

# Invesco Next Gen Media and Gaming ETF

**GGME**

## Fund description

The Invesco Next Gen Media and Gaming ETF (Fund) is based on the STOXX World AC NexGen Media Index (Index). The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index is of securities of companies with significant exposure to technologies or products that contribute to future media through direct revenue. The Fund and the Index are rebalanced after the close of trading on the second Friday of March, June, September and December.

Effective after the close of markets on Aug. 25, 2023, the Fund's name, ticker, underlying index, index provider, investment objective and investment strategy changed. The Fund's name and ticker changed from Invesco Dynamic Media ETF (ticker: PBS) to the Invesco Next Gen Media ETF (ticker: GGME). The Fund's Index Provider changed from ICE Data Indices, LLC to STOXX Ltd. and its Underlying Index changed from the Dynamic Media Intellidex Index to the STOXX World AC NexGen Media Index; and as a result, the Fund's objective and strategy changed to seek to track the investment results of the new Underlying index by investing at least 90% of its total assets in securities that comprise the new Underlying Index. See the prospectus for more information.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

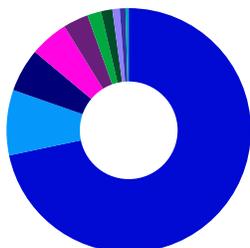

<sup>1</sup>The S&P Composite 1500® Media Index consists of all media stocks included in the S&P Composite 1500 Index.

<sup>2</sup>The Dynamic Media Intellidex Index is comprised of common stocks of 30 US media companies.

#### Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Investments focused in a particular industry, such as media, or sector, such as information technology, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Gaming companies face intense competition globally, and may have limited product lines, markets, financial resources, or personnel, products that face rapid obsolescence, and are heavily dependent on the protection of patent and intellectual property rights. These companies may also be subject to shifting consumer preferences, which may adversely affect such companies and increasing regulatory constraints, specifically related to cybersecurity and privacy, and sophisticated intellectual property infringement schemes and piracy efforts, particularly in foreign markets, which may limit the revenue potential

#### Important information

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

#### Glossary

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

**Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value.

**Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

**Weighted Average Return on Equity** is net income divided by net worth.

**Weighted Market Capitalization** is the sum of each underlying securities market value.
