Expense Ratio: 0.19%.

Performance quoted is past performance, and cannot guarantee comparable future results. Current performance may be higher or lower than performance quoted. Visit invesco.com for the most recent month-end performance. Investment returns and principal value will fluctuate and when redeemed, shares may be worth more or less than their original cost. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. The NAV return is based on the net asset value of the Fund and the market return (MKT) is based on the market price per share of the Fund. The price used to calculate MKT is determined by using the midpoint between the highest bid and the lowest offer on the primary stock exchange on which the shares of the Fund are listed for trading when the Fund's NAV is calculated at market close. MKT and NAV assume dividends and capital gain distributions have been reinvested in the Fund at market price and NAV, respectively. Returns less than one year are cumulative.

Growth of \$10K (NAV)

\$11,485

Special Risks: There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund. Investments focused in a particular sector, such as basic materials, communications services, consumer discretionary and staples, energy, financials, healthcare, industrials, information technology, real estate securities and utilities, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments. Companies that issue quality stocks may experience lower than expected returns or may experience negative growth, as well as increased leverage, resulting in lower than expected or negative returns to Fund shareholders. The Fund is subject to numerous market trading risks, including the potential lack of an active market, losses from trading in secondary markets, and disruption in the creation/redemption process. During stressed market conditions, Shares may become less liquid as result of deteriorating liquidity which could lead to differences in the market price and the underlying value of those Shares. The Fund is non-diversified and may experience greater volatility than a more diversified investment.

1. The Russell 1000 Quality Factor Index ("Index") is a trademark of Frank Russell Company ("Russell") and has been licensed for use by the Manager and the Fund. The Invesco Russell 1000 Quality Factor ETF ("Licensed Fund") is not in any way sponsored, endorsed, sold or promoted by Russell, the London Stock Exchange Group companies ("LSEG") or Invesco Capital Management LLC (together the "Licensor Parties") and none of the Licensor Parties make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to (i) the results to be obtained from the use of the Index (upon which the Licensed Fund is based), (ii) the figure at which the Index is said to stand at any particular time on any particular day or otherwise, or (iii) the suitability of the Index for the purpose to which it is being put in connection with the Licensed Fund. None of the Licensor Parties have provided or will provide any financial or investment advice or recommendation in relation to the Index to the Manager or to its clients. The Index is calculated by Russell or its agent. None of the Licensor Parties shall be (a) liable (whether in negligence or otherwise) to any person for any error in the Index or (b) under any obligation to advise any person of any error therein.

*Negative P/E's are excluded from this ratio calculation.

Strategy Focus

The Invesco Russell 1000 Quality Factor ETF is composed of securities in the Russell 1000 Index that, in the aggregate, have greater quality characteristics relative to the broader U.S. equity market.

Invesco Russell 1000 Quality Factor ETF

Ticker: OQAL

Investment Approach

The Invesco Russell 1000 Quality Factor ETF (the “Fund”) is based on the Russell 1000 Quality Factor Index (the “Index”). The Fund will invest at least 90% of its total assets in the securities that comprise the Index. The Index is constructed using a rules-based approach that re-weights securities of the Russell 1000 Index with the highest quality characteristics based on turnover, accruals and leverage. The Fund and Index are reconstituted and rebalanced annually.

P/B Ratio: Price-to-Book Ratio (“P/B”) is the ratio used to compare a stock’s market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter’s book value per share.

P/E Ratio (LTM): Price-to-Earnings Ratio (“P/E”) is a valuation ratio of a company’s current share price compared to its actual per-share earnings over the last 12 months. (LTM - Last Twelve Months)

P/S Ratio: Price-to-Sales Ratio (“P/S”) is a valuation ratio of a company’s current share price compared to its actual per-share sales.

Turnover: Turnover ratio is defined as a change in the securities held by the Fund.

Weighted Avg. Mrk. Cap Weighted Median Mrk. Cap: The average market capitalization (weighted) is the weighted average of the market capitalization of each stock in a portfolio or index. In such groups of stocks, larger companies account for a greater portion of the portfolio or index. The median market capitalization (weighted) is the weighted midpoint of the market capitalization in the portfolio or index sorted distribution at which 50% of cumulative weight of the portfolio or index weight is represented.

The Russell 1000 Quality Factor Index is composed of securities in the Russell 1000 Index that, in the aggregate, have greater quality characteristics relative to the broader U.S. equity market. **Past performance does not guarantee future results.**

The Russell 1000[®] Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000[®] Index and includes approximately 1,000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 represents approximately 92% of the Russell 3000 Index. The index is unmanaged and cannot be purchased directly by investors. Index performance is shown for illustrative purposes only and does not predict or depict performance of the Fund. **Past performance does not guarantee future results.**
