

Invesco expands equal weight offering with launch of European blue-chip ETF exposure

London, 2 December 2025 – Invesco is expanding its market-leading range of equal weight exposures with the launch of the Invesco EURO STOXX 50 Equal Weight UCITS ETF. This latest offering will be the only ETF in Europe providing access to the equal-weight version of the Eurozone's leading blue-chip equity index.

Invesco is the global leader in terms of assets under management in equal weight strategies. The firm has the broadest range of equal weight ETFs in Europe with targeted exposures to key Global, Europe and US equity benchmarks and includes the world's first swap-based equal weight ETF. US\$3.1 billion of assets are currently invested across this range of ETFs, with US\$1.9 billion of net inflows in the year to date¹.

Matthew Tagliani, Head of EMEA ETF Product at Invesco, said: "Interest in equal-weight strategies has been gathering pace after years of mega-cap outperformance led many investors to look for effective tools to help them reduce concentration risk. While some investors will use these ETFs tactically when the largest constituents of an index seem overvalued, others will employ them as core holdings to increase diversification and capture the long-term potential benefits of regular rebalancing."

The EURO STOXX 50 index represents the performance of the 50 largest companies among the 20 super-sectors in the Eurozone. The EURO STOXX 50 Equal Weight index contains the same constituents as the standard version but weights each constituent equally rather than by size. The Invesco ETF will invest physically in all the securities and in the same proportion as the equal weight index, which is rebalanced quarterly.

Chris Mellor, Head of EMEA ETF Equity Product Management at Invesco, said: "The top 10 stocks make up just over 41% of the total market-cap weighting of the EURO STOXX 50 index, with the single largest stock accounting for over 8% of the index on its own. With the equal-weight

¹ As at 17 November 2025

version of the index trading at a 29% price-to-book discount to the standard index, valuations are looking more attractive.”

Axel Lomholt, General Manager at STOXX, said: “We are committed to providing innovative solutions linked to our flagship EURO STOXX 50 index that support investor portfolio diversification. We are delighted to collaborate on Invesco’s launch of its latest ETF based on this equal-weight index, building on a long history of collaboration with Invesco that began in 2009 with the launch of its first EURO STOXX 50 related ETF.”

ETF details

ETF name	Invesco EURO STOXX 50 Equal Weight UCITS ETF	
Benchmark	EURO STOXX 50 Equal Weight Total Return (Net) Index	
ETF ticker*	EWSX GY	EWSD GY

Investment Risks

For complete information on risks, refer to the legal documents.

The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.

The fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.

The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.

Important information

This marketing communication is exclusively for use by trade press in Austria, Denmark, Finland, France, Germany, Ireland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the UK. It is not intended for and should not be distributed to the public.

This document is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security, or strategy.
