Data as of March 31, 2019

Exploring the world for quality growth

An actively managed strategy that gives you access to opportunities outside the US. Our team's high-conviction process, designed to uncover quality growth companies, has delivered long-term results.

Experience our high-conviction approach

Competitive returns

1 A history of adding value: The fund has delivered a cumulative return of 553% since inception versus 253% for its benchmark.¹

Less volatility

2 A history of lower volatility: The fund outperformed its benchmark with less risk by focusing on attractively priced, quality growth companies.²

Index-beating results

3 A skilled partner for the long term: The fund outperformed its benchmark 91% of the time over all 88 quarterly five-year rolling periods since inception.³

Over 25 years of results

Since fund inception in 1992, a \$10,000 investment in the fund at NAV would have grown to \$65,312, beating its benchmarks.

Source: Lipper, Inc. Returns for Class A shares since inception on April 7, 1992 reflect the reinvestment of distributions, but does not include sales charges, which would have reduced the performance. Broad benchmark represented by the MSCI All Country World ex-US Index and the style benchmark represented by the Custom Invesco International Growth Index, which is comprised of the MSCI EAFE Growth Index from fund inception to Feb. 28, 2013, and the MSCI AC World ex-US Growth Index thereafter. Past performance does not guarantee comparable future results. Data of both indexes as of month-end closest to fund inception. Unmanaged index returns do not reflect any fees, expenses or sales charges. An investment cannot be made directly in an index.

- ¹ Sources: Invesco, FactSet Research Systems, Inc. Cumulative performance is for Class A shares at net asset value from April 7, 1992, through March 31, 2019. Benchmark is the Custom International Growth Index. Cumulative return for the benchmark from March 31, 1992, closest month-end to fund inception through March 31, 2019. An investment cannot be made directly in an index. Past performance cannot guarantee comparable future results.
- ² Source: StyleADVISOR. Benchmark is the Custom Invesco International Growth Index. Volatility as measured by standard deviation, which measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations. The standard deviation for the fund since inception was 15.51% and 15.82%, for the benchmark from April 30, 1992, closest month-end following inception of April 7, 1992, through March 31, 2019. An investment cannot be made directly in an index. Past performance cannot guarantee comparable future results.
- ³ Source: StyleADVISOR. Class A shares at net asset value as of March 31, 2019, from closest quarter-end following fund inception on April 7, 1992. Past performance does not guarantee comparable future results.

5-year standard deviation ⁴	11.24	-	-

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Had fees not been waived and/or expenses reimbursed currently or in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Class Y shares are available only to certain investors. See the prospectus for more information.

⁴ Source: StyleADVISOR. Beta is versus the Custom Invesco International Growth Index. Beta (cash adjusted) is a measure of relative risk and the slope of regression. Standard deviation measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations.

⁵ Holdings are subject to change and are not buy/sell recommendations.

⁶ Source: Invesco. Class A share and Class Y share results are at NAV.

About Risk

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile.

Stocks of medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The investment techniques and risk analysis used by the portfolio managers may not produce the desired results.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

NOT FDIC INSURED | MAY LOSE VALUE | NO BANK GUARANTEE

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their advisors for a prospectus/summary prospectus or visit invesco.com/fundprospectus.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

The MSCI EAFE® Growth Index is an unmanaged index considered representative of growth stocks of Europe, Australasia and the Far East. The MSCI All Country World ex-US Index is a market capitalization weighted index that includes growth companies in developed and emerging markets throughout the world, excluding the United States. An investment cannot be made directly in an index.
