INVESCO HIGH INCOME TRUST II - Common Shares – Cusip: 46131F101

DISTRIBUTION NOTICE

Form 1099-DIV for the calendar year will report distributions for US federal income tax purposes. The Fund’s annual report to shareholders will include information regarding the tax character of Fund distributions for the fiscal year. This Notice is sent to comply with certain U.S. Securities and Exchange Commission requirements.

Effective August 1, 2018, the Board of Invesco High Income Trust II (NYSE: VLT) approved a Managed Distribution Plan (the “VLT Plan”) for the Fund, whereby the Fund increased its monthly dividend to common shareholders to a stated fixed monthly distribution amount based on a distribution rate of 8.5 percent of the closing market price per share as of August 1, 2018, the date the VLT Plan became effective.

The following tables set forth the estimated amounts of the current distribution and the cumulative distributions paid this fiscal year to date from the sources indicated. Shareholders should not draw any conclusions about the Fund’s investment performance from the amount of this distribution or from the terms of the Plan. All amounts are expressed per common share. The Fund estimates that it has distributed more than its income and net realized capital gains; therefore, a portion of your distribution is estimated to be a return of capital. A return of capital may occur, for example, when some or all of the money that shareholders invested in a Fund is paid back. A return of capital distribution does not necessarily reflect the Fund’s investment performance and should not be confused with “yield” or “income.” The amounts and sources of distributions reported in this 19(a) Notice are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend on the Fund’s investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send shareholders a Form 1099-DIV for the calendar year that will tell shareholders how to report these distributions for federal income tax purposes.

The monthly distributions are based on estimates and terms of the Fund's Plan. Monthly distribution amounts may vary from these estimates based on a multitude of factors. Changes in portfolio and market conditions may cause deviations from estimates. These estimates should not be taken as indication of a Fund's earnings and performance. The actual amounts and its sources may be subject to additional adjustments and will be reported after year end.

The Fund's Performance and Distribution Rate Information disclosed in the table below is based on the Fund's net asset value per share (NAV). Shareholders should take note of the relationship between the Fiscal Year-to-date Cumulative Total Return with the Fund's Cumulative Distribution Rate and the Average Annual Total Return with the Fund's Current Annualized Distribution Rate. The Fund's NAV is calculated as the total market value of all the securities and other assets held by the Fund minus the total liabilities, divided by the total number of shares outstanding. NAV performance may be indicative of a Fund's investment performance. The value of a shareholder's investment in the Fund is determined by the Fund's market price, which is based on the supply and demand for the Fund's shares in the open market.
