Invesco S&P 500 CTB Net Zero Pathway ESG UCITS ETF (the "Fund") A sub-fund of Invesco Markets II plc (the "Umbrella Fund") Acc (ISIN: IE000N1ZEIG9) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The Fund is a passively-managed Exchange-Traded Fund. The objective of the Fund is to provide exposure to large capitalisation listed US companies, whilst seeking to reduce exposure to risks arising from a transition to a lower carbon economy by tracking an index that adheres to the standards for EU Climate Transition Benchmarks as based on the commitments laid down in the Paris Agreement.
- In order to achieve the investment objective, the Fund will seek to replicate the net total return performance of the S&P 500 CTB Base Pathway-Aligned ESG Index (the "**Index**")¹, less fees, expenses and transaction costs. The Fund will as far as possible and practicable, replicate the Index by holding all the securities in the Index in a similar proportion to their respective weightings in the Index.
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances other investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund is an Article 8 Fund for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector ("**SFDR**").
- The Fund's base currency is USD.
- **Dividend Policy:** This Share Class does not pay you income, but instead reinvests it to grow your capital, in line with its stated objectives.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Index:** The Index tracks the performance of large capitalisation listed US companies, selected and weighted to be collectively compatible with the transition to a low-carbon and climate resilient economy. The Index is constructed from the S&P 500 Index (the "**Parent Index**") by using the Index Provider's exclusionary criteria to exclude from the Parent Index securities that: 1) are involved (as defined by the Index Provider) in the following business activities: tobacco, controversial weapons, oil sands, small arms, military contracting and thermal coal; 2) are classified as Non-Compliant according to the United Nations Global Compact (UNGC) principles; and 3) are not covered by the ESG data solution used by the Index Provider. The Index then applies an optimisation approach to re-weight remaining eligible securities with a view to minimise the difference in constituent weights, sector weights and industry weights to the Parent index, while achieving: 1) alignment with the minimum standards for EU Climate Transition Benchmarks; 2) alignment to a 1.5°C climate scenario using the Index Provider's selected Transition Pathway Model; and 3) an increase in the weighted average S&P Global ESG Score such that this exceeds the corresponding score of the Parent Index after 20% of the lowest ESG scoring stocks are removed. The above optimisation is subject to diversification constraints, the details of which can be found in the Index methodology. The Index rebalances quarterly.

Other Risks

- **General Investment Risk:** The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.
- **Concentration Risk:** The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified.
- **Equity Risk:** The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.
- **Environmental, Social and Governance Risk:** The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.
- **Securities Lending Risk:** The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.
