Data as of Sept. 30, 2019

Overall Morningstar Rating™

Intermediate Core-Plus Bond Category,
Class A shares

Intermediate Core-Plus Bond Category,
Class Y shares

Morningstar ratings are based on a risk-adjusted return measure that accounts for variation in a fund's monthly performance, placing more emphasis on the downward variations and rewarding consistent performance.

Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. Ratings are calculated for funds with at least a three year history. The overall rating is derived from a weighted average of three-, five- and 10-year rating metrics, as applicable, excluding sales charges and including fees and expenses. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. Class A shares received 3 stars for the overall, 3 stars for the three years and 4 stars for the five years. The Class Y shares received 4 stars for the overall, 4 stars for the three years and 5 stars for the five years. **The fund was rated among 539, 539 and 448 funds within the Morningstar category for the overall period, three and five years, respectively.** Morningstar ratings are as of Sept. 30, 2019, the most recent data available, and are subject to change every month. The top 10% of funds in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. Ratings for other share classes may differ due to different performance characteristics.

Past performance cannot guarantee comparable future results. An investment cannot be made directly in an index.

- 1 Fund returns shown are based on Class A shares at NAV from June 3, 2009 - Sept. 30, 2019.
- 2 Class A shares at NAV from June 2012 - Sept. 30, 2019, the first available monthly three-year return since fund inception.
- 3 Source: Invesco. Since Inception, June 3, 2009 to Sept. 30, 2019, the fund has had a low correlation of 0.19 to stocks, as measured by the S&P 500 Index. Correlation measures the degree to which two investments move in the same direction and magnitude, with 1.00 representing perfect correlation.

Sources: Invesco, FactSet Research Systems, Inc., Lipper, Inc. and StyleADVISOR as of Sept. 30, 2019. Benchmark is the Bloomberg Barclays US Aggregate Bond Index. Benchmark returns from fund inception are from May 31, 2009 - Sept. 30, 2019, closest month-end to fund inception. Diversification does not guarantee a profit or eliminate the risk of loss.

Quality income

An actively managed strategy focused on high-quality bonds aimed at providing a "core" foundation for your portfolio with income, growth and diversification potential.

1 Competitive returns

A history of adding value:

Since inception, the fund delivered higher cumulative returns than its benchmark, 59.08% versus 46.56%.¹

2 Consistent performance:

A better batting average than the benchmark:

The fund outperformed its benchmark 100% of the time over all monthly three-year rolling return periods.²

3 Compelling diversification

A complement to stocks: The fund has behaved differently from stocks, which may add greater overall portfolio diversification.³

Benchmark and peer group over the 3-year, 5-year and since inception periods

Performance summary

Average annual total returns (%) as of Sept. 30, 2019	Class A shares w/o sales charges Inception: 6/3/09	Class A shares w/max 4.25% sales charge	Class Y shares Inception: 6/3/09
1 year	9.57	4.95	9.83
3 years	3.43	1.94	3.69
5 years	3.81	2.91	4.06
Since inception	4.86	4.43	5.13

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized.

Investment objective
Seeks total return comprised of current income and capital appreciation.

Expense ratios (%)		
	% Net	% Total
Class A shares	0.76	0.84
Class C shares	1.51	1.59
Class R shares	0.51	0.59
Class R5 shares	1.01	1.09
Class R6 shares	0.45	0.46
Class Y shares	0.51	0.56

Per the current prospectus, Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least Dec. 31, 2019 and contractual management fee waivers in effect through at least June 30, 2020. See current prospectus for more information. See current prospectus for more information. Expenses are as of the fund's fiscal year end as outlined in the fund's current prospectus.

4 Standard deviation measures a fund's range of total returns and identifies the spread of a fund's short term fluctuations. SEC yield is a calculation for determining the amount of portfolio income, excluding non-income items as prescribed by the SEC. Yields are subject to change. Had fees not been waived and/or expenses reimbursed, the SEC yield would have been 2.38% for Class A shares and 2.74% for Class Y shares. Effective duration is a measure of a bond fund's price sensitivity to changes in interest rates. Weighted average effective maturity (WAM) is a measure of the length of time the average security in a bond fund will mature or be redeemed by its issuer. Effective duration and WAM are both estimated by the fund's portfolio managers and take mortgage prepayments, puts, adjustable coupons and potential call dates into account.

5 Ratings allocations are based upon ratings assigned by Standard & Poor's. A credit rating, as represented by the quality breakdown, is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative allocation to Cash is normally due to fund activity that is accrued or is pending settlement on the fact sheet's as of date. For more information on Standard and Poor's rating methodology, please visit standardandpoors.com and select "Understanding Ratings" under Rating Resources on the homepage.

About risk

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating. **Interest rate risk** refers to the risk that bond prices generally fall as interest rates rise and vice versa. The risks of investing in **securities of foreign issuers**, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues. **Mortgage- and asset-backed securities** are subject to prepayment or call risk, which is the risk that the borrower's payments may be received earlier or later than expected due to changes in prepayment rates on underlying loans. Securities may be prepaid at a price less than the original purchase value. **Derivatives** may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested. **Junk bonds** involve a greater risk of default or price changes due to changes in the issuer's credit quality. The values of junk bonds fluctuate more than those of high quality bonds and can decline significantly over short time periods. The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

NOT FDIC INSURED MAY LOSE VALUE NO BANK GUARANTEE

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their advisors for a prospectus/summary prospectus or visit invesco.com/fundprospectus.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

The Bloomberg Barclays U.S. Aggregate Index is an unmanaged index considered representative of the US investment-grade, fixed-rate bond market.

Class R shares are generally available only to employee benefit plans. Class R5 and Class R6 shares are primarily intended for retirement plans that meet certain standards and for institutional investors. Class Y shares are available only to certain investors.
