitalisation securities in the US. Comparisons are conducted within industry groups to ensure comparability. The optimisation process then looks for the best trade-off between exposure of the fund to the three factors, risk considerations and transaction costs. The entire factor assessment, risk modelling and portfolio construction process is repeated each month, following which the fund's holdings are rebalanced. This fund will not seek to track the performance of a benchmark. The fund will hold an actively managed portfolio of securities with the aim of delivering superior risk-adjusted returns over the long term when compared with the average performance of US equity markets. The S&P 500 Index may be used for performance comparison.

Invesco US Enhanced Equity UCITS ETF EUR Hdg Acc was launched on 07 July 2026. Performance information will be available after 07 July 2027.

Glossary

Benchmark: An index against which the ETF is measured, in terms of relative performance, risk and other useful comparisons.

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Factors: An investment approach that seeks to identify and invest in securities that display certain quantifiable characteristics. Common examples of factors include Value, Quality and Momentum. A factor strategy may seek to target just one factor or combine multiple factors.

Hedged: The intended result of reducing the portfolio's exposure to a specific risk, such as the risk of fluctuations between currency exchange rates ("currency hedging").

Physical Replication: Physical funds invest directly in constituents of the benchmark index.

Replication Method: Strategy employed by the fund to achieve its objective.

UCITS: Undertakings for Collective Investment in Transferable Securities. European regulatory framework for an investment vehicle that can be marketed across the European Union.
