

Andrew Waisburd, PhD

Head of Invesco Indexing

Andrew Waisburd, PhD

Andrew Waisburd is the Head of Invesco Indexing. In this role, Mr. Waisburd is responsible for Invesco's dedicated index business that develops and manages custom indexes for internal and external clients. Launched in 2017, Invesco Indexing brings differentiated index products to our clients through a broad range of investment channels.

Prior to his current role, Mr. Waisburd was global head of the Invesco Quantitative Strategies (IQS) Portfolio Management team. In that role, he led a global team managing a broad range of systematically driven strategies. Before that, he was director of research for IQS, leading the US team in developing quantitative models driving the IQS systematic strategies.

Prior to joining Invesco in 2008, Mr. Waisburd worked with Archipelago (now NYSE-ARCA) as director of research, and with Harris Investment Management as a senior quantitative analyst. Before entering the investment industry, he was an assistant professor of finance at Texas Christian University.

Mr. Waisburd earned a BS degree in statistics from Cornell University, as well as an MS and a PhD in finance from Indiana University.
