Rising interest rates can provide opportunities for investors

In September, the Federal Reserve raised rates for the eighth time since the Federal Open Market Committee began raising rates off their near-zero level in December 2015, reflecting rising confidence in the US economy. We expect the Fed to continue to raise rates at a measured pace that will likely result in a flatter yield curve.

In addition to being exempt from federal income tax (and may be exempt from state and local income taxes) there are additional benefits that municipal bonds funds may offer in a rising rate environment, including:

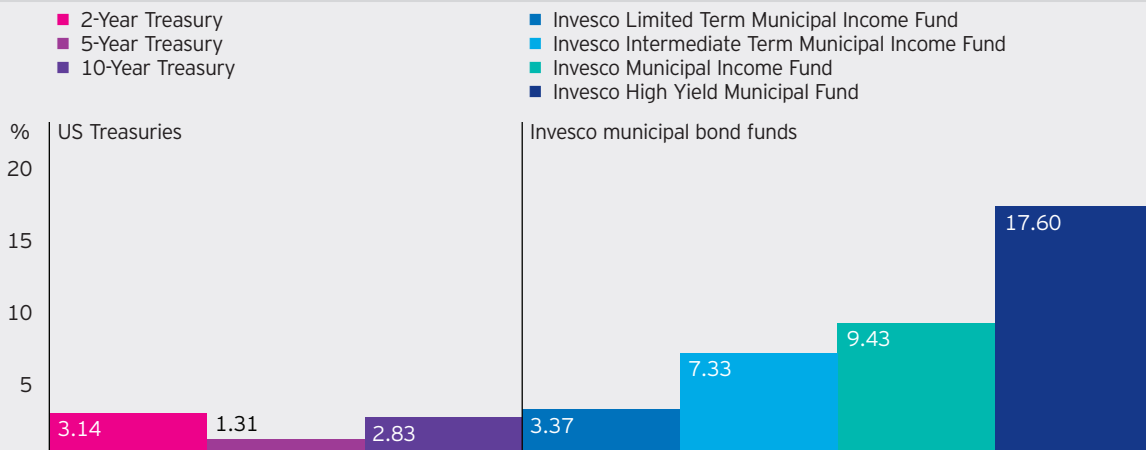

- **Price appreciation.** Invesco specializes in project and essential service revenue bonds, such as hospitals, universities, and electric power authorities. Rising interest rates may put downward pressure on the fund's share price, but cash flows to these revenue bonds typically increase due to an improving economy, which can result in price appreciation.
- **Market resilience.** Municipals are a pure play on the US economy and have held up well in the face of widespread capital markets events such as the oil spike of 2015, Brexit, credit spread widening, and other geopolitical macro events.¹ The nature of the issuances in the municipal bond market ties them to the performance of the US economy.
- **Portfolio diversifier.** Municipal bonds are not tied to the performance of the stock market, allowing investors a conduit to investing in the US economy with relatively low correlation to equity and Treasury markets.²

Invesco municipal funds produced greater returns vs. Treasuries during the last Fed hike

From June 2004 to June 2006, the Federal Reserve raised the federal funds target rate at a measured pace of 17 times over 24 months from a starting level of 1.00% to 5.25%, moving 0.25% each time.

Rate change %	2004-2006
Federal funds rate change	4.25
2-Year Treasury yield	2.50
5-Year Treasury yield	1.38
10-Year Treasury yield	0.61

Cumulative total return % 2004-2006

Sources: Barclays, Bloomberg L.P. for the period June 30, 2004, to June 29, 2006. Class A shares at NAV shown. Returns for Class A shares do not include sales charges. Past performance cannot guarantee future results. Treasuries are represented by the Bloomberg Barclays Bellwether Treasury 2-, 5- and 10-year indexes. An investment cannot be made in an index.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Performance shown at NAV does not include applicable front-end sales charges, which would have reduced the performance. Class A share performance reflects any applicable fee waivers or expense reimbursements. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Returns less than one year are cumulative, all others are annualized. The gross expense ratio on Class A shares for **Invesco High Yield Municipal Fund** is 1.06%, **Invesco Short Duration High Yield Municipal Fund** is 1.16%, **Invesco Municipal Income Fund** is 1.10%, **Invesco Intermediate Term Municipal Income Fund** is 0.91% and **Invesco Limited Term Municipal Income Fund** is 0.62%. Expenses are as of the fund's fiscal year-end as outlined in the fund's current prospectus.

Why Invesco?

- **Hands-on team approach.** Finding exceptional investment opportunities requires exceptional research. To that end, the Municipal Fixed Income team performs its own hands-on credit analysis, reviewing and rating each and every credit owned.
- **Specialists.** Our team's dedicated municipal bond professionals have more than 20 years average industry experience.
- **Market leaders.** As of September 30, 2018, the Municipal Fixed Income team managed \$26.6 billion on behalf of our clients and is ranked among the Top 10 municipal bond managers by assets.³
- **Active investing.** Our investment experts make informed decisions by combining experience-based knowledge with market trends to discover and exploit relative value opportunities.

Important information

Fixed income products are subject to risk, including, but not limited to, the effects of changing interest rates. There is no assurance that any investment or strategy will achieve its investment objective.

Fund distributions are primarily exempt from regular federal income tax. A portion of these distributions, however, may be subject to the federal alternative minimum tax and state and local taxes. The funds may also make distributions that are taxable as ordinary income or capital gains.

The opinions expressed are based on current market conditions and are subject to change without notice. These opinions may differ from those of other Invesco investment professionals.

Invesco does not provide tax advice. The tax information contained herein is general and is not exhaustive by nature. It is not intended or written to be used, and it cannot be used by any taxpayer, for the purpose of avoiding tax penalties that may be imposed on the taxpayer under US federal tax laws. Federal and state tax laws are complex and constantly changing. Investors should always consult their own legal or tax advisor for information concerning their individual situation.

A basis point is a unit that is equal to one one-hundredth of a percent.

Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude.

Bloomberg Barclays High Yield Municipal Bond Index is generally representative of bonds that are noninvestment grade, unrated or rated below Ba1.

Bloomberg Barclays Municipal Bond Index is an unmanaged index considered representative of the tax-exempt bond market.

Bloomberg Barclays US Treasury Index measures US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury.

S&P 500 Index is an unmanaged index considered representative of the US stock market.

US Treasury Bellwether indexes are used as a proxy for a risk-free dollar-denominated asset. The indices reset at the beginning of each month (consistent with existing Barclays Index Methodology), the index tracks the return of the current on-the-run treasury bond of a given maturity until it is reset again in the following month.

About risk

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

There is a risk that the Federal Reserve Board (FRB) and central banks may raise the federal funds and equivalent foreign rates. This risk is heightened due to the potential "tapering" of the FRB's quantitative easing program and other similar foreign central bank actions, which may expose fixed income investments to heightened volatility and reduced liquidity, particularly those with longer maturities.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Securities which are in the medium- and lower grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks, such as greater credit risk, market risk, liquidity risk, management risk, and regulatory risk.

The funds may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

The funds are subject to certain other risks. Please see the prospectus for more information regarding the risks associated with an investment in the fund.

©2018 Morningstar Inc. All rights reserved. The information contained herein is proprietary to Morningstar and/or its content providers. It may not be copied or distributed and isn't warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Ratings are as of the most recent quarter end and are subject to change monthly. A fund is eligible for a Morningstar rating three years after inception. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Ratings for other share classes may differ. Past performance does not guarantee future results.

Morningstar ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Ratings are calculated for funds with at least a three-year history. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable, excluding sales charges and including fees and expenses. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower.
