

# Invesco S&P 500 QVM UCITS ETF Dist

**PQVM**

**Fund objective**

The Invesco S&P 500 QVM UCITS ETF Dist aims to provide the net total return performance of the S&P 500 Quality, Value & Momentum Multi-factor Index (the "Reference Index"), less the impact of fees. The fund distributes dividends on a quarterly basis.

**An investment in this fund is an acquisition of units in a passively managed, index tracking fund rather than in the underlying assets owned by the fund.**

**ETF information**

|                             |   |

| SFDR classification         | Article 6   |

**Risk indicator**

The Risk Indicator is subject to change and is correct based on the data available at the time of publication.

<sup>1</sup> Ongoing charge includes management fee, custody and administration costs but excludes transaction costs. Costs may increase or decrease as result of currency and exchange rate fluctuations. Consult the legal documents for further information on costs.

**Investment risks**

For complete information on risks, refer to the legal documents. The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested. The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults. The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified. The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.

**About the index**

The Reference Index aims to represent the performance of those companies within the S&P 500 Index which have the highest aggregate exposure to three investment factors: quality, value and momentum. To determine the components of the Reference Index, all companies included in the S&P 500 Index are assigned scores based on their performance against these three factors. These scores are then combined on an equal-weighted basis into a final factor composite. All companies are then ranked by their final factor composite with the top 100 companies being selected for inclusion in the Index, subject to a buffer rule which aims to reduce turnover. The weight for each component in the Benchmark will range between 0.05% and the lesser of 5% or 20 times its market capitalisation weight. The weight of each sector is capped at 40% for the purposes of seeking to avoid sector concentration.

**Past performance does not predict future returns.**

**Indexed performance, % growth since inception**

**Cumulative performance as at 31 March 2025 (%)**

|       | 1Y    | 3Y    | 5Y     | 10Y    | Fund inception |

Source: Invesco, Bloomberg L.P., FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. Returns may increase or decrease as a result of currency fluctuations. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee.

---

#### **Glossary**

**Benchmark:** An index against which the ETF is measured, in terms of relative performance, risk and other useful comparisons.

**Distribution Yield:** The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

**ESG:** Environmental, Social and Governance, three key factors in measuring sustainability and societal impact of a company.

**ETF:** Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

**Factors:** An investment approach that seeks to identify and invest in securities that display certain quantifiable characteristics. Common examples of factors include Value, Quality and Momentum. A factor strategy may seek to target just one factor or combine multiple factors.

**Hedged:** The intended result of reducing the portfolio's exposure to a specific risk, such as the risk of fluctuations between currency exchange rates ("currency hedging").

**Physical Replication:** Physical funds invest directly in constituents of the benchmark index.

**Replication Method:** Strategy employed by the fund to achieve its objective.

**UCITS:** Undertakings for Collective Investment in Transferable Securities. European regulatory framework for an investment vehicle that can be marketed across the European Union.
