

SPGP Invesco S&P 500 GARP ETF

As of June 30, 2019

Fund Description

The Invesco S&P 500 GARP ETF (Fund) is based on the S&P 500 Growth at a Reasonable Price Index (Index). The Fund will invest at least 90% of its total assets in the component securities that comprise the Index. The Index is composed of approximately 75 securities in the S&P 500® Index that have been identified as having the highest "growth scores" and "quality and value composite scores," calculated pursuant to the index methodology. The Index constituents are weighted based on their growth scores. The Fund and the Index are rebalanced and reconstituted semi-annually.

Effective at the close of markets on Friday, June 21, 2019, the Fund's name, investment objective, principal investment strategy and underlying index changed. Please see the Fund's prospectus for further information.

Market Price	23.92	11.55	20.61	13.64	-	15.41

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

A Smart Beta Portfolio

Fund Inception: June 16, 2011

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an

investment in the Fund.

S&P 500 Growth at a Reasonable Price Index* performance prior to 5/22/2015 reflects that of the original Underlying Index, RAFI Fundamental Large Growth Index. From 5/22/2015 to 6/21/2019, performance reflects that of the previous Underlying Index, Russell Top 200 Pure Growth Index. From 6/21/2019 forward, performance reflects that of the Underlying Index, S&P 500 Growth at a Reasonable Price Index AND IS NOT INTENDED FOR ANY THIRD PARTY USE.

The Russell Top 200® Index measures the performance of the largest cap segment of the US equity universe. The Russell Top 200 Pure Growth Index is composed of securities with strong growth

characteristics selected from the Russell Top 200® Index. The Russell 1000® Growth Index is an unmanaged index considered representative of large-cap growth stocks. The Russell 1000 Growth Index and the Russell Top 200 Index are trademark/service marks of the Frank Russell Co. Russell® is a trademark of the Frank Russell Co.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value

that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Beta** is a measure of risk representing how a security is expected to respond to general market movements. **Smart Beta** represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.
