Market overview

- Following a sharp selloff late last year, equity markets rebounded in the first quarter of 2019, fueled by optimism about a potential US/China trade deal and the Federal Reserve's indication that there would be no interest rate hikes in 2019, a surprising shift in monetary policy. The Fed's more accommodative stance provided a supportive environment for equities and fixed income, even as US economic data were mixed and overseas growth appeared to be slowing. Against this backdrop, the S&P 500 Index posted its best first quarter since 1998. All sectors within the index posted gains, with information technology, real estate, industrials and energy leading the way. Health care and financials were the quarter's weakest performers.

Performance highlights

- Invesco Technology Fund Class A shares at net asset value (NAV) had a positive return for the quarter, but underperformed its benchmark, the Nasdaq Composite Index. (Please see the investment results table on page 2 for fund and index performance.)

Contributors to performance

- Leading drivers of relative return were stock selection and an underweight in the biotechnology industry and stock selection and an overweight in the internet & direct marketing retail industry.
- Stock selection in the entertainment and interactive media & services industries added to relative return. Not having any exposure to the capital markets, banks, automobiles, food products and food & staples retailing industries was beneficial as well.
- Among the leading contributors to relative results was **Facebook**. The social media juggernaut reported strong earnings results that suggested improving traction with the Stories section of the Facebook app and little notable impact from new regulations in Europe. Management essentially reiterated its guidance for the full year 2019, while quarterly guidance was slightly better than expected.
- **Alibaba** was another notable contributor, partly due to benefits from China's improving macro-economic trends, but also stronger profitability and reduced spending.

Detractors from performance

- The largest detractors from relative results were holdings in the household durables and diversified telecommunications services industries. An overweight allocation in the life sciences tools & services industry and the fund's cash position also hampered relative performance.
- Among the individual detractors was **Sony**, whose quarterly operating profit, despite being in line with analysts' consensus, fell short of the high expectations that resulted from extremely strong sales of games software during the quarter. The profitability of the company's games was also weaker-than-anticipated during the quarter.
- New York-based video game holding company, **Take-Two Interactive**, also disappointed in the first quarter after the company released guidance suggesting slow online momentum for its recently released Red Dead Redemption 2.

Positioning and outlook

- The fund emphasizes innovation, transformative technology and opportunities that we expect to take market share from mature companies, including the game-changing technologies of mobile, security, cloud and biopharmaceuticals. We remain optimistic about technology spending given strong corporate balance sheets and companies' need to invest in more robust security solutions and to support future growth. In our opinion, the increased pace of health care innovation will continue to drive attractive long-term growth rates due to successful mapping of the human genome and recent productivity improvements, both of which have fostered faster and more effective targeting of promising therapeutics. We attempt to harness multi-year secular trends, which should benefit long-term investors regardless of near-term economic strength.

Investment results						
Average annual total returns (%) as of March 31, 2019						
Period	Class A Shares		Class C Shares		Class Y Shares	Style-Specific Index

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges.

The fund has limited public sales of its shares to certain investors. For more information on who may continue to invest in the fund, please see the prospectus.

Class Y shares are available only to certain investors. See the prospectus for more information.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

Nasdaq Composite Index is a broad-based, capitalization-weighted index of all Nasdaq domestic and international based common type stocks listed on The Nasdaq Stock Market. An investment cannot be made directly in an index.

The S&P 500® Index is an unmanaged index considered representative of the US stock market. An investment cannot be made directly in an index.

Forward price-to-earnings is a measure of price-to-earnings ratio using forecasted earnings.

About risk

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in

foreign currencies, political and economic instability, and foreign taxation issues.

Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile.

Stocks of medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

Many products and services offered in technology-related industries are subject to rapid obsolescence, which may lower the value of the issuers in this sector.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

NOT FDIC INSURED | MAY LOSE VALUE | NO BANK GUARANTEE

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their advisors for a prospectus/summary prospectus or visit [invesco.com/fundprospectus](https://www.invesco.com/fundprospectus).
