Biography

Robert B. Waldner, Jr., CFA®

Chief Strategist and Head of Macro Research

Robert B. Waldner, Jr., CFA®

Rob Waldner is Chief Strategist and Head of Macro Research for Invesco Fixed Income (IFI). In this role, he chairs the IFI Investment Strategy team (IST) and is responsible for oversight of the overall IFI investment process. Mr. Waldner oversees portfolio risk monitoring and review for IFI portfolios.

Mr. Waldner joined Invesco in 2013. Prior to joining the firm, he worked with Franklin Templeton for 17 years, where he was a senior strategist and senior portfolio manager. He was the lead manager for the firm's absolute return strategies and a fixed income policy committee member. Mr. Waldner was instrumental in launching a number of new strategies on the Franklin Templeton fixed income platform. Previously, he was a member of the macro team at Omega Advisors and a portfolio manager with Glaxo (Bermuda) Ltd. Mr. Waldner entered the industry in 1986.

Mr. Waldner earned a BSE degree, magna cum laude, in civil engineering from Princeton University. He is a Chartered Financial Analyst® (CFA) charterholder.

Invesco Distributors, Inc. and Invesco Advisers, Inc. are indirect, wholly owned subsidiaries of Invesco Ltd.

Factor investing is an investment strategy in which securities are chosen based on certain characteristics and attributes that may explain differences in returns. There can be no assurance that performance will be enhanced or risk will be reduced for funds that seek to provide exposure to certain factors. Exposure to such investment factors may detract from performance in some market environments, perhaps for extended periods. Factor investing may underperform cap-weighted benchmarks and increase portfolio risk.

Beta is a measure of risk representing how a security is expected to respond to general market movements. Smart beta represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.
