

# UUP Invesco DB US Dollar Index Bullish Fund

As of June 30, 2019

## Fund Description

The Invesco DB US Dollar Index Bullish Fund (Symbol: UUP) seeks to track changes, whether positive or negative, in the level of the Deutsche Bank Long USD Currency Portfolio Index - Excess Return™ (DB Long USD Currency Portfolio Index ER) over time, plus the income from the Fund's holdings of US Treasury securities, money market funds and T-Bill ETFs, less the Fund's expenses. The Fund is designed for investors who want a cost effective and convenient way to track the value of the U.S. dollar relative to a basket of the six major world currencies - the euro, Japanese yen, British pound, Canadian dollar, Swedish krona and Swiss franc (collectively, the "Basket Currencies"). The Index is a rules-based index composed solely of long U.S. Dollar Index futures contracts that trade on the ICE Futures US exchange (USD<sup>®</sup> futures contracts). The USD<sup>®</sup> futures contract is designed to replicate the performance of being long the U.S. dollar against the Basket Currencies.

This Fund is not suitable for all investors due to the speculative nature of an investment based upon the Fund's trading which takes place in very volatile markets. Because an investment in futures contracts is volatile, such frequency in the movement in market prices of the underlying futures contracts could cause large losses. Please see "Risk and Other Information" and the Prospectus for additional risk disclosures.

*Performance data quoted represents past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, and Shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data quoted. Returns less than one year are cumulative. Call 800-983-0903 for the most recent month-end performance. An investor cannot invest directly in an index. The Fund's performance from inception up to and including February 23, 2015, reflects performance associated with the predecessor managing owner. Performance on and after February 23, 2015, reflects performance associated with the current managing owner Invesco Capital Management LLC. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.*

## 10-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
DB Long USD Currency Portfolio Index ER	-	-	-	0.10	7.56
DB Long USD Currency Portfolio Index TR	-0.48	1.00	1.00	0.16	7.56
Gold Spot Fix pm	1.83	-0.16	-0.35	0.22	16.99

Alpha, beta and correlation are relative to the underlying index.

## Fund Inception: Feb. 20, 2007

Index history has certain inherent limitations and does not represent actual trading performance or returns of the Fund. Index history does not represent trades that have actually been executed and therefore may under or over compensate for the impact, if any, of certain market factors, such as illiquidity. No representation is being made that the Fund will or is likely to achieve profits or losses similar to the Index history.

Because the Fund collateralizes its futures positions primarily with US Treasuries, money market funds and T-Bill ETFs, the results of the Deutsche Bank Long USD Currency Portfolio Index - Total Return™ (DB Long USD Currency Portfolio Index TR) (DBUSD<sup>®</sup>) are also displayed. Please see [invesco.com](http://invesco.com) for indicative intraday NAV and last end-of-day NAV.

The Gold Spot Fix pm establishes the price per ounce of gold at 3pm London time as deemed by the five members of the London Gold Pool. The five members

determine where supply meets demand for their entire pending buy and sell orders to find a price balance.

**Shares are not FDIC insured, may lose value and have no bank guarantee.**

**Shares are not individually redeemable. Shares may be acquired from the Fund and tendered for redemption to the Fund in Creation and Redemption Units only, typically consisting of 200,000 Shares.**

A negative in Cash or Other, as of the date shown, is normally due to fund activity that has accrued or is pending settlement. Please see the website for complete holdings information. Holdings are subject to change.

### Why Invest in the Fund?

- **Diversify:** The Fund may help you to diversify your portfolio of US equities if the value of the US dollar continues to have low or negative correlation with US stock market performance.
- **Hedge:** Because foreign investments are priced in foreign currencies, if you are a US investor with foreign investments, you can lose money if the US dollar appreciates. An investment in the Fund may help you to hedge – or protect – your foreign investments from a rise in the value of the US dollar.
- **Seek profit:** The US dollar historically has experienced long periods of appreciation and depreciation. You can act on your view on whether the US dollar will appreciate or depreciate by investing in the Fund.
- **Transparent, liquid and convenient:** The Fund invests in the USD<sup>X</sup>® futures contract, which is an actively-traded contract listed on a regulated futures exchange. The Fund gives you convenient and immediate access to the performance of the US dollar because it trades on the NYSE Arca Exchange and you can purchase it in your securities brokerage account.
- **Earn interest:** The Fund collateralizes its USD<sup>X</sup>® futures contracts with cash, US Treasury securities, money market funds and T-Bill ETFs and earns interest on this collateral. Interest income can enhance Fund returns.

### About risk

The value of the Shares of the Fund relate directly to the value of the futures contracts and other assets held by the Fund and any fluctuation in the value of these assets could adversely affect an investment in the Fund's Shares.

The Fund is speculative and involves a high degree of risk. An investor may lose all or substantially all of an investment in the Fund.

This fund issues a Schedule K-1.

Please review the prospectus for breakeven figures for the Fund.

Investment in foreign exchange related products is subject to many factors that contribute to or increase volatility, such as national debt levels & trade deficits, changes in domestic & foreign interest rates, & investors' expectations concerning interest rates, currency exchange rates & global/regional political, economic/financial events & situations.

Currencies and futures generally are volatile and are not suitable for all investors.

The Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. Volatility is the annualized standard deviation of index returns. Beta is a measure of relative risk and the slope of regression. Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude. Alpha is a measure

of performance on a risk-adjusted basis. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

The Shares of the Fund are not deposits, interests in or obligations of any Deutsche Bank AG, Deutsche Bank AG London Branch, Deutsche Bank Securities Inc. or any of their respective subsidiaries or affiliates or any other bank (collectively, the "DB Parties") and are not guaranteed by the DB Parties.

Deutsche Bank Long US Dollar Index (USD<sup>X</sup>®) Futures Index-Excess Return™ and Deutsche Bank Long US Dollar Index (USD<sup>X</sup>®) Futures Index-Total Return™ (the "Indices") are products of Deutsche Bank AG and/or its affiliates.
