Tracking Error Analysis

Anticipated Ranges for the Funds

The chart on the table below lists levels of tracking errors ranges for the current products listed in Europe utilised by the Investment Manager.

The Investment Manager will periodically revisit the “minimum” and “maximum” of each Fund to make sure it is still reasonable as well as alternative measurements to gauge tracking accuracy. The ranges are identical to those used for Invesco US-listed funds.

[^] Tracking error is considered normal. Due to the size of the Fund, it is very difficult to match the index exactly. One of the main components is VIX futures which are very volatile and create this tracking error.

Tracking Difference is defined as the difference between the portfolio returns and the index returns. These differences are highlighted on page 8.

Tracking error is the annualised standard deviation of the difference in monthly returns between a Fund and its index. These are shown in the above table.

Causes of Tracking Error

ETFs, like index Funds, are designed to track a specific market segment, investment theme or widely followed benchmark. Since they are passive in nature, tracking error for an ETF should be low or non-existent in theory. The causes of tracking error for ETFs can include, but are not limited to the following: holdings/size of the fund, regulatory issues/constraints and cash flows and fees.

The greatest challenge for our Funds tends to be cash management due to fund size and, given the concentrated nature of some of the Funds and limited liquidity on certain securities, a modest amount of tracking error is unavoidable. The report uses at least 12 months of performance difference between Fund and index to obtain an accurate tracking error value for the Funds.

Investment Manager's Report (continued)

Tracking Error Analysis (continued)

Tracking Error Exception

At the direction of the Board of the Company, we have been providing a quarterly tracking error analysis using the tracking error ranges noted as a reference point. The Investment Manager will periodically revisit the "minimum" and "maximum" of each Fund to make sure it is still appropriate as well as alternative measurements to gauge tracking accuracy.

Correlation Analysis

Correlation represents the relationship between two or more variables with a value assigned between 1 and -1. Correlation is the degree to which these variables are observed to move together: if they move in the same direction, there is positive correlation; if they move in opposite directions, there is negative correlation. A value of 1 indicates they are perfectly correlated and a value of -1, means they are exact opposites. The calculated value usually falls somewhere in between indicating the degree of linear dependence between the variables. The closer the coefficient is to either 1 or -1, the stronger or weaker the correlation between the variables (in this case the Fund and index).

The table below outlines the correlation of each of the funds compared to their respective underlying indices. At least 1 year of data is beneficial when doing correlation analysis for the Funds. To get the 1 year figures, monthly data was used for the analysis.

Please see the below table for detailed correlation analysis by Fund.

5. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- a) A Shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

The Finance Act 2010 provides that the Revenue Commissioners may grant approval for investment funds marketed outside of Ireland to make payments to non-resident investors without deduction of Irish tax where no relevant declaration is in place, subject to meeting the “equivalent measures”. A company wishing to receive approval must apply in writing to the Revenue Commissioners, confirming compliance with the relevant conditions.

Notes to the Financial Statements (continued)

6. Fair value levels

Under amendments to FRS 102 – Fair Value Hierarchy Disclosures, the Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and

Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Furthermore, for those instruments which have significant unobservable inputs (Level 3), the standard requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses for the financial period split between those recognised in the Statement of Comprehensive Income and recognised through the statement of total recognised gains and losses, purchases, sales issues and settlements, and a sensitivity analysis of assumptions used in determining the fair value of Level 3 positions.

The value of securities classified as Level 1, Level 2 and Level 3 at 31 March 2023 is as follows:

8. Translation adjustment

For the purpose of combining the Financial Statements of the Funds to arrive at Total Company figures (required under Irish Company Law), the amounts in the Funds' Statement of Financial Position have been translated to US Dollar at the exchange rate ruling at 31 March 2023. The Statement of Comprehensive Income and proceeds from subscriptions and amounts paid on redemptions of redeemable participating Shares are translated at the average rates prevailing at the date of the transactions. For rates of exchange please see note 4. The notional foreign exchange loss of 31 March 2023 of USD(4,727,478) (31 March 2022: USD(3,124,786)) is due to the use of average rates as stated above and the difference in opening and closing rates in translation of opening net assets. Such techniques and instruments will be utilised in accordance with the requirements of the Central Bank of Ireland. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject as aforesaid) may employ such techniques and instruments.
