<b>“Dogs of the Dow”</b>	<b>Core allocation</b>	<b>Income</b>
<ul style="list-style-type: none"> <li>■ 10 highest dividend-yielding stocks in the Dow Jones Industrial Average (“DJIA”)</li> <li>■ Most potential for capital appreciation in the DJIA</li> <li>■ “Blue chip” companies have shown more potential resiliency to short-term market volatility</li> </ul>	<ul style="list-style-type: none"> <li>■ Large cap value allocation with potential for capital appreciation</li> <li>■ Quality “blue chip” companies that may be undervalued</li> <li>■ Potentially lower risk exposure</li> </ul>	<ul style="list-style-type: none"> <li>■ History of usually high and consistent dividends*</li> <li>■ May pay a consistent high dividend*</li> <li>■ Lower taxation potential on dividend income</li> </ul>

### Dividend yields\* can potentially exceed corporate bond yields – SDOW193 Deposited 5/6/19

With current dividend yields higher than corporate bond yields for a number of the world’s largest companies, many issuers have an incentive to buy back equities and issue debt at historically low interest rates.

Stock	Ticker	Price (\$)¹	52 week high (\$)¹	52 week low (\$)¹	SDOW193 stock dividend yields (%)¹	Company 5-year bond yield for comparison (%)²
3m Co	MMM	183.04	219.75	176.87	2.86	2.65

					<b>3.91</b>	<b>2.80</b>

1 Prices and yields are representative of values as of the close of the market on 5/6/19. Common stocks do not assure dividend payments and the amount of a dividend if any, may vary over time. There can be no guarantee or assurance that companies will declare dividends in the future or that if declared, they will remain at current levels or increase over time. The “Average” stock dividend yield listed at the bottom of this column is not indicative of the income that unitholders may receive.

2 Source: Bloomberg L.P. 5/6/19. Please note that these bond yields are for yield comparison purposes only and are not a recommendation to buy or sell the bond. Please also note that the selected bond yields are for 5-Year bonds issued by those individual companies and furthermore, similar longer maturity corporate bonds generally have higher yields and are more stable and secure than dividend yields. Further, the risks associated with the ownership of stocks are generally greater than the risks associated with the ownership of bonds. Bond income payments are a financial obligation of the issuer, while dividend payments are not.

### Invest with a leader\*\*

- \$146 billion. Equity and fixed income unit trusts since 1976.
- 70+ years. Industry experience in analysis, surveillance and securities selection.

### This unit trust structure

- Diversified.** A basket of stocks that are professionally selected and monitored.
- Disciplined.** A consistent, repeatable selection methodology and investment process.
- Defined.** A fixed portfolio that enables investors to always know what they own.

\*Past performance is no guarantee of future results, and the payment of dividends is never assured and may decrease over time.  
 \*\*As of March 31, 2019 through Invesco Unit Investment Trusts and predecessor firms.

---

### **About risk (SDOW193)**

There is no assurance a unit investment trust will achieve its investment objective. An investment in a unit trust is subject to market risk, which is the possibility that the market values of securities owned by a unit trust will decline and that the value of trust units may therefore be less than what you paid for them. Each trust is unmanaged and the portfolio is not intended to change during the trust's life except in limited circumstances. Accordingly, you can lose money investing in a unit trust. The trust should be considered as part of a long-term investment strategy and you should consider their ability to pursue it by investing in successive trusts, if available. You will realize tax consequences associated with investing from one series to the next.

Investors could experience dilution of their investment if the size of the portfolio is increased as Units are sold. There is no assurance that your clients' investment will maintain its proportionate share in the portfolio's profits and losses.

The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your Units. This may occur at any point in time, including during the initial offering period.

Common stocks do not assure dividend payments. Dividends are paid only when declared by an issuer's board of directors and the amount of any dividend may vary over time.

The trust holds a relatively small number of stocks. You may encounter more price volatility than would occur in an investment diversified among a greater number of stocks.

This Portfolio is concentrated in the health care sector. The ability of health care issuers, such as hospitals and hospital systems, to make payments on bonds depends on factors such as facility occupancy levels, government regulation, cost of malpractice insurance and claims, and government financial assistance (such as Medicare and Medicaid).

**Trust Objective:** The portfolio seeks above-average total return. The portfolio seeks to achieve its objective by investing in a portfolio of stocks.

The Dow Jones Industrial Average<sup>SM</sup> (DJIA<sup>SM</sup>) is a product of Dow Jones Indexes, a CME Group company, has been licensed for use and is an unmanaged index generally representative of the U.S. stock market. The Dow Jones Industrial Average (DJIA) is a price-weighted index of the 30 largest, most widely held stocks traded on the New York Stock Exchange. It is not possible to invest directly in an index. The "Dow Jones Industrial Average," "The Dow" and "DJIA" are service marks of Dow Jones Trademark Holdings, LLC ("Dow Jones") and have been licensed for use for certain purposes by Invesco and the trust. The trust, based on the Dow Jones Industrial Average, is not sponsored, endorsed, sold or promoted by Dow Jones, CME or their respective affiliates and none of them makes any representation regarding the advisability of investing in such product.
