Invesco Global Active ESG Equity UCITS ETF (the "Fund")
A sub-fund of Invesco Markets II plc (the "Umbrella Fund")
EUR PfHdg Dist (ISIN: IE0008YN55P8) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The Fund is an actively-managed Exchange-Traded Fund ("**ETF**"), which aims to achieve a long-term return in excess of the MSCI World Index (the "**Benchmark**")[1], by investing in an actively-managed portfolio of global equities that meet environmental, social, and corporate governance criteria (the "**ESG Criteria**").
- To achieve the investment objective, the Fund invests in shares of companies from developed markets worldwide. Eligible stocks are screened for compliance with the Fund's ESG Criteria, which incorporates both exclusion criteria (based on an issuers exposure to controversial business activities or ESG controversies) and a best-in-class approach which selects those securities from each industry that score highest according to the Investment Manager's scoring system. Eligible stocks are then scored based on their attractiveness with respect to three investment factors: Value (i.e. companies perceived to be 'inexpensive' relative to market averages); Quality (i.e. companies that demonstrate stronger balance sheets relative to market averages); and Momentum (i.e. companies whose historical share price performance or earnings growth have exceeded market averages). The Fund holds a sub-set of these stocks, using an optimisation process that seeks to maximise exposure to those investment factors whilst targeting a risk profile that is consistent with the Fund's investment objective. The portfolio construction and optimisation process also aims to reduce the Fund's revenue based carbon emissions intensity by at least 50% compared to the Benchmark. The optimisation process also implements a self-decarbonisaton portfolio constraint, a 7% year on year reduction in the intensity of funded carbon emissions. Fund holdings are rebalanced monthly. The "quantitative investment model" uses mathematical, logical and statistical techniques for stock selection purposes.
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund is an Article 8 Fund (it promotes environmental and/or social characteristics) for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("**SFDR**").
- The Fund may use derivative instruments for the purposes of managing risk, reducing costs or generating additional capital or income.
- The Fund's base currency is USD. The portfolio-hedged Share Class currency is EUR. To minimise exposure to fluctuations in the exchange rate between the portfolio-hedged Share Class' currency and the base currencies of the Fund's underlying holdings, the portfolio-hedged Share Class enters into foreign exchange transactions (typically FX forwards).

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.

Other Risks

- **General Investment Risk:** The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.
- **Currency hedging Risk:** Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.
- **Currency Risk:** The Fund's performance may be adversely affected by variations in the exchange rates between the base currency of the Fund and the currencies to which the Fund is exposed.
- **Equity Risk:** The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.
- **Environmental, Social and Governance Risk:** The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.
- **Securities Lending Risk:** The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.
