AAA	2.93
AA	22.28
A	30.11
BBB	20.22
BB	5.99
B	1.11
Other	0.31
Not Rated	13.83

### Market overview

- During the second quarter, the Bloomberg Barclays Municipal Index and the Bloomberg Barclays High Yield Municipal Index showed positive returns of 2.14% and 2.73%, respectively. This brings year-to-date total returns to 5.09% and 6.66%, respectively.
- Positive total returns across the yield curve were primarily driven by outperformance in the hospital and industrial development revenue/pollution control revenue sectors. Within the investment grade segment, lower-rated investment grade credits outperformed their higher-quality counterparts.
- Strong market technicals, with a favorable balance of supply and demand, have continued to support municipal bond results. Inflows to municipal mutual funds now total \$43.8 billion year-to-date, on pace for a record year. Positive inflows began in January and continued through June, averaging about \$8 billion per month.
- In May, US Treasury yields fell and prices rallied sharply as a result of heightened trade tensions. Yields in the municipal market fell as well, but not to the same degree as Treasuries, causing municipals to underperform. Municipals also lagged US Treasuries in June, with the 5-year, 10-year and 30-year yield ratios cheapening by 1%, 5% and 2%, respectively. This tightening followed the trend in place since mid-May. Both issuance and redemptions of municipal bonds are expected to increase heading into summer.
- From a macro-economic perspective, continued uncertainty surrounding trade negotiations has caused bond market investors to price in a 100% chance of a Federal Reserve interest rate cut in July.

### Performance highlights

- Invesco Intermediate Term Municipal Income Fund Class A shares at net asset value (NAV) posted a return of 2.06% for the second quarter, compared to its style-specific benchmark, the S&P Municipal Bond 2-17 Year Investment Grade Index, which returned 2.01%. (Please see the investment results table on page 2 for fund and index performance.)

### Contributors to performance

- Security selection among non-rated bonds added to relative performance during the quarter.
- Security selection in the health care and industrial development revenue/pollution control revenue sectors added to relative performance during the quarter.
- On the state level, security selection among Illinois and New Jersey issues also added to relative return.

### Detractors from performance

- Security selection among bonds rated AAA and AA had a negative effect on relative performance.
- Underweight exposure to local general obligation bonds detracted from relative return during the quarter.
- Security selection among issues domiciled in California and Texas also detracted from relative return.

### Positioning and outlook

- We maintain the portfolio's preference for revenue bonds over general obligation bonds. The largest sector allocations were in health care and transportation.
- Our approach to investing aims to deliver a highly competitive yield while diversifying both sector and individual security risks.
- Looking ahead, we believe municipal fundamentals will remain strong. Though we also expect market technicals to remain strong, the second half of the year is unlikely to see retail inflows as large as those in the first half.

Investment results

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com/performance](http://invesco.com/performance) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges.

1 Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. Pre-Refunded/Escrowed to Maturity (Prerefunded/ETM) bonds are issues backed by an escrow account, invested in US Treasuries, which is used to pay bondholders. Other includes bonds rated below single B and bonds currently not paying a coupon. For more information on the rating methodology, please visit [www.standardandpoors.com](http://www.standardandpoors.com) and select 'Understanding Ratings' under Rating Resources on the homepage; [www.moodys.com](http://www.moodys.com) and select 'Rating Methodologies' under Research and Ratings on the homepage; [www.fitchratings.com](http://www.fitchratings.com) and select 'Ratings Definitions' on the homepage.

Class Y shares are available only to certain investors. See the prospectus for more information.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

Income may be subject to state and local taxes. There is no guarantee that the fund's income will be exempt from federal income taxes, including the alternative minimum tax.

S&P Municipal Bond 2-17 Years Investment Grade Index is a sub-set of the broad S&P Municipal Bond Index. This index of market value-weighted investment grade U.S. municipal bonds seeks to measure the performance of U.S. municipals whose maturities are greater than or equal to 2 years, but less than 17 years. An investment cannot be made directly in an index.

S&P Municipal Bond Index is a broad, market value-weighted index that seeks to measure the performance of the U.S. municipal bond market. An investment cannot be made directly into an index.

The Bloomberg Barclays Municipal Bond Index is an unmanaged index considered representative of the tax-exempt bond market. An investment cannot be made directly in an index.

The Bloomberg Barclays Municipal High Yield Bond Index is an unmanaged index considered representative of noninvestment-grade bonds. An investment cannot be made directly in an index.

**Option adjusted duration** is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates. **Weighted average effective maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the general security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

Expense ratios	% net	% total
Class A Shares	0.87	0.91
Class C Shares	1.62	1.66
Class Y Shares	0.62	0.66

Per the current prospectus  
 Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least June 30, 2020. See current prospectus for more information.

---

## About risk

All or a portion of the fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Securities which are in the medium- and lower grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks, such as greater credit risk, market risk,

liquidity risk, management risk, and regulatory risk.

The fund may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.
