PowerShares DB G10 Currency Harvest Fund

Notes to Unaudited Financial Statements

March 31, 2016

(1) Background

On October 24, 2014, DB Commodity Services LLC, a Delaware limited liability company (“DBCS”), DB U.S. Financial Markets Holding Corporation (“DBUSH”) and Invesco PowerShares Capital Management LLC (“Invesco”) entered into an Asset Purchase Agreement (the “Agreement”). DBCS is a wholly-owned subsidiary of DBUSH. DBCS agreed to transfer and sell to Invesco all of DBCS’ interest in the PowerShares DB G10 Currency Harvest Fund (the “Fund”), including the sole and exclusive power to direct the business and affairs of the Fund, as well as certain other assets pertaining to the management of the Fund, pursuant to the terms and conditions of the Agreement (the “Transaction”).

The Transaction was consummated on February 23, 2015 (the “Closing Date”). Invesco now serves as the managing owner (the “Managing Owner”), commodity pool operator and commodity trading advisor of the Fund, in replacement of DBCS (the “Predecessor Managing Owner”).

(2) Organization

The Fund was formed as a Delaware statutory trust on April 12, 2006. The Predecessor Managing Owner seeded the Fund with a capital contribution of \$1,000 in exchange for 40 General Shares of the Fund. The General Shares were sold to the Managing Owner by the Predecessor Managing Owner pursuant to the terms of the Agreement. The fiscal year end of the Fund is December 31st. The term of the Fund is perpetual (unless terminated earlier in certain circumstances) as provided for in the Fifth Amended and Restated Declaration of Trust and Trust Agreement of the Fund (the “Trust Agreement”). The Fund has an unlimited number of shares authorized for issuance.

The Fund offers common units of beneficial interest (the “Shares”) only to certain eligible financial institutions (the “Authorized Participants”) in one or more blocks of 200,000 Shares, called a Basket. The Fund commenced investment operations on September 15, 2006. The Fund commenced trading on the American Stock Exchange (which became the NYSE Alternext US LLC (the “NYSE Alternext”)) on September 18, 2006 and is now listed on the NYSE Arca, Inc. (the “NYSE Arca”) as of November 25, 2008.

This Quarterly Report (the “Report”) covers the three months ended March 31, 2016 and 2015 (hereinafter referred to as the “Three Months Ended March 31, 2016” and the “Three Months Ended March 31, 2015”, respectively). The Fund’s performance information from inception up to and excluding the Closing Date is a reflection of the performance associated with the Predecessor Managing Owner. The Managing Owner has served as managing owner of the Fund since the Closing Date, and the Fund’s performance information since the Closing Date is a reflection of the performance associated with the Managing Owner. Past performance of the Fund is not necessarily indicative of future performance.

The accompanying unaudited financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information and with the instructions for Form 10-Q and the rules and regulations of the U.S. Securities and Exchange Commission (the “SEC”). In the opinion of management, all material adjustments, consisting only of normal recurring adjustments, considered necessary for a fair statement of the interim period financial statements have been made. Interim period results are not necessarily indicative of results for a full-year period. These financial statements and the notes thereto should be read in conjunction with the Fund’s financial statements included in its Annual Report on Form 10-K for the year ended December 31, 2015 as filed with the SEC on February 29, 2016.

(3) Fund Investment Overview

The Fund invests the proceeds from the offering of Shares in exchange-traded currency futures comprising the Deutsche Bank G10 Currency Future Harvest Index–Excess Return™, (the “Index”), with a view to tracking changes, whether positive or negative, in the level of the Index calculated on an excess return basis, over time, plus the excess, if any, of the Fund’s income from its holdings of United States Treasury Obligations over the expenses of the Fund. The Fund holds United States Treasury Obligations on deposit with the Custodian (as defined below) and with the Commodity Broker (as defined below) as maintenance margin.

The Index is designed to reflect the performance of certain currencies. The currencies comprising the Index, at any time (each an “Index Currency”, and collectively, the “Index Currencies”), are six of the following Group of Ten currencies: United States Dollars, Euros, Japanese Yen, Canadian Dollars, Swiss Francs, British Pounds, Australian Dollars, New Zealand Dollars, Norwegian Krone

and Swedish Krona, or, collectively, the Eligible Index Currencies. At any time, the Index will consist of long futures contracts on the three Eligible Index Currencies associated with the highest interest rates and short futures contracts on the three Eligible Index Currencies associated with the lowest interest rates. The ratio of the notional value of futures contracts in the Index to collateral used to margin those contracts is approximately 2:1 when the Index re-balances quarterly. However, if the United States Dollar is one of the Eligible Index Currencies associated with either the three highest or the three lowest interest rates, the Index will not establish a futures position, and the ratio of the notional value of futures contracts to collateral used to margin those contracts will be approximately 1.66:1 when the Index re-balances. The Fund has in the past invested at the quarterly re-balance in excess of the targeted 2:1 ratio of aggregate notional value of futures to collateral used to margin those contracts.

(4) Service Providers and Related Party Agreements

The Trustee

Under the Trust Agreement, Wilmington Trust Company, the trustee of the Fund (the “Trustee”), has delegated to the Managing Owner the exclusive management and control of all aspects of the business of the Fund. The Trustee will have no duty or liability to supervise or monitor the performance of the Managing Owner, nor will the Trustee have any liability for the acts or omissions of the Managing Owner.

The Managing Owner

The Managing Owner serves as the Fund’s commodity pool operator, commodity trading advisor and managing owner. The Fund pays the Managing Owner a management fee, monthly in arrears, in an amount equal to 0.75% per annum of the daily net asset value of the Fund (the “Management Fee”). From inception up to and excluding the Closing Date, all Management Fees were payable to the Predecessor Managing Owner. The Managing Owner has served as managing owner of the Fund since the Closing Date and all Management Fee accruals since the Closing Date have been paid to the Managing Owner.

The Commodity Broker

Deutsche Bank Securities Inc., a Delaware corporation, serves as the Fund’s clearing broker (the “Commodity Broker”). The Commodity Broker is an indirect wholly-owned subsidiary of Deutsche Bank AG and is an affiliate of the Predecessor Managing Owner. A variety of executing brokers execute futures transactions on behalf of the Fund. Such executing brokers give-up all such transactions to the Commodity Broker. In its capacity as clearing broker, the Commodity Broker may execute or receive transactions executed by others and clears all the Fund’s futures transactions and performs certain administrative and custodial services for the Fund. The Commodity Broker is responsible, among other things, for providing periodic accountings of all dealings and actions taken by the Fund during the reporting period, together with an accounting of all securities, cash or other indebtedness or obligations held by it or its nominees for or on behalf of the Fund.

The Administrator, Custodian and Transfer Agent

The Bank of New York Mellon (the “Administrator” and “Custodian”) is the administrator, custodian and transfer agent of the Fund. The Fund and the Administrator have entered into separate administrative, custodian, transfer agency and service agreements (collectively referred to as the “Administration Agreement”).

Pursuant to the Administration Agreement, the Administrator performs or supervises the performance of services necessary for the operation and administration of the Fund (other than making investment decisions), including receiving and processing orders from Authorized Participants to create and redeem Baskets, net asset value calculations, accounting and other fund administrative services. The Administrator maintains certain financial books and records, including: Basket creation and redemption books and records, fund accounting records, ledgers with respect to assets, liabilities, capital, income and expenses, the registrar, transfer journals and related details, and trading and related documents received from the Commodity Broker. The Managing Owner pays the Administrator fees for its services out of the Management Fee.

As of December 31, 2014, the Fund held \$2,885,535 of cash and \$82,998,633 of United States Treasury Obligations at the Commodity Broker. In conjunction with the Transaction, during the three-day period from February 24, 2015 to February 26, 2015, the Fund transferred \$3,000,000 of cash and \$49,999,400 of United States Treasury Obligations from the Commodity Broker to the Custodian. The Fund’s open positions of currency futures contracts remained with the Commodity Broker as well as \$20,000,000 of United States Treasury Obligations to satisfy maintenance margin requirements and \$646,429 of cash to satisfy variation margin requirements for open currency futures contracts. Effective February 26, 2015, the Managing Owner began transferring cash daily from the Custodian to the Commodity Broker to satisfy the previous day’s variation margin on open futures contracts.

The Distributor

ALPS Distributors, Inc. (the “Distributor”) provides certain distribution services to the Fund. Pursuant to the Distribution Services Agreement among the Managing Owner, the Fund and the Distributor, the Distributor assists the Managing Owner and the Administrator with certain functions and duties relating to distribution and marketing services to the Fund including reviewing and approving marketing materials.

The Managing Owner pays the Distributor a distribution fee out of the Management Fee.

Index Sponsor

Effective as of the Closing Date, the Managing Owner, on behalf of the Fund, has appointed Deutsche Bank Securities Inc. to serve as the index sponsor (the “Index Sponsor”). Prior to the Closing Date, the index sponsor was Deutsche Bank AG London. The Index Sponsor calculates and publishes the daily index levels and the indicative intraday index levels. Additionally, the Index Sponsor also calculates the indicative value per Share of the Fund throughout each business day.

The Managing Owner pays the Index Sponsor a licensing fee and an index services fee out of the Management Fee for performing its duties.

Marketing Agent

Effective as of the Closing Date, the Managing Owner, on behalf of the Fund, has appointed Deutsche Bank Securities Inc. as the marketing agent (the “Marketing Agent”) to assist the Managing Owner by providing support to educate institutional investors about the DBIQ indices and to complete governmental or institutional due diligence questionnaires or requests for proposals related to the DBIQ indices.

The Managing Owner pays the Marketing Agent a marketing services fee out of the Management Fee.

The Marketing Agent will not open or maintain customer accounts or handle orders for the Fund. The Marketing Agent has no responsibility for the performance of the Fund or the decisions made or actions taken by the Managing Owner.

(5) Summary of Significant Accounting Policies

(a) Basis of Presentation

The financial statements of the Fund have been prepared using U.S. generally accepted accounting principles (“U.S. GAAP”).

The Fund has determined that it meets the definition of an investment company and has prepared the financial statements in conformity with U.S. GAAP for investment companies in conformity with accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 – *Investment Companies*.

(b) Use of Estimates

The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities during the reporting period of the financial statements and accompanying notes. Actual results could differ from those estimates.

(c) Financial Instruments and Fair Value

United States Treasury Obligations and currency futures contracts are recorded in the Statements of Financial Condition on a trade date basis at fair value with changes in fair value recognized in earnings in each period. U.S. GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, under current market conditions.

U.S. GAAP establishes a hierarchy that prioritizes the inputs to valuation methods, giving the highest priority to readily available unadjusted quoted prices in an active market for identical assets (Level 1) and the lowest priority to significant unobservable inputs (Level 3), generally when market prices are not readily available or are unreliable. Based on the valuation inputs, the securities

or other investments are tiered into one of three levels. Changes in valuation methods or market conditions may result in transfers in or out of an investment's assigned level:

Level 1—Prices are determined using quoted prices in an active market for identical assets.

Level 2—Prices are determined using other significant observable inputs. Observable inputs are inputs that other market participants may use in pricing a security. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk, yield curves, loss severities, default rates, discount rates, volatilities and others.

Level 3—Prices are determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Fund's own assumptions about the factors market participants would use in determining fair value of the securities or instruments and would be based on the best available information.

United States Treasury Obligations are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes provided by the pricing service may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as developments related to specific securities, yield, quality, type of issue, coupon rate, maturity, individual trading characteristics and other market data. All debt obligations involve some risk of default with respect to interest and/or principal payments.

Futures contracts are valued at the final settlement price set by an exchange on which they are principally traded.

When market closing prices are not available, the Managing Owner may value an asset of the Fund pursuant to policies the Managing Owner has adopted, which are consistent with normal industry standards.

The levels assigned to the securities valuations may not be an indication of the risk or liquidity associated with investing in those securities. Because of the inherent uncertainties of valuation, the values reflected in the financial statements may materially differ from the value received upon actual sale of those investments.

The following is a summary of the tiered valuation input levels as of March 31, 2016:

	Level 1	Level 2	Level 3	Total
United States Treasury Obligations	\$ —	\$80,990,774	\$ —	\$80,990,774
Currency Futures Contracts ^(a)	\$ (54,425)	\$ —	\$ —	\$ (54,425)

^(a) Unrealized appreciation (depreciation).

The following is a summary of the tiered valuation input levels as of December 31, 2015:

	Level 1	Level 2	Level 3	Total
United States Treasury Obligations	\$ —	\$83,494,432	\$ —	\$83,494,432
Currency Futures Contracts ^(a)	\$ 1,412,658	\$ —	\$ —	\$ 1,412,658

^(a) Unrealized appreciation (depreciation).

(d) Deposits with Commodity Broker

The Fund deposits cash and United States Treasury Obligations with its Commodity Broker subject to Commodity Futures Trading Commission (the "CFTC") regulations and various exchange and broker requirements. The combination of the Fund's deposits with its Commodity Broker of cash and United States Treasury Obligations and the unrealized profit or loss on open futures contracts represents the Fund's overall equity in its broker trading account. To meet the Fund's maintenance margin requirements, the Fund holds United States Treasury Obligations. The Fund transfers cash to the Commodity Broker to satisfy variation margin requirements. The Fund earns interest on any excess cash deposited with the Commodity Broker and incurs interest expense on any deficit balance with the Commodity Broker.

(e) Investment Transactions and Investment Income

Investment transactions are accounted for on a trade date basis. Realized gains (losses) from the sale or disposition of securities or derivatives are determined on a specific identification basis and recognized in the Statements of Income and Expenses in the period in which the contract is closed or the sale or disposition occurs, respectively.

Interest income on United States Treasury Obligations is recognized on an accrual basis when earned. Premiums and discounts are amortized or accreted over the life of the United States Treasury Obligations.

(f) Receivable/(Payable) for Shares Issued and Redeemed

On any business day, an Authorized Participant may place an order to create or redeem Shares of the Fund. Cash settlement occurs at the creation order settlement date or the redemption order settlement date as discussed in Note 7.

(g) Cash Held by Commodity Broker

The Fund's arrangement with the Commodity Broker requires the Fund to meet its variation margin requirement related to the price movements on futures contracts held by the Fund by maintaining cash on deposit with the Commodity Broker. The Fund assesses its variation margin requirements on a daily basis by recalculating the change in value of the futures contracts based on price movements. Subsequent cash payments are made or received by the Fund each business day depending upon whether unrealized gains or losses are incurred on the futures contracts. Effective February 24, 2015, only the current day's variation margin receivable or payable is disclosed as an asset or liability on the Statement of Financial Condition.

The Fund defines cash and cash equivalents to be highly liquid investments with original maturities of three months or less, when purchased. There were no cash equivalents held by the Fund as of March 31, 2016 and December 31, 2015.

(h) Income Taxes

The Fund is classified as a partnership for U.S. federal income tax purposes. Accordingly, the Fund will generally not incur U.S. federal income taxes. No provision for federal, state, and local taxes has been made in the accompanying financial statements, as investors are individually liable for income taxes, if any, on their allocable share of the Fund's income, gain, loss, deductions and other items.

The Managing Owner has reviewed all of the Fund's open tax years and major jurisdictions and concluded that there is no tax liability resulting from unrecognized tax benefits relating to uncertain tax positions taken or expected to be taken in future tax returns. The Fund is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. On an ongoing basis, the Managing Owner will monitor the Fund's tax positions taken under the interpretation (and consult with its tax counsel from time to time when appropriate) to determine if adjustments to conclusions are necessary based on factors including, but not limited to, on-going analysis of tax law, regulation, and interpretations thereof. The major tax jurisdiction for the Fund and the earliest tax year subject to examination: United States, 2012.

(i) Currency Futures Contracts

The Fund utilizes derivative instruments to achieve its investment objective. A futures contract is an agreement between counterparties to purchase or sell a specified underlying security or index for a specified price at a future date. All of the Fund's currency futures contracts are held and used for trading purposes. During the period the futures contracts are open, changes in the value of the contracts are recognized as unrealized gains or losses by recalculating the value of the contracts on a daily basis. Subsequent or variation margin payments are received or made depending upon whether unrealized gains or losses are incurred. These amounts are reflected as a receivable or payable on the Statements of Financial Condition. When the contracts are closed or expire, the Fund recognizes a realized gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the Fund's basis in the contract. Realized gains (losses) and changes in unrealized appreciation (depreciation) on open positions are determined on a specific identification basis and recognized in the Statements of Income and Expenses in the period in which the contract is closed or the changes occur, respectively.

The Fair Value of Derivative Instruments is as follows:

Risk Exposure/Derivative Type ^(a)	March 31, 2016		December 31, 2015	
	Assets	Liabilities	Assets	Liabilities
Currency risk:				
Currency Futures Contracts	\$ 2,420,310	\$(2,474,735)	\$ 2,075,716	\$ (663,058)

^(a) Includes cumulative appreciation (depreciation) of currency futures contracts. Only current day's variation margin receivable (payable) is reported in the March 31, 2016 and December 31, 2015 Statements of Financial Condition.

The Effect of Derivative Instruments on the Statements of Income and Expenses is as follows:

Risk Exposure/Derivative Type	Location of Gain or (Loss) on Derivatives Recognized in Income	For the Three Months Ended March 31,	
		2016	2015
Currency risk			
Currency Futures Contracts	Net Realized Gain (Loss)	\$ 2,221,916	\$ (1,031,207)
	Net Change in Unrealized Gain (Loss)	(1,467,083)	(1,672,188)
Total		\$ 754,833	\$ (2,703,395)

The table below summarizes the average monthly notional value of futures contracts outstanding during the period:

	For the Three Months Ended March 31,	
	2016	2015
Average Notional Value - Short	\$(86,216,177)	\$(96,042,371)
Average Notional Value - Long	\$ 86,695,318	\$ 95,197,728

The brokerage agreement with the Commodity Broker provides for the net settlement of all financial instruments covered by the agreement in the event of default or termination of any one contract. The Managing Owner will utilize any excess cash held at the Commodity Broker to offset any realized losses incurred in the currency futures contracts, if available. To the extent that any excess cash held at the Commodity Broker is not adequate to cover any realized losses, a portion of the United States Treasury Obligations on deposit with the Commodity Broker will be sold to make additional cash available. For financial reporting purposes, the Fund offsets financial assets and financial liabilities that are subject to netting arrangements. In order for an arrangement to be eligible for netting, the Fund must have a basis to conclude that such netting arrangements are legally enforceable. The following table presents derivative instruments that are either subject to an enforceable netting agreement or offset by collateral arrangements as of March 31, 2016, net by contract:

	Gross Amounts Recognized	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts Presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		
				Financial Instruments ^(a)	Cash Collateral Pledged ^(a)	Net Amount
Assets						
Currency Futures Contracts	\$ 2,420,310	\$ (2,420,310)	\$ —	\$ —	\$ —	\$ —
Liabilities						
Currency Futures Contracts	\$ (2,639,103)	\$ 2,420,310	\$ (218,793)	\$ 218,793	\$ —	\$ —

The following table presents derivative instruments that are either subject to an enforceable netting agreement or offset by collateral arrangements as of December 31, 2015, net by contract:

	Gross Amounts Recognized	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts Presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition	Financial Instruments ^(a)	Cash Collateral Pledged ^(a)	Net Amount
Assets							
Currency Futures Contracts	\$ 2,076,093	\$ (1,660,638)	\$ 415,455	\$ —	\$ —	\$ —	\$ 415,455
Liabilities							
Currency Futures Contracts	\$ (1,660,638)	\$ 1,660,638	\$ —	\$ —	\$ —	\$ —	\$ —

^(a) As of March 31, 2016 and December 31, 2015, a portion of the Fund's U.S. Treasury Obligations were required to be deposited as maintenance margin in support of the Fund's futures positions.

(j) Brokerage Commissions and Fees

The Fund incurs all brokerage commissions, including applicable exchange fees, National Futures Association ("NFA") fees, give-up fees, pit brokerage fees and other transaction related fees and expenses charged in connection with trading activities by the Commodity Broker. These costs are recorded as Brokerage Commissions and Fees in the Statements of Income and Expenses. The Commodity Broker's brokerage commissions and trading fees are determined on a contract-by-contract basis. On average, total charges paid to the Commodity Broker were less than \$6.00 and \$6.00 per round-turn trade during the Three Months Ended March 31, 2016 and 2015, respectively.

(k) Routine Operational, Administrative and Other Ordinary Expenses

After the Closing Date, the Managing Owner assumed all routine operational, administrative and other ordinary expenses of the Fund, including, but not limited to, computer services, the fees and expenses of the Trustee, legal and accounting fees and expenses, tax preparation expenses, filing fees and printing, mailing and duplication costs. Prior to the Closing Date, the Predecessor Managing Owner assumed all routine operational, administrative and other ordinary expenses of the Fund. Accordingly, such expenses are not reflected in the Statements of Income and Expenses of the Fund.

(l) Non-Recurring Fees and Expenses

The Fund pays all non-recurring and unusual fees and expenses (referred to as extraordinary fees and expenses in the Trust Agreement), if any, of itself, as determined by the Managing Owner. Non-recurring and unusual fees and expenses are fees and expenses which are non-recurring and unusual in nature, such as legal claims and liabilities, litigation costs or indemnification or other unanticipated expenses. Such non-recurring and unusual fees and expenses, by their nature, are unpredictable in terms of timing and amount. For the Three Months Ended March 31, 2016 and 2015, the Fund did not incur such expenses.

(6) Financial Instrument Risk

In the normal course of its business, the Fund is a party to financial instruments with off-balance sheet risk. The term "off-balance sheet risk" refers to an unrecorded potential liability that, even though it does not appear on the balance sheet, may result in a future obligation or loss in excess of the amounts shown in the Statements of Financial Condition. The financial instruments used by the Fund are currency futures, whose values are based upon an underlying asset and generally represent future commitments that have a reasonable possibility of being settled in cash or through physical delivery. The financial instruments are traded on an exchange and are standardized contracts.

Market risk is the potential for changes in the value of the financial instruments traded by the Fund due to market changes, including fluctuations in currency prices. In entering into these futures contracts, there exists a market risk that such futures contracts may be significantly influenced by adverse market conditions, resulting in such futures contracts being less valuable. If the markets should move against all of the futures contracts at the same time, the Fund could experience substantial losses.

Credit risk is the possibility that a loss may occur due to the failure of the Commodity Broker and/or clearinghouse to perform according to the terms of a futures contract. Credit risk with respect to exchange-traded instruments is reduced to the extent that an exchange or clearing organization acts as a counterparty to the transactions. The Commodity Broker, when acting as the Fund's futures commission merchant in accepting orders for the purchase or sale of domestic futures contracts, is required by CFTC

regulations to separately account for and segregate as belonging to the Fund all assets of the Fund relating to domestic futures trading and the Commodity Broker is not allowed to commingle such assets with other assets of the Commodity Broker. In addition, CFTC regulations also require the Commodity Broker to hold in a secure account assets of the Fund related to foreign futures trading. The Fund's risk of loss in the event of counterparty default is typically limited to the amounts recognized in the Statements of Financial Condition and not represented by the futures contract or notional amounts of the instruments.

The Fund has not utilized, nor does it expect to utilize in the future, special purpose entities to facilitate off-balance sheet financing arrangements and has no loan guarantee arrangements or off-balance sheet arrangements of any kind, other than agreements entered into in the normal course of business noted above.

(7) Share Purchases and Redemptions

(a) Purchases

On any business day, an Authorized Participant may place an order with the Administrator who serves as the Fund's transfer agent ("Transfer Agent") to create one or more Baskets. For purposes of processing both creation and redemption orders, a "business day" means any day other than a day when banks in New York City are required or permitted to be closed. Creation orders must be placed by 1:00 p.m., Eastern Time. The day on which the Transfer Agent receives a valid creation order is the creation order date. The day on which a creation order is settled is the creation order settlement date. As provided below, the creation order settlement date may occur up to three business days after the creation order date. By placing a creation order, and prior to delivery of such Baskets, an Authorized Participant's DTC account is charged the non-refundable transaction fee due for the creation order.

Unless otherwise agreed to by the Managing Owner and the Authorized Participant as provided in the next sentence, Baskets are issued on the creation order settlement date as of 2:45 p.m., Eastern Time, on the business day immediately following the creation order date at the applicable net asset value per Share as of the closing time of the NYSE Arca or the last to close of the exchanges on which its futures contracts are traded, whichever is later, on the creation order date, but only if the required payment has been timely received. Upon submission of a creation order, the Authorized Participant may request the Managing Owner to agree to a creation order settlement date up to three business days after the creation order date.

Creation orders may be placed either (i) through the Continuous Net Settlement ("CNS") clearing processes of the National Securities Clearing Corporation (the "NSCC") (the "CNS Clearing Process") or (ii) if outside the CNS Clearing Process, only through the facilities of The Depository Trust Company ("DTC" or the "Depository") (the "DTC Process"), or a successor depository.

(b) Redemptions

On any business day, an Authorized Participant may place an order with the Transfer Agent to redeem one or more Baskets. Redemption orders must be placed by 1:00 p.m., Eastern Time. The day on which the Managing Owner receives a valid redemption order is the redemption order date. The day on which a redemption order is settled is the redemption order settlement date. As provided below, the redemption order settlement date may occur up to three business days after the redemption order date. The redemption procedures allow Authorized Participants to redeem Baskets. Individual Shareholders may not redeem directly from the Fund. Instead, individual Shareholders may only redeem Shares in integral multiples of 200,000 and only through an Authorized Participant.

Unless otherwise agreed to by the Managing Owner and the Authorized Participant as provided in the next sentence, by placing a redemption order, an Authorized Participant agrees to deliver the Baskets to be redeemed through DTC's book-entry system to the Fund not later than the redemption order settlement date as of 2:45 p.m., Eastern Time, on the business day immediately following the redemption order date. Upon submission of a redemption order, the Authorized Participant may request the Managing Owner to agree to a redemption order settlement date up to three business days after the redemption order date. By placing a redemption order, and prior to receipt of the redemption proceeds, an Authorized Participant's DTC account is charged the non-refundable transaction fee due for the redemption order.

Redemption orders may be placed either (i) through the CNS Clearing Process or (ii) if outside the CNS Clearing Process, only through the DTC Process, or a successor depository, and only in exchange for cash.

The redemption proceeds from the Fund consist of the cash redemption amount. The cash redemption amount is equal to the net asset value of the number of Basket(s) requested in the Authorized Participant's redemption order as of the closing time of the NYSE Arca or the last to close of the exchanges on which the Fund's futures contracts are traded, whichever is later, on the redemption order date. The Managing Owner will distribute the cash redemption amount at the redemption order settlement date as of 2:45 p.m., Eastern

Time, on the redemption order settlement date through DTC to the account of the Authorized Participant as recorded on DTC's book-entry system.

The redemption proceeds due from the Fund are delivered to the Authorized Participant at 2:45 p.m., Eastern Time, on the redemption order settlement date if, by such time, the Fund's DTC account has been credited with the Baskets to be redeemed. If the Fund's DTC account has not been credited with all of the Baskets to be redeemed by such time, the redemption distribution is delivered to the extent of whole Baskets received. Any remainder of the redemption distribution is delivered on the next business day to the extent of remaining whole Baskets received if the Transfer Agent receives the fee applicable to the extension of the redemption distribution date which the Managing Owner may, from time-to-time, determine and the remaining Baskets to be redeemed are credited to the Fund's DTC account by 2:45 p.m., Eastern Time, on such next business day. Any further outstanding amount of the redemption order will be cancelled. The Managing Owner is also authorized to deliver the redemption distribution notwithstanding that the Baskets to be redeemed are not credited to the Fund's DTC account by 2:45 p.m., Eastern Time, on the redemption order settlement date if the Authorized Participant has collateralized its obligation to deliver the Baskets through DTC's book-entry system on such terms as the Managing Owner may determine from time-to-time.

(8) Profit and Loss Allocations and Distributions

Pursuant to the Trust Agreement, income and expenses are allocated *pro rata* to the Managing Owner as holder of the General Shares and to the Shareholders monthly based on their respective percentage interests as of the close of the last trading day of the preceding month. Distributions (other than redemption of units) may be made at the sole discretion of the Managing Owner on a *pro rata* basis in accordance with the respective capital balances of the shareholders.

No distributions were paid for the Three Months Ended March 31, 2016 and 2015.

(9) Commitments and Contingencies

The Managing Owner, either in its own capacity or in its capacity as the Managing Owner and on behalf of the Fund, has entered into various service agreements that contain a variety of representations, or provide indemnification provisions related to certain risks service providers undertake in performing services which are in the best interests of the Fund. As of March 31, 2016 and December 31, 2015, no claims had been received by the Fund. Further, the Fund has not had prior claims or losses pursuant to these contracts. Accordingly, the Managing Owner expects the risk of loss to be remote.

(10) Net Asset Value and Financial Highlights

The Fund is presenting the following net asset value and financial highlights related to investment performance for a Share outstanding for the Three Months Ended March 31, 2016 and 2015. An individual investor's return and ratios may vary based on the timing of capital transactions.

Net asset value per Share is the net asset value of the Fund divided by the number of outstanding Shares at the date of each respective period presented.

	Three Months Ended March 31,	
	2016	2015
Net Asset Value		
Net asset value per Share, beginning of period	\$ 23.29	\$ 25.45
Net realized and change in unrealized gain (loss) on United States Treasury Obligations and Currency Futures Contracts	0.19	(0.58)
Net investment income (loss) ^(a)	(0.03)	(0.05)
Net income (loss)	0.16	(0.63)
Net asset value per Share, end of period	\$ 23.45	\$ 24.82
Market value per Share, beginning of period ^(b)	\$ 23.32	\$ 25.51
Market value per Share, end of period ^(b)	\$ 23.39	\$ 24.81
Ratio to average Net Assets*		
Net investment income (loss)	(0.59)%	(0.80)%
Total expenses	0.79%	0.82%
Total Return, at net asset value **	0.69%	(2.47)%
Total Return, at market value **	0.30%	(2.74)%

^(a) Based on average shares outstanding.

^(b) The mean between the last bid and ask prices.

* Percentages are annualized.

** Percentages are not annualized.

(11) Subsequent Events

On April 20, 2016, Invesco provided ALPS Distributors, Inc. (“ALPS”) with notice of intent to terminate the Distribution Services Agreement effective as of June 20, 2016 (the “Termination Date”). There are no termination penalties to be incurred by the Fund, the Managing Owner or ALPS in connection with the early termination of the Distribution Services Agreement.

Effective as of the Termination Date, the Managing Owner intends to engage Invesco Distributors, Inc., a registered broker-dealer and an affiliate of the Managing Owner, to provide the Fund with the services currently provided by ALPS pursuant to the Distribution Services Agreement.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

This information should be read in conjunction with the financial statements and notes included in Item 1 of Part I of this Quarterly Report (the "Report"). The discussion and analysis which follows may contain trend analysis and other forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), which reflect our current views with respect to future events and financial results. The matters discussed throughout this Report that are not historical facts are forward-looking statements. These forward-looking statements are based on the registrant's current expectations, estimates and projections about the registrant's business and industry and its beliefs and assumptions about future events. Words such as "anticipate," "expect," "intend," "plan," "believe," "seek," "outlook" and "estimate," as well as similar words and phrases, signify forward-looking statements. PowerShares DB G10 Currency Harvest Fund's (the "Fund") forward-looking statements are not guarantees of future results and conditions and important factors, risks and uncertainties may cause our actual results to differ materially from those expressed in our forward-looking statements.

You should not place undue reliance on any forward-looking statements. Except as expressly required by the Federal securities laws, Invesco PowerShares Capital Management LLC ("Invesco"), undertakes no obligation to publicly update or revise any forward-looking statements or the risks, uncertainties or other factors described in this Report, as a result of new information, future events or changed circumstances or for any other reason after the date of this Report.

Overview/Introduction

PowerShares DB G10 Currency Harvest Fund (the "Fund") seeks to track changes, whether positive or negative, in the level of the Deutsche Bank G10 Currency Future Harvest Index–Excess Return™ (the "Index") over time, plus the excess, if any, of the Fund's interest income from its holdings of United States Treasury Obligations over the expenses of the Fund. The Index is designed to reflect the return from investing on a 2:1 leveraged basis in long currency futures positions for certain currencies associated with relatively high yielding interest rates and in short currency futures positions for certain currencies associated with relatively low yielding interest rates.

As of the date of this Report, each of Deutsche Bank Securities Inc., Merrill Lynch Professional Clearing Corp., Virtu Financial Capital Markets LLC, Citigroup Global Markets Inc., J.P. Morgan Securities Inc., Credit Suisse Securities (USA) LLC, Virtu Financial BD LLC, Knight Capital Americas LLC, Timber Hill LLC, Morgan Stanley & Co. LLC, Jefferies & Company Inc., Nomura Securities International Inc., RBC Capital Markets, LLC, UBS Securities LLC, Cantor Fitzgerald & Co., BNP Paribas Securities Corp., Goldman, Sachs & Co., Goldman Sachs Execution & Clearing, L.P. and Citadel Securities LLC has executed a Participant Agreement and are the only Authorized Participants.

On February 23, 2015 (the "Closing Date"), Invesco completed the purchase of the assets of DB Commodity Services LLC, a Delaware limited liability company ("DBCS"), including all of its interests in the Fund and the sole and exclusive power to direct the business and affairs of the Trust and the Fund, as well as certain other assets of DBCS pertaining to the management of the Trust and the Fund, pursuant to the terms and conditions of a certain asset purchase agreement (the "Transaction"). Invesco now serves as the managing owner (the "Managing Owner"), commodity pool operator and commodity trading advisor of the Trust and the Fund, in replacement of DBCS (the "Predecessor Managing Owner").

The Index is designed to exploit the trend that currencies associated with relatively high interest rates, on average, tend to rise in value relative to currencies associated with relatively low interest rates. This trend is consistent with economic theory regarding the correct price of a currency future, known as the *Interest Rate Parity* formula or the *Covered Interest Arbitrage* formula, and can be seen in the historical trading patterns of currency futures.

Effective as of the Closing Date, the Managing Owner, on behalf of the Fund, appointed Deutsche Bank Securities Inc. to serve as the index sponsor (the "Index Sponsor"). Prior to the Closing Date, the index sponsor was Deutsche Bank AG London. The Index Sponsor calculates and publishes the daily index levels and the indicative intraday index levels. Additionally, the Index Sponsor also calculates the indicative value per Share of the Fund throughout each business day. The Index Sponsor may subcontract its services from time-to-time to one or more third parties.

The Fund is an index tracking fund and does not utilize any trading system, whether discretionary, systematic or otherwise. The Index is a mathematical construct that is comprised of the Index Currencies, each of which is assigned an initial weight. As the value of the underlying Index Currencies changes, the relative weights of each Index Currency will vary. The Index will be re-balanced at a pre-determined frequency in order to restore the target weights. As the Fund will invest in futures contracts tied to the underlying Index Currencies (and their corresponding target base weights) with a view to tracking the changes, whether positive or negative, in

the changes in the levels of the Index, the Managing Owner serves in an administrative role in order to ensure that the Fund invests in a manner that seeks to track the Index.

Under the Fifth Amended and Restated Declaration of Trust and Trust Agreement of the Fund (the “Trust Agreement”), Wilmington Trust Company, the trustee of the Fund, (the “Trustee”), has delegated to the Managing Owner the exclusive management and control of all aspects of the business of the Fund. The Trustee will have no duty or liability to supervise or monitor the performance of the Managing Owner, nor will the Trustee have any liability for the acts or omissions of the Managing Owner.

The Shares are intended to provide investment results that generally correspond to the changes, positive or negative, in the levels of the Index over time. The value of the Shares is expected to fluctuate in relation to changes in the value of the Fund’s portfolio. The market price of the Shares may not be identical to the net asset value per Share, but these two valuations are expected to be very close.

Index Description

The Managing Owner pays the Index Sponsor a licensing fee and an index services fee for performing its duties. These fees constitute a portion of the routine operational, administrative and other ordinary expenses which are paid out of the Management Fee and are not charged to or reimbursed by the Fund.

Neither the Managing Owner nor any affiliate of the Managing Owner has any rights to influence the selection of the futures contracts underlying the Index. Neither the Managing Owner, nor, after the Closing Date, the Fund is affiliated with the Index Sponsor. The Managing Owner has entered into a license agreement with the Index Sponsor to use the Index.

The Fund is not sponsored or endorsed by Deutsche Bank AG, Deutsche Bank Securities Inc. or any subsidiary or affiliate of Deutsche Bank AG or Deutsche Bank Securities Inc. (collectively, “Deutsche Bank”). The Deutsche Bank G10 Currency Future Harvest Index® – Excess Return (the “Index”) is the exclusive property of Deutsche Bank Securities Inc. “DBIQ” is a service mark of Deutsche Bank AG and has been licensed for use for certain purposes by Deutsche Bank Securities Inc. Neither Deutsche Bank nor any other party involved in, or related to, making or compiling the Index makes any representation or warranty, express or implied, concerning the Index, the Fund or the advisability of investing in securities generally. Neither Deutsche Bank nor any other party involved in, or related to, making or compiling the Index has any obligation to take the needs of the Managing Owner or its clients into consideration in determining, composing or calculating the Index. Neither Deutsche Bank nor any other party involved in, or related to, making or compiling the Index is responsible for or has participated in the determination of the timing of, prices at, quantities or valuation of the Fund. Neither Deutsche Bank nor any other party involved in, or related to, making or compiling the Index has any obligation or liability in connection with the administration or trading of the Fund.

NEITHER DEUTSCHE BANK NOR ANY OTHER PARTY INVOLVED IN, OR RELATED TO, MAKING OR COMPILING THE INDEX, WARRANTS OR GUARANTEES THE ACCURACY AND/OR THE COMPLETENESS OF THE INDEX OR ANY DATA INCLUDED THEREIN AND SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN. NEITHER DEUTSCHE BANK NOR ANY OTHER PARTY INVOLVED IN, OR RELATED TO, MAKING OR COMPILING THE INDEX, MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY INVESCO POWERSHARES CAPITAL MANAGEMENT LLC FROM THE USE OF THE INDEX OR ANY DATA INCLUDED THEREIN. NEITHER DEUTSCHE BANK NOR ANY OTHER PARTY INVOLVED IN, OR RELATED TO, MAKING OR COMPILING THE INDEX, MAKES ANY EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL DEUTSCHE BANK OR ANY OTHER PARTY INVOLVED IN, OR RELATED TO, MAKING OR COMPILING THE INDEX HAVE ANY LIABILITY FOR DIRECT, INDIRECT, PUNITIVE, SPECIAL, CONSEQUENTIAL OR ANY OTHER DAMAGES OR LOSSES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY THEREOF. EXCEPT AS EXPRESSLY PROVIDED TO THE CONTRARY, THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN DEUTSCHE BANK AND INVESCO POWERSHARES CAPITAL MANAGEMENT LLC.

No purchaser, seller or holder of the Shares of this Fund, or any other person or entity, should use or refer to any Deutsche Bank trade name, trademark or service mark to sponsor, endorse, market or promote this Fund without first contacting Deutsche Bank to determine whether Deutsche Bank’s permission is required. Under no circumstances may any person or entity claim any affiliation with Deutsche Bank without the written permission of Deutsche Bank.

The currencies that are eligible for inclusion in the Index are the currencies of The Group of Ten (the “G10”) countries (the “Eligible Index Currencies”), which include the following currencies:

<u>Eligible Index Currency</u>	<u>Symbol</u>
United States Dollar	USD
Euro	EUR
Japanese Yen	JPY
Canadian Dollar	CAD
Swiss Franc	CHF
British Pound	GBP
Australian Dollar	AUD
New Zealand Dollar	NZD
Norwegian Krone	NOK
Swedish Krona	SEK

The futures contracts referencing each of the Eligible Index Currencies (except USD) in which the Fund invests are currently traded on the Chicago Mercantile Exchange (the “CME”), although currency futures contracts on the Eligible Index Currencies also trade on other exchanges in the United States and the Fund may invest in such contracts.

At any time, the Index is comprised of long futures positions in the three Eligible Index Currencies associated with the highest interest rates and short futures positions in the three Eligible Index Currencies associated with the lowest interest rates. The Index’s six component currencies from time-to-time, comprised of the three long and three short futures positions (each an “Index Currency”, and collectively, the “Index Currencies”), are used to calculate the value of the Index. The composition of the Index may be adjusted in the event that the Index Sponsor is not able to calculate the closing prices of the Index Currencies.

The following table reflects the Fund and Index weights of each Index Currency as of March 31, 2016:

<u>Eligible Index Currency</u>	<u>Fund Weight (%)</u>	<u>Index Weight (%)</u>
United States Dollar	*	*
Euro	(32.71)%	(33.76)%
Japanese Yen	—	—
Canadian Dollar	—	—
Swiss Franc	(32.75)%	(33.79)%
British Pound	—	—
Australian Dollar	32.48%	33.57%
New Zealand Dollar	32.88%	33.97%
Norwegian Krone	32.67%	33.72%
Swedish Krona	(32.78)%	(33.94)%

* The United States Dollar was one of the Eligible Index Currencies (as hereinafter defined) associated with the three lowest interest rates. As a result, the Fund did not establish a futures position, and the ratio of the notional value of futures contracts to collateral used to margin those contracts will be 1.66:1 when the Fund re-balances.

Please see <http://www.invescopowershares.com> with respect to the most recently available weighted composition of the Fund and the composition of the Index.

The Fund is an index tracking fund and does not utilize any trading system, whether discretionary, systematic or otherwise. The Index is a mathematical construct that is comprised of the Index Currencies, each of which is assigned an initial weight. As the value of the underlying Index Currencies changes, the relative weights of each of the Index Currencies will vary. The Index will be re-balanced at a pre-determined frequency in order to restore the target weights. As the Fund will invest in futures contracts tied to the underlying Index Currencies (and their corresponding target base weights) with a view to tracking the changes, whether positive or negative, in the changes in the levels of the Index, the Managing Owner serves in an administrative role in order to ensure that the Fund invests in a manner that seeks to track the Index.

As discussed above, the Fund employs leverage on an approximate 2:1 basis. As of March 31, 2016 and December 31, 2015, the Fund had \$5,779,451 (or 6.82% of its total assets) and \$7,415,075 (or 8.37% of its total assets), respectively, of its holdings of cash, United States Treasury Obligations and unrealized appreciation/depreciation of futures contracts on deposit with its Commodity

Broker (as defined below). Of this, \$5,779,451 (or 6.82% of its total assets) and \$6,999,620 (or 7.90% of its total assets) was required to be deposited to satisfy maintenance margin required by the Commodity Broker for the Fund's open futures positions as of March 31, 2016 and December 31, 2015, respectively. All remaining cash and United States Treasury Obligations are on deposit with the Custodian (as defined below) (see Note 4 of the Financial Statements in Item 1). For additional information, please see the unaudited Schedules of Investments as of March 31, 2016 and December 31, 2015 for details of the Fund's portfolio holdings.

The Index Sponsor calculates the Index on both an excess return basis and a total return basis. The excess return basis calculation reflects the change in market value of the applicable underlying currency futures only. The total return basis calculation reflects the sum of the change in market value of the applicable underlying currency futures plus the return on 3-month U.S. Treasury bills. The Fund seeks to track changes, whether positive or negative, in the level of the Index calculated on an excess return basis, over time, plus the excess, if any, of the Fund's income from its holdings of United States Treasury Obligations and, if applicable, other high credit quality short-term fixed income securities over the expenses of the Fund.

The Fund will make distributions at the discretion of the Managing Owner. To the extent that the Fund's actual and projected interest income from its holdings of United States Treasury Obligations exceeds the actual and projected fees and expenses of the Fund, the Managing Owner expects periodically to make distributions of the amount of such excess. The Fund currently does not expect to make distributions with respect to its capital gains. Depending on the Fund's performance for the taxable year and an investor's own tax situation for such year, an investor's income tax liability for the taxable year and allocable share of the Fund's net ordinary income or loss and capital gain or loss may exceed any distributions an investor may receive with respect to such year.

In order to determine which Eligible Index Currencies to include in the Index from time-to-time, the Index Sponsor will review the composition of the Index on a quarterly basis five business days prior to the IMM Date. "IMM Date" means the third Wednesday of March, June, September and December, a traditional settlement date in the International Money Market.

The Index Sponsor will review the three month Libor rate for each Eligible Index Currency other than the SEK and NOK and will review the three month Stibor rate and the three month Nibor rate for the SEK and NOK, respectively. The Libor, Stibor and Nibor rates for the Eligible Index Currencies, as applicable, mean the London, Stockholm and Norway interbank offered rates for overnight deposits, respectively, each of which is published by Reuters. The Eligible Index Currencies are then ranked according to yield. The three highest yielding and three lowest yielding are selected as Index Currencies for inclusion in calculating the Index. If two Index Currencies have the same yield, then the previous quarter's ranking will be used. Please see <http://www.invescopowershares.com> with respect to the most recently available weighted composition of the Fund and the composition of the Index.

The Index is re-weighted quarterly. Upon re-weighting, the high yielding Index Currencies are allocated a base weight of 33 1/3% and the low yielding Index Currencies are allocated a base weight of -33 1/3%. These new weights are applied during the Index re weighting period, which takes place between the fourth and third Index Business Days prior to the applicable IMM Date (the "Index Re-Weighting Period").

The CME traded futures contract of each applicable Index Currency that is closest to expiration is used in the Index calculation. The futures contracts on the Index Currencies are rolled during the Index Re-Weighting Period. The new futures contract on an Index Currency that has the next closest expiration date is selected. The calculation of the Index on an excess return basis is the weighted return on the change in price of the futures contracts on the Index Currencies.

A 3-month U.S. Treasury bill return is then calculated and included to calculate the total return index. Please refer to Exhibit B of the Trust Agreement for the mathematical formula of the Index.

The Index has been calculated using historical data since March 12, 1993. The Index is composed of notional amounts of each Index Currency. The notional amounts of the Index Currencies included in the Index are based on the Index Closing Level as of the Index Re-Weighting Period. The Index Closing Level reflects an arithmetic weighted return of the change in the Index Currencies exchange rates against the USD since March 12, 1993. March 1993 was chosen as a starting period because it represents the earliest date on which reliable data for all the Eligible Index Currencies exists. On March 12, 1993, the closing Index level was USD 100. Between March 12, 1993 to December 31, 2015, the Index level as calculated on an excess return basis has ranged from as high as USD 315.27 (July 25, 2007) to as low as USD 94.03 (July 30, 1993). Past Index results are not necessarily indicative of future changes, positive or negative, in the Index.

To track the Index, the Fund generally will establish long futures positions in the three Eligible Index Currencies associated with the highest interest rates and short futures positions in the three Eligible Index Currencies associated with the lowest interest rates and will adjust its holdings quarterly as the Index is adjusted. However, if the United States Dollar ("USD") is among the Index Currencies from time-to-time, the Fund will not establish a long or short futures position (as the case may be) in USD, because USD is the Fund's

home currency and, as a consequence, the Fund can never enjoy profit or suffer loss from long or short futures positions in USD. When the USD is not associated with the highest or lowest interest rates among the Eligible Index Currencies, the aggregate notional value of the Fund's futures contracts at the time they are established will be double the value of the Fund's holdings of United States Treasury Obligations, which means the Fund will have a leverage ratio at such time of 2:1. If the USD is associated with the highest or lowest interest rates among the Eligible Index Currencies, the aggregate notional value of the Fund's futures contracts at the time they are established will be approximately 1.66 times the value of the Fund's holdings of United States Treasury Obligations, which means the Fund will have a leverage ratio at such time of approximately 1.66:1. Holding futures positions with a notional amount in excess of the Fund's net asset value constitutes a form of leverage. The use of leverage will increase the potential for both trading profits and losses, depending on the changes, positive and negative, in the Index. The Fund's ability to track the Index will not be affected by the presence or absence of the USD among the Index Currencies. Because the notional value of the Fund's futures positions can rise or fall over time, the leverage ratio could be higher or lower between quarterly adjustments of the Index Currencies.

The use of long and short positions in the construction of the Index causes the Index to rise as a result of any upward price movement of Index Currencies expected to gain relative to the USD and to rise as a result of any downward price movement of Index Currencies expected to lose relative to the USD. The inclusion of both long and short positions is also expected to reduce the country specific foreign exchange risk of the Index (and, therefore, risk in connection with an investment in the Fund) relative to a directional (outright long or short) exposure to any or all of the Index Currencies.

There can be no assurance that the use of both long and short positions will reduce the volatility of the Index during any or all market cycles or performance periods, or that the Fund will achieve its objectives. It is possible that, prior to an Index rebalancing, that Index Currencies expected to lose relative to the USD may rise and/or Index Currencies expected to gain relative to the USD may fall. In such cases, the Fund may experience losses in both its long and short positions at the same time. Such losses will be greater as a result of the Fund's use of leverage, reflected in its long futures exposure to Index Currencies with a notional value of up to 100% of the Fund's net asset value and its short futures exposure to Index Currencies with a notional value of up to 100% of the Fund's net asset value. Under such circumstances, the Fund's losses would be greater as a result of its leverage than would be the case were it to limit its overall exposure to Index Currencies with a notional value of 100% of the Fund's net asset value.

As a result of its use of leverage, the Fund will be required to deposit a greater proportion of its net assets as margin, not expected to exceed 10% of net assets. This represents margin deposit requirements approximately twice as great as would be required if the Fund did not use leverage. Similarly, as a result of its use of leverage, the Fund will trade more futures contracts and incur more brokerage commission expense than it would if it did not use leverage. The additional amount of brokerage commission expense generally will be proportional to the Fund's leverage ratio.

The Fund's portfolio also will include United States Treasury Obligations and, if applicable, other high credit quality short term fixed income securities for deposit with The Bank of New York Mellon (the "Custodian") and with Deutsche Bank Securities Inc. (the "Commodity Broker") as margin.

The theoretical or "fair market" price of a currency futures contract is derived from the spot FX rate, interest rates of the two currencies and time to expiry of the currency futures contract and represents an equilibrium relationship among the interest rates, spot markets and futures markets associated with the currencies in question. If an equilibrium relationship does not exist between two currencies, arbitrage opportunities arise and the exploitation of these opportunities by arbitrageurs will tend to drive currency futures prices toward equilibrium. Application of the Interest Rate Parity formula under circumstances in which currencies are not in an equilibrium relationship predicts that if the currency future is based on a rate ranging from a high yielding currency to a low yielding currency, the fair market price of the currency future will be below the spot rate. The longer the time to the expiry of the currency future the greater the amount the fair market price of the currency future will be below the spot rate. If the spot rate stays approximately the same then, as you move closer to the expiry of the currency future, the fair market price will increase. In other words, the currency future rate between a relatively high interest rate currency and low interest rate currency tends to increase over time (assuming spot is relatively stable).

The Index exploits this trend using both long and short futures positions, which is expected to provide more consistent and less volatile returns than could be obtained by taking long positions only or short positions only.

Margin Calls

Like other futures and derivatives traders, the Fund will be subject to margin calls from time-to-time. The term "margin" has a different meaning in the context of futures contracts and other derivatives than it does in the context of securities. In particular, "margin" on a futures position does not constitute a borrowing of money or the collateralization of a loan. The Fund does not borrow money.

To establish a position in an exchange-traded futures contract, the Fund makes a deposit of “initial margin.” The amount of initial margin required to be deposited in order to establish a position in an exchange-traded futures contract varies from instrument to instrument depending, generally, on the historical volatility of the futures contract in question. Determination of the amount of the required initial margin deposit in respect of a particular contract is made by the exchange on which the contract is listed. To establish a long position in an over-the-counter instrument, the counterparty may require an analogous deposit of collateral, depending upon the anticipated volatility of the instrument and the creditworthiness of the person seeking to establish the position. The deposit of initial margin provides assurance to futures commission merchants and clearing brokers involved in the settlement process that sufficient resources are likely to be on deposit to enable a client’s position to be closed by recourse to the initial margin deposit should the client fail to meet a demand for variation margin, even if changes in the value of the contract in question, which are marked to market from day to day, continue to reflect the contract’s historical volatility. Collateral deposited in support of an over-the-counter instrument serves a similar purpose.

Once a position has been established on a futures exchange, “variation margin” generally is credited or assessed at least daily to reflect changes in the value of the position, except in certain instances where midday variation margin calls are made. In contrast to “initial margin,” “variation margin” represents a system of marking to market the futures contract’s value. Thus, traders in exchange-traded futures contracts are assessed daily in an amount equal to that day’s accumulated losses in respect of any open position (or are credited daily with accumulated gains in respect of such position). Collateral may move between the parties to an over-the-counter instrument in a similar manner as gains or losses accumulate in the instrument. As with initial margin, variation margin serves to secure the obligations of the investor under the contract and to protect those involved in the settlement process against the possibility that a client will have insufficient resources to meet its contractual obligations. Collateral deposited in support of an over-the-counter instrument serves a similar purpose. Like initial margin (or an equivalent deposit of collateral), variation margin (or an equivalent deposit of collateral) does not constitute a borrowing of money, is not considered to be part of the contract purchase price and is returned upon the contract’s termination unless it is used to cover a loss in the contract position. United States Treasury Obligations are used routinely to collateralize OTC derivative positions, and are deposited routinely as margin to collateralize futures positions. The Fund may liquidate United States Treasury Obligations to meet an initial or variation margin requirement.

Performance Summary

This Report covers the three months ended March 31, 2016 and 2015 (hereinafter referred to as the “Three Months Ended March 31, 2016” and the “Three Months Ended March 31, 2015”, respectively). The Fund commenced trading on the American Stock Exchange (which became the NYSE Alternext US LLC (the “NYSE Alternext”)) on September 18, 2006, and, as of November 25, 2008, is listed on the NYSE Arca, Inc. (the “NYSE Arca”).

Performance of the Fund and the exchange traded Shares are detailed below in “Results of Operations”. The Fund’s performance information from inception up to and excluding the Closing Date is a reflection of the performance associated with the Predecessor Managing Owner. The Managing Owner has served as managing owner of the Fund since the Closing Date, and the Fund’s performance information since the Closing Date is a reflection of the performance associated with the Managing Owner. Past performance of the Fund is not necessarily indicative of future performance.

The Index is intended to reflect the change in market value of its underlying currency futures contracts. The Deutsche Bank G10 Currency Future Harvest Index—Total Return™ (DBCFH-TR™), consists of the Index plus 3-month United States Treasury Obligation returns. Because DBCFH-TR is an index, it does not reflect (i) actual trading and (ii) any fees or expenses. Past Index results are not necessarily indicative of future changes, positive or negative, in the Index closing levels.

The section “Summary of the DBCFH-TR™ and Underlying Index Currency Returns for the Three Months Ended March 31, 2016 and 2015” below provides an overview of the changes in the closing levels of the Index by disclosing the change in closing levels of the Index itself and each underlying component Index Currency plus 3-month United States Treasury Obligations returns. Please note that the Fund’s objective is to track the Index (not DBCFH-TR™) and the Fund does not attempt to outperform or underperform the Index.

The following chart highlights the results of the DBCFH-TR™ for the Three Months Ended March 31, 2016 and 2015.

Summary of the DBCFH-TR™ and Underlying Index Currency Returns for the Three Months Ended March 31, 2016 and 2015

AGGREGATE RETURNS FOR INDEX CURRENCIES IN THE DBCFH-TR™				
Underlying Index Currency	Long Position		Short Position	
	Three Months Ended March 31, 2016	Three Months Ended March 31, 2015	Three Months Ended March 31, 2016	Three Months Ended March 31, 2015
Norwegian Krone (NOK)	2.29%	(2.20)%	—	—
Australian Dollar (AUD)	1.87%	(2.03)%	—	—
New Zealand Dollar (NZD)	0.60%	(1.02)%	—	—
Swiss Franc (CHF)	—	—	(1.21)%	(0.72)%
Euro (EUR)	—	—	(1.48)%	3.56%
Swedish Krona (SEK)	—	—	(1.23)%	(0.20)%

DBCFH-TR™ - Index Returns			
		Three Months Ended March 31, 2016	Three Months Ended March 31, 2015
3-MONTH UNITED STATES TREASURY OBLIGATIONS		0.00%	0.01%
DBCFH-TR™		0.92%	(2.19)%

If the Fund's interest income from its holdings of United States Treasury Obligations were to exceed the Fund's fees and expenses, the aggregate return on an investment in the Fund is expected to outperform the Index and underperform the DBCFH-TR™. The only difference between the Index and the DBCFH-TR™ is that the Index does not include interest income from a hypothetical basket of fixed income securities while the DBCFH-TR™ does include such a component. Thus, the difference between the Index and the DBCFH-TR™ is attributable entirely to the hypothetical interest income from this hypothetical basket of fixed income securities. If the Fund's interest income from its holdings of United States Treasury Obligations exceeds the Fund's fees and expenses, then the amount of such excess is expected to be distributed periodically. The market price of the Shares is expected to closely track the Index. The aggregate return on an investment in the Fund over any period is the sum of the capital appreciation or depreciation of the Shares over the period, plus the amount of any distributions during the period. Consequently, the Fund's aggregate return is expected to outperform the Index by the amount of the excess, if any, of its interest income over its fees and expenses but, as a result of the Fund's fees and expenses, the aggregate return on the Fund is expected to underperform the DBCFH-TR™. If the Fund's fees and expenses were to exceed the Fund's interest income from its holdings of United States Treasury Obligations, the aggregate return on an investment in the Fund is expected to underperform the Index.

Net Asset Value

Net asset value means the total assets of the Fund, including, but not limited to, all futures contracts, cash and investments less total liabilities of the Fund, each determined on the basis of U.S. generally accepted accounting principles ("U.S. GAAP"), consistently applied under the accrual method of accounting. In particular, net asset value includes any unrealized appreciation or depreciation on open currency futures contracts, and any other credit or debit accruing to the Fund but unpaid or not received by the Fund. All open currency futures contracts will be calculated at their then current market value, which will be based upon the settlement price for that particular currency futures contract traded on the applicable primary exchange on the date with respect to which net asset value is being determined. Under certain circumstances, including, but not limited to, instances where the settlement price is not available, the Managing Owner may value any asset of the Fund pursuant to such other principles as the Managing Owner deems fair and equitable so long as such principles are consistent with normal industry standards. Interest earned on the Fund's brokerage account is accrued monthly. The amount of any distribution is a liability of the Fund from the day when the distribution is declared until it is paid.

Net asset value per Share is the net asset value of the Fund divided by the number of outstanding Shares.

Critical Accounting Policies

The Fund's critical accounting policies are as follows:

Preparation of the financial statements and related disclosures in conformity with U.S. GAAP requires the application of appropriate accounting rules and guidance, as well as the use of estimates, and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expense and related disclosure of contingent assets and liabilities during the reporting period of the financial statements and accompanying notes. The Fund's application of these policies involves judgments and actual results may differ from the estimates used. There were no significant estimates used in the preparation of these financial statements.

The Fund holds a significant portion of its assets in currency futures contracts and United States Treasury Obligations, both of which are recorded on a trade date basis and at fair value in the financial statements, with changes in fair value reported in the Statements of Income and Expenses.

The use of fair value to measure financial instruments, with related unrealized gains or losses recognized in earnings in each period is fundamental to the Fund's financial statements. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (the exit price).

United States Treasury Obligations are fair valued using an evaluated quote provided by an independent pricing service. Futures contracts are valued at the final settlement price set by an exchange on which they are principally traded. Financial Accounting Standards Board ("FASB") Accounting Standards Codification for fair value measurement and disclosure guidance requires a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The hierarchy gives the highest priority to unadjusted quoted prices for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. See Note 5(c) within the financial statements in Item 1 for further information.

When market closing prices are not available, the Managing Owner may value an asset of the Fund pursuant to policies the Managing Owner has adopted, which are consistent with normal industry standards.

Realized gains (losses) from the sale or disposition of securities or derivatives are determined on a specific identification basis and recognized in the Statements of Income and Expenses in the period in which the contract is closed or the sale or disposition occurs, respectively.

Interest income on United States Treasury Obligations is recognized on an accrual basis when earned. Premiums and discounts are amortized or accreted over the life of the United States Treasury Obligations.

Market Risk

Trading in futures contracts involves the Fund entering into contractual commitments to purchase a particular currency at a specified date and price. The market risk associated with the Fund's commitments to purchase currencies is limited to the gross or face amount of the contracts held.

The Fund's exposure to market risk is also influenced by a number of factors including the volatility of interest rates and foreign currency exchange rates, the liquidity of the markets in which the contracts are traded and the relationships among the contracts held. The inherent uncertainty of the Fund's trading as well as the development of drastic market occurrences could ultimately lead to a loss of all or substantially all of the investors' capital.

Credit Risk

When the Fund enters into futures contracts, the Fund is exposed to credit risk that the counterparty to the contract will not meet its obligations. The counterparty for futures contracts traded on United States exchanges and on most foreign futures is the clearing house associated with the particular exchange. In general, clearing houses are backed by their corporate members who may be required to share in the financial burden resulting from the nonperformance by one of their members and, as such, should significantly reduce this credit risk. In cases where the clearing house is not backed by the clearing members (i.e., some foreign exchanges), it may

be backed by a consortium of banks or other financial institutions. There can be no assurance that any counterparty, clearing member or clearinghouse will meet its obligations to the Fund.

The Commodity Broker, when acting as the Fund's futures commission merchant in accepting orders for the purchase or sale of domestic futures contracts, is required by the Commodity Futures Trading Commission (the "CFTC") regulations to separately account for and segregate as belonging to the Fund all assets of the Fund relating to domestic futures trading and the Commodity Broker is not allowed to commingle such assets with other assets of the Commodity Broker. In addition, CFTC regulations also require the Commodity Broker to hold in a secure account assets of the Fund related to foreign futures trading. In addition, CFTC regulations also require the Commodity Broker to hold in a secure account assets of the Fund related to foreign futures trading.

Liquidity

The Fund's entire source of capital is derived from the Fund's offering of Shares to Authorized Participants. The Fund in turn allocates its net assets to currency futures trading. A significant portion of the net asset value is held in United States Treasury Obligations and cash, which may be used as margin for the Fund's trading in currency futures contracts. The percentage that United States Treasury Obligations bear to the total net assets will vary from period to period as the market values of the Fund's currency futures change. A portion of the Fund's United States Treasury Obligations are held for deposit with the Commodity Broker to meet margin requirements. All remaining cash and United States Treasury Obligations are on deposit with the Custodian. Interest earned on the Fund's interest-bearing funds is paid to the Fund.

The Fund's foreign currency futures contracts may be subject to periods of illiquidity because of market conditions, regulatory considerations or for other reasons. For example, currency futures exchanges may limit fluctuations in certain futures contract prices during a single day by regulations referred to as "daily limits." During a single day, no trades may be executed at prices beyond the daily limit. Once the price of a particular futures contract has increased or decreased by an amount equal to the daily limit, positions in the futures contract can neither be taken nor liquidated unless the traders are willing to effect trades at or within the limit. Although the Eligible Index Currencies that the Fund invests in are not currently subject to daily limits, the Eligible Index Currencies could become subject to such limits in the future. Such market conditions could prevent the Fund from promptly liquidating its currency futures positions.

Because the Fund trades futures contracts, its capital is at risk due to changes in the value of futures contracts (market risk) or the inability of counterparties (including the Commodity Broker and/or exchange clearinghouses) to perform under the terms of the contracts (credit risk).

On any business day, an Authorized Participant may place an order with the Transfer Agent to redeem one or more Baskets. Redemption orders must be placed by 1:00 p.m., Eastern Time. The day on which the Managing Owner receives a valid redemption order is the redemption order date. The day on which a redemption order is settled is the redemption order settlement date. As provided below, the redemption order settlement date may occur up to three business days after the redemption order date. Redemption orders are irrevocable. The redemption procedures allow Authorized Participants to redeem Baskets. Individual Shareholders may not redeem directly from the Fund. Instead, individual Shareholders may only redeem Shares in integral multiples of 200,000 and only through an Authorized Participant.

Unless otherwise agreed to by the Managing Owner and the Authorized Participant as provided in the next sentence, by placing a redemption order, an Authorized Participant agrees to deliver the Baskets to be redeemed through DTC's book-entry system to the Fund not later than the redemption order settlement date as of 2:45 p.m., Eastern time, on the business day immediately following the redemption order date. Upon submission of a redemption order, the Authorized Participant may request the Managing Owner to agree to a redemption order settlement date up to three business days after the redemption order date. By placing a redemption order, and prior to receipt of the redemption proceeds, an Authorized Participant's DTC account is charged the non-refundable transaction fee due for the redemption order.

Redemption orders may be placed either (i) through the Continuous Net Settlement ("CNS") clearing processes of the National Securities Clearing Corporation (the "NSCC") (the "CNS Clearing Process") or (ii) if outside the CNS Clearing Process, only through the facilities of The Depository Trust Company ("DTC" or the "Depository") (the "DTC Process"), or a successor depository, and only in exchange for cash. By placing a redemption order, and prior to receipt of the redemption proceeds, an Authorized Participant's DTC account is charged the non-refundable transaction fee due for the redemption order and such fee is not borne by the Fund.

Cash Flows

The primary cash flow activity of the Fund is to raise capital from Authorized Participants through the issuance of Shares. This cash is used to invest in United States Treasury Obligations and to meet margin requirements as a result of the positions taken in futures contracts to match the fluctuations of the Index the Fund is tracking.

Operating Activities

Net cash flow provided by (used for) operating activities was \$3.8 million and \$(39.3) million for the Three Months Ended March 31, 2016 and 2015, respectively. These amounts primarily include net income (loss) and net purchases and sales of United States Treasury Obligations which are held at fair value on the Statement of Financial Condition.

During the Three Months Ended March 31, 2016, \$80.9 million was paid to purchase United States Treasury Obligations and \$83.5 million was received from sales and maturing United States Treasury Obligations. During the Three Months Ended March 31, 2015, \$130.0 million was paid to purchase United States Treasury Obligations and \$93.0 million was received from sales and maturing United States Treasury Obligations. Unrealized appreciation/depreciation on United States Treasury Obligations and Currency Futures Contracts increased (decreased) net cash provided by (used for) operating activities by \$0.0 million and \$1.7 million during the Three Months Ended March 31, 2016 and 2015, respectively.

Financing Activities

The Fund's net cash flow provided by (used for) financing activities was \$(4.7) million and \$55.3 million during the Three Months Ended March 31, 2016 and 2015, respectively. This included \$0.0 million and \$90.0 million from the sale of Shares to Authorized Participants and \$4.7 million and \$34.7 million from Shares redeemed during the Three Months Ended March 31, 2016 and 2015, respectively.

Results of Operations

FOR THE THREE MONTHS ENDED MARCH 31, 2016 and 2015

The Fund was launched on September 15, 2006 at \$25.00 per Share. The Shares traded on the NYSE Alternext from September 18, 2006 to November 25, 2008 and have been trading on the NYSE Arca since November 25, 2008. The Fund's performance information from inception up to and excluding the Closing Date is a reflection of the performance associated with the Predecessor Managing Owner. The Managing Owner has served as managing owner of the Fund since the Closing Date, and the Fund's performance information since the Closing Date is a reflection of the performance associated with the Managing Owner. Past performance of the Fund is not necessarily indicative of future performance.

The Fund seeks to track changes in the closing levels of the Deutsche Bank G10 Currency Future Harvest Index–Excess Return™ (the “Index”), over time, plus the excess, if any, of the Fund's interest income from its holdings of United States Treasury Obligations over the expenses of the Fund. The following graphs illustrate changes in (i) the price of the Shares (as reflected by the line “Market”), (ii) the Fund's NAV (as reflected by the line “NAV”), and (iii) the closing levels of the Index (as reflected by the line “DB G10 Currency Future Harvest Index ER”). Whenever the interest income earned by the Fund exceeds Fund expenses, the price of the Shares generally has exceeded the levels of the Index primarily because the Share price reflects interest income from the Fund's collateral holdings whereas the Index does not consider such interest income. There can be no assurances that the price of the Shares will exceed the Index levels.

The Index is a set of rules applied to a body of data and does not represent the results of actual investment or trading. The Index is frictionless, in that it does not take into account fees or expenses associated with investing in the Fund. Also, because it does not represent actual futures positions, the Index is not subject to, and does not take into account the impact of, speculative position limits (if applicable) or certain other similar limitations on the ability of the Fund to trade the Index Currencies. The “TR” version of the Index includes an assumed amount of interest income based on prevailing rates that is adjusted from time to time. The Fund, by contrast, invests actual money and trades actual futures contracts. As a result, the performance of the Fund involves friction, in that fees and expenses impose a drag on performance. The Fund may be subject to speculative position limits (if applicable) and certain other limitations on its ability to trade the Index Currencies, which may compel the Fund to trade futures or other instruments that are not the Index Currencies as proxies for the Index Currencies. The interest rate actually earned by the Fund over any period may differ from the assumed amount of interest income factored into the “TR” version of the Index over the same period. All of these factors can contribute to discrepancies between changes in net asset value per Share and changes in the level of the Index over any period of time. The extent to which the Fund has invested at an aggregate notional level approximating the Index value as opposed to the Fund's aggregate net asset value also may contribute to discrepancies. Fees and expenses always will tend to cause changes in the net asset value per Share to underperform changes in the value of the Index over any given period, all other things being equal. Actual interest

income could be higher or lower than the assumed interest income factored into the “TR” version of the Index, and therefore could cause changes in the net asset value per Share to outperform or underperform changes in the value of the “TR” version of the Index over any given period, all other things being equal. Similarly, trading futures or other instruments that are not Index Currencies as proxies for the Index Currencies could cause changes in the net asset value per Share to outperform or underperform changes in the value of the Index over any given period, all other things being equal.

**COMPARISON OF Market, NAV AND DB G10 Currency Future Harvest Index ER
FOR THE THREE MONTHS ENDED
MARCH 31, 2016 AND 2015**

NEITHER THE PAST PERFORMANCE OF THE FUND NOR THE PRIOR INDEX LEVELS AND CHANGES, POSITIVE OR NEGATIVE, SHOULD BE TAKEN AS AN INDICATION OF THE FUND'S FUTURE PERFORMANCE.

NEITHER THE PAST PERFORMANCE OF THE FUND NOR THE PRIOR INDEX LEVELS AND CHANGES, POSITIVE OR NEGATIVE, SHOULD BE TAKEN AS AN INDICATION OF THE FUND'S FUTURE PERFORMANCE.

See Additional Legends Below

Additional Legends

Deutsche Bank G10 Currency Future Harvest Index–Excess Return™ is an index and does not reflect (i) actual trading and (ii) any fees or expenses.

WHILE THE FUND'S OBJECTIVE IS NOT TO GENERATE PROFIT THROUGH ACTIVE PORTFOLIO MANAGEMENT, BUT IS TO TRACK THE INDEX, BECAUSE THE INDEX WAS ESTABLISHED IN DECEMBER 2005, CERTAIN INFORMATION RELATING TO THE INDEX CLOSING LEVELS MAY BE CONSIDERED TO BE "HYPOTHETICAL." HYPOTHETICAL INFORMATION MAY HAVE CERTAIN INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. WITH RESPECT TO INDEX DATA, NO REPRESENTATION IS BEING MADE THAT THE INDEX WILL OR IS LIKELY TO ACHIEVE ANNUAL OR CUMULATIVE CLOSING LEVELS CONSISTENT WITH OR SIMILAR TO THOSE SET FORTH HEREIN. SIMILARLY, NO REPRESENTATION IS BEING MADE THAT THE FUND WILL GENERATE PROFITS OR LOSSES SIMILAR TO THE FUND'S PAST PERFORMANCE OR THE HISTORICAL ANNUAL OR CUMULATIVE CHANGES IN THE INDEX CLOSING LEVELS. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY INVESTMENT METHODOLOGIES, WHETHER ACTIVE OR PASSIVE.

WITH RESPECT TO INDEX DATA, ONE OF THE LIMITATIONS OF HYPOTHETICAL INFORMATION IS THAT IT IS GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. TO THE EXTENT THAT INFORMATION PRESENTED HEREIN RELATES TO THE PERIOD MARCH 1993 THROUGH NOVEMBER 2005, THE INDEX CLOSING LEVELS REFLECT THE APPLICATION OF THE INDEX'S METHODOLOGY, AND SELECTION OF INDEX CURRENCIES, IN HINDSIGHT.

NO HYPOTHETICAL RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THERE ARE NUMEROUS FACTORS, INCLUDING THOSE DESCRIBED UNDER ITEM 1A. "RISK FACTORS" SET FORTH IN THE FUND'S ANNUAL REPORT ON FORM 10-K FOR THE YEAR ENDED DECEMBER 31, 2015, RELATED TO THE CURRENCIES MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF THE FUND'S EFFORTS TO TRACK THE INDEX OVER TIME WHICH CANNOT BE, AND HAVE NOT BEEN, ACCOUNTED FOR IN THE PREPARATION OF THE INDEX INFORMATION SET FORTH ON THE FOLLOWING PAGES, ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL PERFORMANCE RESULTS FOR THE FUND. FURTHERMORE, THE INDEX INFORMATION DOES NOT INVOLVE FINANCIAL RISK OR ACCOUNT FOR THE IMPACT OF FEES AND COSTS ASSOCIATED WITH THE FUND.

THE MANAGING OWNER AND ITS TRADING PRINCIPALS HAVE LIMITED EXPERIENCE MANAGING THE DAY-TO-DAY OPERATIONS FOR THE FUND AND HAVE ONLY MANAGED AN EXCHANGE-TRADED FUND THAT RELATES TO A BROAD-BASED COMMODITY INDEX FOR A SHORT PERIOD. BECAUSE THERE ARE LIMITED ACTUAL PERFORMANCE RESULTS OF THE MANAGING OWNER THAT ARE COMPARABLE TO THE INDEX CLOSING LEVELS SET FORTH HEREIN, PROSPECTIVE INVESTORS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THE ANNUAL OR CUMULATIVE INDEX RESULTS. FOR THE AVOIDANCE OF DOUBT, NONE OF THE PERFORMANCE RELATED INFORMATION PRIOR TO THE CLOSING DATE CAN BE ATTRIBUTED TO THE MANAGING OWNER.

THE PREDECESSOR MANAGING OWNER, AN INDIRECT WHOLLY OWNED SUBSIDIARY OF DEUTSCHE BANK AG, COMMENCED OPERATIONS IN JANUARY 2006. AS THE PREDECESSOR MANAGING OWNER, THE PREDECESSOR MANAGING OWNER AND ITS TRADING PRINCIPALS MANAGED THE DAY-TO-DAY OPERATIONS FOR THE FUND FROM INCEPTION UP TO AND EXCLUDING THE CLOSING DATE. BECAUSE THERE ARE LIMITED ACTUAL TRADING RESULTS TO COMPARE TO THE INDEX CLOSING LEVELS SET FORTH HEREIN, PROSPECTIVE INVESTORS SHOULD BE PARTICULARLY WARY OF PLACING UNDUE RELIANCE ON THE ANNUAL OR CUMULATIVE INDEX RESULTS. IN RESPECT OF ANY PERIOD. FOR THE AVOIDANCE OF DOUBT, NONE OF THE PERFORMANCE RELATED INFORMATION AFTER THE CLOSING DATE CAN BE ATTRIBUTED TO THE PREDECESSOR MANAGING OWNER.

THE FUND'S PERFORMANCE INFORMATION FROM INCEPTION UP TO AND EXCLUDING THE CLOSING DATE IS A REFLECTION OF THE PERFORMANCE ASSOCIATED WITH THE PREDECESSOR MANAGING OWNER, THE MANAGING OWNER HAS SERVED AS MANAGING OWNER OF THE FUND SINCE THE CLOSING DATE AND THE FUND'S PERFORMANCE INFORMATION SINCE THE CLOSING DATE IS A REFLECTION OF THE PERFORMANCE ASSOCIATED WITH THE MANAGING OWNER. PAST PERFORMANCE OF THE FUND IS NOT NECESSARILY INDICATIVE OF FUTURE PERFORMANCE.

FOR THE THREE MONTHS ENDED MARCH 31, 2016 COMPARED TO THE THREE MONTHS ENDED MARCH 31, 2015

Fund Share Price Performance

For the Three Months Ended March 31, 2016, the NYSE Arca market value of each Share increased 0.30% from \$23.32 per Share to \$23.39 per Share. The Share price low and high for the Three Months Ended March 31, 2016 and related change from the Share price on December 31, 2015 was as follows: Shares traded at a low of \$22.53 per Share (-3.39%) on January 15, 2016, and a high of \$23.67 per Share (+1.52%) on March 4, 2016.

For the Three Months Ended March 31, 2015, the NYSE Arca market value of each Share decreased 2.74% from \$25.51 per Share to \$24.81 per Share. The Share price low and high for the Three Months Ended March 31, 2015 and related change from the Share price on December 31, 2014 was as follows: Shares traded from a low of \$23.84 per Share (-6.53%) on January 21, 2015, to a high of \$25.64 per Share (+0.51%) on January 8, 2015.

Fund Share Net Asset Performance

For the Three Months Ended March 31, 2016, the net asset value of each Share increased 0.69% from \$23.29 per Share to \$23.45 per Share. For the Three Months Ended March 31, 2016, gains in the long index currency positions in the Australian Dollar, New Zealand Dollar and Norwegian Krone were partially offset by losses in the short currency positions in the Euro, Swiss Franc and Swedish Krona contributing to an overall 0.92% increase in the level of the DBCFH-TR™.

Net income (loss) for the Three Months Ended March 31, 2016, was \$0.6 million, primarily resulting from net realized gain (loss) of \$2.2 million, net change in unrealized gain (loss) of \$(1.5) million, and operating expenses of \$0.2 million.

For the Three Months Ended March 31, 2015, the net asset value of each Share decreased 2.47% from \$25.45 per Share to \$24.82 per Share. For the Three Months Ended March 31, 2015, losses in the long and short index currency positions in the Australian Dollar, the New Zealand Dollar, Norwegian Krone, Swiss Franc and Swedish Krona were partially offset by gains in the short currency positions in the Euro contributing to an overall 2.19% decrease in the level of the DBCFH-TR™.

Net income (loss) for the Three Months Ended March 31, 2015, was \$(2.9) million, primarily resulting from net realized gain (loss) of \$(1.0) million, net change in unrealized gain (loss) of \$(1.7) million, and operating expenses of \$0.2 million.

Off-Balance Sheet Arrangements and Contractual Obligations

In the normal course of its business, the Fund is a party to financial instruments with off-balance sheet risk. The term “off-balance sheet risk” refers to an unrecorded potential liability that, even though it does not appear on the balance sheet, may result in a future obligation or loss. The financial instruments used by the Fund are currency futures, whose values are based upon an underlying asset and generally represent future commitments which have a reasonable possibility to be settled in cash or through physical delivery.

The financial instruments are traded on an exchange and are standardized contracts.

The Fund has not utilized, nor does it expect to utilize in the future, special purpose entities to facilitate off-balance sheet financing arrangements and has no loan guarantee arrangements or off-balance sheet arrangements of any kind, other than agreements entered into in the normal course of business noted above, which may include indemnification provisions related to certain risks service providers undertake in performing services which are in the best interest of the Fund. While the Fund’s exposure under such indemnification provisions cannot be estimated, these general business indemnifications are not expected to have a material impact on the Fund’s financial position. The Managing Owner expects the risk of loss to be remote.

The Fund’s contractual obligations are with the Managing Owner and the Commodity Broker. Management Fee payments made to the Managing Owner are calculated as a fixed percentage of the Fund’s net asset value. Commission payments to the Commodity Broker are on a contract-by-contract, or round-turn, basis. As such, the Managing Owner cannot anticipate the amount of payments that will be required under these arrangements for future periods as net asset values and trading activity are not known until a future date. These agreements are effective for one-year terms, renewable automatically for additional one-year terms unless terminated. Additionally, these agreements may be terminated by either party for various reasons. For the avoidance of doubt, from inception up to and excluding the Closing Date, all Management Fees were paid to the Predecessor Managing Owner. Since the Closing Date, the Managing Owner has served as managing owner of the Fund and all Management Fee accruals since the Closing Date have been paid to the Managing Owner.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

INTRODUCTION

The Fund is designed to replicate positions in a currency futures index. The market sensitive instruments held by it are subject to the risk of trading loss. Unlike an operating company, the risk of market sensitive instruments is integral, not incidental, to the Fund's main line of business.

Market movements can produce frequent changes in the fair market value of the Fund's open positions and, consequently, in its earnings and cash flow. The Fund's market risk is primarily influenced by changes in the prices of currencies.

Value at Risk, or VaR, is a measure of the maximum amount which the Fund could reasonably be expected to lose in a given market sector. However, the inherent uncertainty in the markets in which the Fund trades and the recurrence in the markets traded by the Fund of market movements far exceeding expectations could result in actual trading or non-trading losses far beyond the indicated VaR or the Fund's experience to date (i.e., "risk of ruin"). In light of this, as well as the risks and uncertainties intrinsic to all future projections, the inclusion of the quantification included in this section should not be considered to constitute any assurance or representation that the Fund's losses in any market sector will be limited to VaR or by the Fund's attempts to manage its market risk.

Standard of Materiality

Materiality as used in this section, "Quantitative and Qualitative Disclosures About Market Risk," is based on an assessment of reasonably possible market movements and the potential losses caused by such movements, taking into account the effects of margin, and any other multiplier features, as applicable, of the Fund's market sensitive instruments.

QUANTIFYING THE FUND'S TRADING VALUE AT RISK IN DIFFERENT CURRENCY CONTRACTS

Quantitative Forward-Looking Statements

The following quantitative disclosures regarding the Fund's market risk exposures contain "forward-looking statements" within the meaning of the safe harbor from civil liability provided for such statements by the Private Securities Litigation Reform Act of 1995 (set forth in Section 27A of the Securities Act of 1933 (the "Securities Act") and Section 21E of the Exchange Act). All quantitative disclosures in this section are deemed to be forward-looking statements for purposes of the safe harbor, except for statements of historical fact (such as the dollar amount of maintenance margin required for market risk sensitive instruments held at the end of the reporting period).

Value at Risk (VaR), is a statistical measure of the value of losses that would not be expected to be exceeded over a given time horizon and at a given probability level arising from movement of underlying risk factors. Loss is measured as a decline in the fair value of the portfolio as a result of changes in any of the material variables by which fair values are determined. VaR is measured over a specified holding period (one day) and to a specified level of statistical confidence (99th percentile). However, the inherent uncertainty in the markets in which the Fund trades and the recurrence in the markets traded by the Fund of market movements far exceeding expectations could result in actual trading or non-trading losses far beyond the indicated VaR or the Fund's experience to date (i.e., "risk of ruin"). In light of this, as well as the risks and uncertainties intrinsic to all future projections, the inclusion of the quantification included in this section should not be considered to constitute any assurance or representation that the Fund's losses in any market sector will be limited to VaR or by the Fund's attempts to manage its market risk.

THE FUND'S TRADING VALUE AT RISK

The Fund calculates VaR using the actual historical market movements of the Fund's net assets.

The following table indicates the trading VaR associated with the Fund's net assets as of March 31, 2016.

<u>Description</u>	<u>Net Assets</u>	<u>Daily Volatility</u>	<u>VaR*</u> <u>(99 Percentile)</u>	<u>For the Three</u> <u>Months Ended</u> <u>March 31, 2016</u> <u>Number of times</u> <u>VaR Exceeded</u>
PowerShares DB G10 Currency Harvest Fund	\$ 84,435,386	0.56%	\$ 1,094,331	3

The following table indicates the trading VaR associated with the Fund's net assets as of December 31, 2015.

<u>Description</u>	<u>Net Assets</u>	<u>Daily Volatility</u>	<u>VaR* (99 Percentile)</u>	<u>For the Year Ended December 31, 2015 Number of times VaR Exceeded</u>
PowerShares DB G10 Currency Harvest Fund	\$ 88,501,643	0.57 %	\$ 1,168,060	20

* The VaR represents the one day downside risk, under normal market conditions, with a 99% confidence level. It is calculated using historical market moves of the Fund's net assets and uses a one year look-back.

NON-TRADING RISK

The Fund has non-trading market risk as a result of investing in short-term United States Treasury Obligations. The market risk represented by these investments is expected to be immaterial.

QUALITATIVE DISCLOSURES REGARDING PRIMARY TRADING RISK EXPOSURES

The following qualitative disclosures regarding the Fund's market risk exposures—except for those disclosures that are statements of historical fact—constitute forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. The Fund's primary market risk exposures are subject to numerous uncertainties, contingencies and risks. Government interventions, defaults and expropriations, illiquid markets, the emergence of dominant fundamental factors, political upheavals, changes in historical price relationships, an influx of new market participants, increased regulation and many other factors could result in material losses as well as in material changes to the risk exposures of the Fund. There can be no assurance that the Fund's current market exposure will not change materially. Investors may lose all or substantially all of their investment in the Fund.

Several factors may affect the price of the Index Currencies, including, but not limited to:

- National debt levels and trade deficits, including changes in balances of payments and trade;
- Domestic and foreign inflation rates and investors' expectations concerning inflation rates;
- Domestic and foreign interest rates and investors' expectations concerning interest rates;
- Currency exchange rates;
- Investment and trading activities of mutual funds, hedge funds and currency funds;
- Global or regional political, economic or financial events and situations;
- Supply and demand changes which influence the foreign exchange rates of various currencies;
- Monetary policies of governments (including exchange control programs, restrictions on local exchanges or markets and limitations on foreign investment in a country or on investment by residents of a country in other countries), trade restrictions, currency devaluations and revaluations;
- Governmental intervention in the currency market, directly and by regulation, in order to influence currency prices; and
- Expectations among market participants that a currency's value soon will change.

QUALITATIVE DISCLOSURES REGARDING NON-TRADING RISK EXPOSURE

General

The Fund is unaware of any (i) anticipated known demands, commitments or capital expenditures; (ii) material trends, favorable or unfavorable, in its capital resources; or (iii) trends or uncertainties that will have a material effect on operations.

QUALITATIVE DISCLOSURES REGARDING MEANS OF MANAGING RISK EXPOSURE

Under ordinary circumstances, the Managing Owner's discretionary power is limited to determining whether the Fund will make a distribution. Under emergency or extraordinary circumstances, the Managing Owner's discretionary powers increase, but

remain circumscribed. These special circumstances, for example, include the unavailability of the Index or certain natural or man-made disasters. The Managing Owner does not actively manage the Fund to avoid losses. The Fund initiates positions on both the “long” and “short” side of the market and does not employ “stop-loss” techniques.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of the management of the Managing Owner, including Daniel Draper, its Principal Executive Officer and President, and Steven Hill, its Principal Financial and Accounting Officer, Investment Pools, the Fund carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this Quarterly Report, and, based upon that evaluation, Daniel Draper, the Principal Executive Officer and President, and Steven Hill, the Principal Financial and Accounting Officer, Investment Pools, of the Managing Owner concluded that the Fund’s disclosure controls and procedures were effective to ensure that information the Fund is required to disclose in the reports that it files or submits with the Securities and Exchange Commission (the “SEC”) under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms, and to ensure that information required to be disclosed by the Fund in the reports that it files or submits under the Exchange Act is accumulated and communicated to management of the Managing Owner, including its Principal Executive Officer and President and Principal Financial and Accounting Officer, Investment Pools, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There has been no change in internal control over financial reporting (as defined in the Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during the Fund’s quarter ended March 31, 2016 that has materially affected, or is reasonably likely to materially affect, the Fund’s internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

Not applicable.

Item 1A. Risk Factors.

There are no material changes from risk factors as previously disclosed in the Annual Report on Form 10-K for the year ended December 31, 2015, filed February 29, 2016 except as noted below.

PricewaterhouseCoopers LLP (“PwC”), has advised the Managing Owner that, as of the date of the filing of this Quarterly Report on Form 10-Q, it is in discussions with the Staff of the Securities and Exchange Commission (the “SEC”), regarding a difference in the interpretation and application of Rule 2-01(c)(1)(ii)(A) of Regulation S-X (the “Loan Rule”).

The Loan Rule prohibits accounting firms, such as PwC, from having certain financial relationships with their audit clients and affiliated entities. Specifically, the Loan Rule provides, in relevant part, that an accounting firm is not independent if it receives a loan from an audit client or it receives a loan from a lender that is a “record or beneficial owner of more than ten percent of the audit client’s equity securities.” Pursuant to the SEC’s interpretation of the Loan Rule, some of PwC’s relationships with lenders who also own shares of one or more funds within the Invesco investment company complex may run afoul of the Loan Rule, calling into question PwC’s independence with respect to some registered investment companies managed by either the Managing Owner or affiliated entities of the Managing Owner and, therefore, the Fund as part of the Invesco investment company complex. However, PwC’s interpretation of the Loan Rule, in light of the facts of these lending relationships, leads it to conclude that there is no violation of the Loan Rule.

The Managing Owner has considered the lending relationships described by PwC and has concluded that (1) the lending relationships did not impact PwC’s application of objective judgment with respect to conducting its audits and issuing reports on the Fund’s financial statements; and (2) a reasonable investor with knowledge of all relevant facts and circumstances would reach the same conclusion. In making this determination, the Managing Owner considered, among other things, PwC’s description of the relevant lending relationships, PwC’s interpretation of the Rule 2-01(c)(1)(ii)(A) and PwC’s representation that its independence was not impaired in conducting its audit of the Registrant’s financial statements.

PwC advised the Managing Owner that it believes it is independent and it continues to have discussions with the SEC’s Staff to resolve this interpretive matter. PwC further advised the Managing Owner that this matter did not compromise or impair its

objectivity in connection with its review of the interim financial statements included in this Quarterly Report on Form 10-Q. These discussions with the Staff remain ongoing and, while PwC represented to the Managing Owner that it feels confident that PwC's interpretation of the Loan Rule is correct, neither PwC nor the Managing Owner can be certain of the final outcome.

If the SEC were ultimately to determine that PwC was not independent with respect to the Fund for certain periods, the Fund's filings with the SEC which contain its consolidated financial statements for such periods would be non-compliant with the applicable securities laws. If the SEC determines that PwC was not independent, among other things, the Fund may be required to have independent audits conducted on the Fund's previously audited financial statements by another independent registered public accounting firm for the affected periods. Similarly, the interim financial statements filed by the Fund may have to be reviewed by another independent registered public accounting firm. The time involved to conduct such independent audits and additional review of the interim period financial statements may impair the Fund's ability to issue Baskets of Shares on a timely manner. Any of the foregoing could have a material adverse effect on the Fund's results of operations, liquidity and financial condition, the trading prices of the Shares and the continued eligibility for listing of the Shares on The New York Stock Exchange.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(a) There have been no unregistered sales of the Fund's securities. No Fund securities are authorized for issuance by the Fund under equity compensation plans.

(b) Not applicable.

(c) The following table summarizes the redemptions by Authorized Participants during the Three Months Ended March 31, 2016:

Period of Redemption	Total Number of Shares Redeemed	Average Price Paid per Share
January 1, 2016 to January 31, 2016	—	\$ —
February 1, 2016 to February 29, 2016	—	\$ —
March 1, 2016 to March 31, 2016	200,000	\$ 23.50
Total	200,000	\$ 23.50

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Item 6. Exhibits.

- 31.1 Certification required under Exchange Act Rules 13a-14 and 15d-14 (filed herewith)
- 31.2 Certification required under Exchange Act Rules 13a-14 and 15d-14 (filed herewith)
- 32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (furnished herewith)
- 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (furnished herewith)
- 101 Interactive data file pursuant to Rule 405 of Regulation S-T: (i) the Statements of Financial Condition of PowerShares DB G10 Currency Harvest Fund — March 31, 2016 and December 31, 2015 (Unaudited), (ii) the Schedule of Investments of PowerShares DB G10 Currency Harvest Fund — March 31, 2016 (Unaudited), (iii) the Schedule of Investments of PowerShares DB G10 Currency Harvest Fund — December 31, 2015 (Unaudited), (iv) the Statements of Income and Expenses of PowerShares DB G10 Currency Harvest Fund — For the Three Months Ended March 31, 2016 and 2015 (Unaudited), (v) the Statement of Changes in Shareholders' Equity of PowerShares DB G10 Currency Harvest Fund — For the Three Months Ended March 31, 2016 (Unaudited), (vi) the Statement of Changes in Shareholders' Equity of PowerShares DB G10 Currency Harvest Fund — For the Three Months Ended March 31, 2015 (Unaudited), (vii) the Statements of Cash Flows of PowerShares DB G10 Currency Harvest Fund — For the Three Months Ended March 31, 2016 and 2015 (Unaudited), and (viii) Notes to Unaudited Financial Statements of PowerShares DB G10 Currency Harvest Fund — March 31, 2016.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

CERTIFICATION

I, Daniel Draper, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of PowerShares DB G10 Currency Harvest Fund;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, Steven Hill, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of PowerShares DB G10 Currency Harvest Fund;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
