

DWAQ Invesco DWA NASDAQ Momentum ETF

As of March 31, 2019

Fund Description

The Invesco DWA Nasdaq Momentum ETF (Fund) is based on the Dorsey Wright® Nasdaq Technical Leaders Index (DWA Nasdaq Technical Leaders Index). The Fund will normally invest at least 90% of its total assets in the securities that comprise the Index. The Index is comprised of approximately 100 securities from an eligible universe of approximately 1,000 securities of large capitalization companies from the Nasdaq US Benchmark Index. All securities in the universe are ranked using a proprietary relative strength (momentum) measure. Each security's score is based on intermediate and long-term price movements relative to a representative market benchmark and the other eligible securities. The top 100 securities are selected for the Index. Relative strength is the measurement of a security's performance in a given universe over time as compared to the performance of all other securities in that universe. The Fund and the Index are rebalanced and reconstituted quarterly.

Fund						
NAV	24.47	3.80	16.37	9.79	13.98	9.05
Market Price	24.94	3.63	16.37	9.76	14.00	9.04

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

5-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
Dorsey Wright Nasdaq Technical Leaders Index	-	-	-	0.57	17.21
Nasdaq Composite Index	-4.46	1.12	0.90	0.98	13.75

Alpha, beta and correlation are that of the underlying index.

A Smart Beta Portfolio

Fund Inception: May 1, 2003

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Nasdaq Composite Index returns shown are price return.

Dorsey Wright Nasdaq Technical Leaders Index® performance prior to Feb. 19, 2014 reflects that of the original Underlying Index Dynamic OTC Intellidex Index. From Feb. 19, 2014, forward, the Index performance reflects that of the Underlying Index Dorsey Wright Nasdaq Technical Leaders Index AND IS NOT INTENDED FOR ANY THIRD PARTY USE.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The Dynamic OTC IntellidexSM Index seeks to identify and select companies from The NASDAQ Stock Market LLC with superior risk-return profiles.

The Nasdaq Composite Index measures all Nasdaq domestic and international-based common stocks listed on The Nasdaq Stock Market.

The Nasdaq US Benchmark Index is a float adjusted market-cap-weighted index designed to track the performance of securities to the United States.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Momentum style of investing is subject to the risk that the securities may be more volatile than the market as a whole or returns on securities that have previously exhibited price momentum are less than returns on other styles of investing.

Investments focused in a particular sector, such as technology, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Fund may engage in frequent trading of securities in connection with the rebalancing or adjusting its Underlying Index.

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk.

A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value. The **30-Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The **30-Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers. **Beta** is a measure of risk representing how a security is expected to respond to general market movements. **Smart Beta** represents an alternative and selection index based methodology that seeks to outperform a benchmark or reduce portfolio risk, or both. Smart beta funds may underperform cap-weighted benchmarks and increase portfolio risk.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the

previous month.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

There is no relationship between Dorsey, Wright & Associates, LLC ("Dorsey Wright") and Invesco other than a license by Dorsey Wright to Invesco of certain Dorsey Wright trademarks, tradenames, investment models, and indexes (the "DWA IP"). DWA IP has been created and developed by Dorsey Wright without regard to and independently of Invesco, and/or any prospective investor. The licensing of any DWA IP is not an offer to purchase or sell, or a solicitation of an offer to buy any securities. A determination that any portion of an investor's portfolio should be devoted to any ETF product developed by Invesco or investment model developed by Dorsey Wright is a determination made solely by the investment advisor serving the investor or the investor himself, not Dorsey Wright.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund, investors should ask their advisor(s) for a prospectus or download one at invesco.com
