Returns less than one year are cumulative. Call 800-983-0903 for the most recent month-end performance.
An investor cannot invest directly in an index. The Fund’s performance from inception up to and including
February 23, 2015, reflects performance associated with the predecessor managing owner. Performance on
and after February 23, 2015, reflects performance associated with the current managing owner Invesco
Capital Management LLC. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and
do not represent the returns an investor would receive if shares were traded at other times.

Effective Jan. 1, 2011, the Fund commenced tracking
DBIQ Opt Yield Diversified Comm Index ER (the
Renamed Index) (Symbol: DBLCIX). The Fund’s
Renamed Index is identical to the Interim Index except
with respect to the name of Index. The inception date
of January 2007 remains identical. Except as provided
in the immediately preceding sentence, all prior
underlying formulae, data (e.g., closing levels, measure
of volatility, all other numerical statistics and
measures) and all other characteristics (e.g., Base
Date, Index Sponsor, inception date, rolling, etc.) with
respect to the Renamed Index are identical to the
Interim Index.
The Index results from each discrete time period (pd)
reflect the closing levels of each applicable index that
the Fund tracked during the corresponding time pd.
Because the Fund collaborates its futures positions
primarily with US Treasuries, money market funds and
T-Bill ETFs, the results of DBIQ Optimum Yield
Diversified Commodity Index Total Return
(DBLCDBCT) are also displayed. With reference to the
total return version Index history, it followed the same
Index history as the excess return version except from
Jan. 1, 2011, forward, where the performance shown
is of the DBIQ Opt Yield Diversified Comm Index TR.
Please see invesco.com for indicative intra-day NAV
and last end-of-day NAV.
The S&P GSCI Commodity Index - Total Return™ (S&P
GSCI Commodity) is an unmanaged index used as a
measurement of change in commodity market
conditions based on the performance of a basket of
commodities. S&P GSCI Commodity Index - Total Return™ is a trademark of Standard & Poor’s, a
Division of The McGraw-Hill Companies, Inc.
Shares are not FDIC insured, may lose value and

**How the Fund Invests and Potential Advantages**

The Fund invests in liquid futures contracts trading on regulated exchanges and has the following potential advantages:

- **Enhanced commodity index:** The Fund follows the Index which utilizes an Optimum Yield™ methodology designed to provide a more sophisticated strategy for investing in commodities than that provided by conventional commodity indexes.
- **Cost savings:** The Fund does not incur either the cost of storing a physical commodity or the cost of entering into a commodity-linked note with a dealer, a cost that is usually much higher than entering into an exchange-traded futures contract.
- **Interest earned:** Owning physical commodities provides an investor with no interest income. The Fund collateralizes its futures contracts primarily with US Treasury securities, money market funds and T-Bill ETFs and earns interest on these securities. Interest income can enhance Fund returns.
- **Transparency and liquidity:** The Fund invests in liquid futures contracts at publicly available prices determined by trading on regulated futures exchanges. We believe that this allows the Fund to gain a more direct and cost-effective exposure to commodities than if the Fund either bought commodity-linked notes, which are not publicly priced, or less liquid futures contracts.

**Risk and Other Information**

This Fund issues a Schedule K-1.

Commodities and futures generally are volatile and are not suitable for all investors.

Please review the prospectus for breakeven figures for the Fund.

The value of the Shares of the Fund relate directly to the value of the futures contracts and other assets held by the Fund and any fluctuation in the value of its portfolio could adversely affect an investment in the Fund’s Shares.

The Fund is speculative and involves a high degree of risk. An investor may lose all or substantially all of an investment in the Fund.

The Intraday NAV is a symbol representing estimated value based on the most recent intraday price of underlying assets. Volatility is the annualized standard deviation of index returns. Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude. Alpha is a measure of performance on a risk-adjusted basis. Beta is a measure of risk representing how a security is expected to respond to general market movements. Smart Beta represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.

The Shares of the Fund are not deposits, interests in obligations of any Deutsche Bank AG, Deutsche Bank AG London Branch, Deutsche Bank Securities Inc., Deutsche Investment Management Americas Inc., or any of their respective subsidiaries or affiliates or any other bank (collectively, the “DB Parties”) and are not guaranteed by the DB Parties.
