

Invesco S&P MidCap 400[®] Pure Value ETF

RFV

Fund description

The Invesco S&P MidCap 400[®] Pure Value ETF (Fund) is based on the S&P MidCap 400[®] Pure Value Index (Index). The Fund will invest at least 90% of its total assets in securities that comprise the Index. The Index measures the performance of securities that exhibit strong value characteristics in the S&P MidCap 400[®] Index. First, each security in the S&P MidCap 400 is assigned two "style scores" – one for value and one for growth – based on the characteristics of the issuer. The "value score" is measured using three factors: book-value-to-price ratio, earnings-to-price ratio, and sales-to-price ratio. The "growth score" is measured using three other factors: three-year sales per share growth, the three-year ratio of earnings per share change to price per share, and momentum (the 12-month percentage change in price). The ratio between the growth score and the value score is used to rank each stock as either deep value, blend or deep growth. Only the deep value stocks are selected and are factor weighted such that securities demonstrating the strongest value characteristics receive proportionally greater weights. The fund and the index are rebalanced annually.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. As the result of a reorganization on April 6, 2018, the returns presented reflect performance of the Guggenheim predecessor fund. Invesco is not affiliated with Guggenheim.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

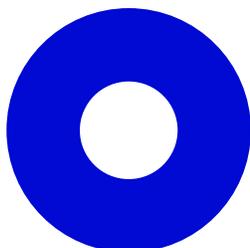

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

¹The S&P MidCap 400[®] Value Index is an unmanaged index considered representative of mid-cap value stocks.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

A value style of investing is subject to the risk that the valuations never improve or that the returns will trail other styles of investing or the overall stock markets.

Investments focused in a particular sector, such as consumer discretionary, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The Fund may become "non-diversified," as defined under the Investment Company Act of 1940, as amended, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the Index. Shareholder approval will not be sought when the Fund crosses from diversified to non-diversified status under such circumstances.

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
