Invesco boosts UK ETF distribution team with the appointment of James Grogan

London, 11 November 2025: Invesco, a leading global asset manager is pleased to announce the appointment of James Grogan to the position of Senior ETF Client Director, reporting to Tom Banks, Head of UK ETF Distribution.

James joins from HSBC, where he was responsible for the sale of ETF and index fund products to wholesale clients in the UK and the Channel Islands. Prior to his role at HSBC, James spent almost five years in Citibank's Global Wealth Division, most recently as Head of ETF, Fixed Income and Equity product for the UK onshore and EMEA offshore wealth business.

Tom Banks commented: "We are delighted to have someone of James' calibre join our expanding team as we look to continue to scale our ETF franchise.

Invesco's ETF business goes from strength to strength, for example the Invesco S&P 500 UCITS ETF recently passed $50 bn in AUM, cementing its position as the world's largest swap-based ETF. We are therefore very pleased to have James join to build our ongoing success in the UK wholesale channel across a variety of client segments."

Investment risks
The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.
For complete information on risks, refer to the legal documents.
The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.
Invesco S&P 500 UCITS ETF: The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements and would also be affected by any spread between the pricing of the swaps and

the pricing of the benchmark. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.

The Fund might purchase securities that are not contained in the reference index and will enter into swap agreements to exchange the performance of those securities for the performance of the reference index.

The Fund is invested in a particular geographical region, which might result in greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.

Important information

This marketing communication is exclusively for use by trade press in the UK. It is not intended for and should not be distributed to the public. Views and opinions are based on current market conditions and are subject to change.

This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy.
