30 April

The Company

The Invesco 3 Investment Series is an investment company with variable capital, incorporated in England and Wales on 3 April 2014.

The Company is a "UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 October 2019, the Company consisted of two Funds:

Invesco Global Emerging Markets Bond Fund (UK) Invesco Global Income Fund (UK)

Accounting Periods

Annual accounting date Interim accounting date 31 October Distributions paid on Monthly on the last day of the month

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Securities Financing Transactions Regulation

This Regulation requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

During the period from 1 May 2019 to 31 October 2019, none of the Funds entered into any SFTs and/or TRS. Should this change in the future, the interim and annual reports for the Company will disclose all required information on the use of SFTs and TRS by the Company.

Please refer to the Prospectus for further details on SFTs and TRS.

Fund Events

On the 7 August 2019 there was an update to the Prospectus for the various ICVC funds. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There have been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2018, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invesco.co.uk). Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UCITS related activities of the Manager in respect of performance year (1 January 2018 to 31 December 2018) is £76.21m of which £44.70m is fixed remuneration and £31.51m is variable remuneration. The number of beneficiaries is 379.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UCITS it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UCITS related activities for the performance year (1 January 2018 to 31 December 2018) is £18.62m of which £4.16m is paid to Senior Management and £14.46m is paid to other Identified Staff.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The securities that the Funds invests in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds.

The Funds have the ability to make use of financial derivatives (complex instruments) which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. The leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested, resulting in the Fund being exposed to a greater loss than the initial investment.

The Funds may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss. The Funds performance may be adversely affected by variations in interest rates. The performance of the Invesco Global Emerging Markets Bond Fund (UK) may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

As one of the key objectives of the Funds is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The Invesco Global Emerging Markets Bond Fund (UK) invests in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Invesco Global Income Fund (UK) may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

All risks are contained within the Prospectus.

Brexit

The UK has voted to leave the EU, an event commonly referred to as Brexit. The exit date may be shortened or extended upon agreement between the UK and EU27. At the date of this report, discussions remain ongoing between the UK and EU27 as to the precise nature of the future relationship. It is not certain at this stage whether a withdrawal agreement will be finalised or if the UK will leave the EU under a no-deal scenario. The Authorised Corporate Director does not believe that Brexit under any of these scenarios will present significant issues that cannot be mitigated given that no Fund is passported into Europe, Shareholders are predominantly UK-based and core counterparties of and service providers to the Company have contingency arrangements available as necessary to ensure that activities can continue with minimal disruption. In addition, on 30 January 2019, EU27 national regulators and the UK's Financial Conduct Authority agreed Memoranda of Understanding in the event of a no-deal Brexit scenario on various matters related to the conduct of financial services and trading activities.

The Company's Manager, Invesco Fund Managers Limited "IFML", is part of a global group and has been committed for many years to meeting clients' needs across Europe in both EU and non-EU countries. The change in the UK's status from an EU to a non-EU country will not change the group's focus or commitment to serve its clients across Europe. IFML is monitoring developments closely, through a Brexit Steering Committee, and will take advantage of the Memoranda of Understanding to ensure that the impact on clients and the Company is minimal.

Holdings in other Funds of the Company

As at 31 October 2019, the Invesco Global Income Fund (UK) held 2,150,000 shares, with a market value of £4,648,000, in the Invesco Global Emerging Markets Bond Fund (UK). As at 31 October 2019, Invesco Global Emerging Markets Bond Fund (UK) held no shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders of the Company are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment.

None of the Funds qualify for cash ISA investment.

Certification of the Interim Report by the Manager In accordance with the requirements of the Financial Services Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

Director - Alan Trotter

Director - Douglas Sharp

Risk and Reward Profiles

for the period 1 May 2019 to 31 October 2019

| Invesco Global Emerging Markets Bond | Fund (UK) |
|--------------------------------------|-------------|
| Lower Risk | Higher Risk |

| Typically lower rewards | | | | | Туріса | Illy highei | r rewards |
|-------------------------|---|---|---|---|--------|-------------|-----------|
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |

Invesco Global Income Fund (UK)

| Lower Risk Hi | | | | | | gher Risk | | |
|-------------------------|---|---|---|--------|-------------|-----------|---|--|
| Typically lower rewards | | | | Туріса | Illy highei | r rewards | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | |

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invesco.co.uk or by contacting us.

Invesco 3 Investment Series (the "Company") Notes applicable to the unaudited financial statements of all Funds

1 Accounting Policies

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014.

All other accounting policies used to prepare the interim financial statements are as per the audited financial statements for the year ended 30 April 2019.

2 Shareholders' Funds

The Manager's entry charge and Fund Management Fee (FMF) are as follows:

| | | Entry Charge % | Fund Management Fee % |
|--|--------------------|----------------------|--------------------------------|
| Invesco Global Emerging Markets Bond Fund (UK) | - No Trail classes | 0.0 | 0.95 |
| 5 5 | - Z classes | 0.0 | 0.70 |
| | - Y classes | 0.0 | 0.65 |
| Invesco Global Income Fund (UK) | - Trail classes | 5.0 | 1.54 |
| | - No Trail classes | 0.0 | 1.04 |
| | - Z classes | 0.0 | 0.82 |
| | - Y classes | 0.0 | 0.77 |

References in this report to Trail classes mean the Accumulation Shares and Income Shares.

The net assets attributable to each share class, the net asset value per share and the number of shares in issue of each class are shown in the comparative tables of each Fund. These can be found on:

| Invesco Global Emerging Markets Bond Fund (UK) | page 09 |
|--|---------|
| Invesco Global Income Fund (UK) | page 21 |

Each share class has the same rights on a winding up of the Company.

3 Investment Objective and Policy

The investment objective and policy of each Fund can be found on:

| Invesco Global Emerging Markets Bond Fund (UK) | page 07 |
|--|---------|
| Invesco Global Income Fund (UK) | page 19 |

The Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Fund's investment objective, to fund redemptions of shares in that Fund, for the efficient management of the Fund in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Fund. They may also borrow, provided such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

Invesco Global Emerging Markets Bond Fund (UK)

Investment report for the period

The Investment Objective and Policy of the Invesco Global Emerging Markets Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in emerging markets debt securities (including investment grade, non-investment grade and unrated) issued by governments, supranational bodies and other public entities as well as by companies, globally. Exposure to currency markets will be achieved by investing in debt securities issued either in the currency of the issuing country or in major currencies. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Standardised rolling 12 month performance data for the years 30 September 2014 to 30 September 2017 are not available as the Fund was launched on 27 February 2017. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Global Emerging Markets Bond Fund (UK)

Investment report for the period

Strategy, review and outlook

The Fund delivered a return of 6.1% over the six months to the end of October 2019. This placed it in the second quartile of its peer group, the IA Global Emerging Markets Bond Sector NR, which returned 5.9%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to the 31 October 2019 was a period of positive performance for global emerging market debt. Two factors have had an important influence on returns. First, the ongoing trade tensions between the US and China. Sentiment has been influenced by the negotiations between the two countries, which have continued to see-saw. The second factor has been the loosening of monetary policy by the US Federal Reserve and other central banks. The reduction in developed market interest rates has also seen yields in many developed countries fall to historically low levels. In turn, this has led to renewed demand for yield with emerging markets a key beneficiary. Despite the generally positive backdrop, there has been some country specific volatility. Argentina, which began the process of restructuring its debt after defaulting is a high profile example.

Falling bond yields were the biggest driver of Fund performance over the six month period. Given the fall in the Pound since March 2019, the highest contribution to performance came from the Fund's holdings in US dollar denominated bonds. In terms of local currency, the highest contribution to returns came from the allocation to Turkish and Mexican bonds.

The Fund aims to achieve growth of income and capital by investing across the full range of emerging market fixed income opportunities. This means that the Fund invests in both local and hard currency (typically US dollar) bonds. Exposure is sought through government, quasi-government and corporate bonds. Portfolio management is based on top-down, macroeconomic and political analysis as well as bottom-up research of individual securities and issuers. These positions may be either high yield or investment grade. Currency is actively used as a source of return.

Investment report for the period

The Investment Objective and Policy of the Invesco Global Income Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets globally in government and corporate debt securities (including investment grade, non-investment grade and unrated) and up to 60% of its assets in shares or other equity related securities of companies globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

On the 7 August 2019 there was an update to the Prospectus. As part of this update, various changes were implemented regarding investment objectives, investment policies, investment strategies and benchmark disclosures, all for clarification purposes only. There has been no changes to the way the Funds are managed. The updated prospectus is available at www.invesco.co.uk.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund delivered a return of 2.3% over the six months to the end of October 2019. This placed it in the third quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector NR, which returned 2.3%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The six months to the 31 October 2019 was a period of positive performance for both bond and equity markets. Government bond markets were particularly strong with yields (which move inversely to prices) in many countries reaching record lows during August. In turn, this strong performance helped corporate bonds to also rally. The main catalysts for the rally was the expectation of and subsequent implementation of easier monetary policy by central banks.

The low level of yields and supportive central bank backdrop led to a surge in corporate bond issuance during September. Bloomberg report that in total \$308 billion was raised in the debt markets – the first ever month issuance has topped \$300 billion. Despite the positive tone, there were some company specific events that highlighted the more challenging environment some companies continue to face. One of the most high-profile was Thomas Cook, which collapsed as it was unable to secure additional funding to continue trading. Toward the end of the period, equity markets saw a pivot away from more 'defensive' parts of the market and into more 'cyclical' and economically-sensitive equities.

The Fund benefitted from positive performance across both bond and equity allocations. Within the bond portfolio the highest contribution came from holdings in the financial sector. Emerging market exposure further added to returns. Within equities the two highest contributors were Bristol-Myers Squibb and Taiwan Semiconductor Manufacturing.

The Fund's fixed income allocation is invested in a diversified portfolio of high yield and investment grade bonds. The subordinated bonds of companies within the financial sector are currently the largest exposure within the Fund's corporate bond allocation. In addition, we see some value in emerging market bonds. In equity markets, we favour companies that we believe are high quality, with attractive franchises and balance sheets with a conservative level of debt and that are managed for the primary purpose of delivering shareholder value in the form of a sustainable and growing dividend.
