Not Rated	41.89

Market overview

- The Bloomberg Barclays Municipal Bond Index returned 2.90% for first quarter of 2019, while the Bloomberg Barclays Municipal High Yield Bond Index returned 3.83%, marking the best first quarter for municipal bonds since 2014.
- The Federal Reserve's shift to a more accommodative monetary stance to begin the year took bond markets by surprise, leading economists to cut their 2019 predictions from two interest rate increases to one or none.
- The 35-day US government shutdown, ongoing US-China trade negotiations and Brexit developments combined to create a challenging environment for the first quarter. Nevertheless, the municipal market performed well amid the tailwind of favorable technical conditions, in particular, the seemingly insatiable demand for maturities of 10 years and shorter from US retail separately managed accounts (SMAs).
- With slowing economic growth, a pause in the Fed's interest rate increases, and new state and local tax (SALT) deductibility limits now front of mind for taxpayers, first quarter demand for municipal securities spiked to \$23.4 billion, resulting in the largest first quarter net inflows for municipal funds since 1992.
- At the close of the quarter, municipal fundamentals remained strong, in our view, and we believe retail investors' demand for tax-exempt securities should continue, particularly since ultra-high net worth investors with more complicated tax situations do not typically file returns until closer to the April 15th deadline.

Performance highlights

- Invesco Short Duration High Yield Municipal Fund Class A shares at net asset value (NAV) posted a return of 2.77% for the first quarter, outperforming its custom style-specific index, which returned 2.71%. (Please see the investment results table on page 2 for fund and index performance.)

Contributors to performance

- An overweight exposure in the health care sector contributed to relative performance during the quarter.
- Security selection among higher coupon bonds (5.00% - 5.49%, specifically) added to relative return.
- On the state level, security selection among Colorado and New Jersey domiciled issues added to relative performance during the quarter.

Detractors from performance

- An underweight exposure and security selection in the dedicated tax sector detracted from relative performance during the quarter.
- Security selection among high quality bonds (AAA and AA-rated specifically) also detracted from relative performance.
- On the state level, security selection among California and New York domiciled bonds detracted from relative return.

Positioning and outlook

- We maintain the fund's preference for revenue bonds over general obligation bonds. The largest sector allocations were in the health care and industrial development revenue/pollution control revenue sectors.
- Approximately 42% of fund holdings are non-rated by the national agencies, but are assigned internal proprietary ratings that allow us to take advantage of pricing anomalies in the high-yield municipal market.
- Our approach to investing aims to deliver a highly competitive yield while diversifying both sector and individual security risks.
- Looking ahead, we believe municipal fundamentals remain strong. Positive demand, combined with 2019 issuance estimated at a paltry \$350 billion to \$360 billion, may be enough to drive positive market performance.

Per the current prospectus
 Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least Dec. 31, 2019. See current prospectus for more information.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges.

1 Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. Pre-Refunded/Escrowed to Maturity (Prerefunded/ETM) bonds are issues backed by an escrow account, invested in US Treasuries, which is used to pay bondholders. Other includes bonds rated below single B and bonds currently not paying a coupon. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.

Class Y shares are available only to certain investors. See the prospectus for more information.

Income may be subject to state and local taxes. There is no guarantee that the fund's income will be exempt from federal income taxes, including the alternative minimum tax.

Diversification does not guarantee a profit or eliminate the risk of loss.

The Custom Invesco Short Duration High Yield Municipal Index consists of 60% S&P Municipal Bond High Yield Index, 40% S&P Municipal Bond Short Index. An investment cannot be made directly in an index.

The Bloomberg Barclays Municipal Bond Index is an unmanaged index considered representative of the tax-exempt bond market. An investment cannot be made directly in an index.

The Bloomberg Barclays Municipal High Yield Bond Index is an unmanaged index considered representative of noninvestment-grade bonds. An investment cannot be made directly in an index.

Option adjusted duration is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates. **Weighted average maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

About risk

All or a portion of the fund's otherwise tax-exempt income may be subject to the federal alternative minimum tax.

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Securities which are in the medium- and lower grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks, such as greater credit risk, market risk, liquidity risk, management risk, and regulatory risk.

The fund may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

The fund is considered non-diversified and may experience greater volatility than a more diversified investment.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.
