[†] The historical 12 month distributions per unit and each historical 12 month distribution rate of the securities included in the trust are for illustrative purposes only and are not indicative of the trust's actual distributions or distribution rate. The historical 12 month distributions per unit amount is based upon the weighted average of the actual distributions paid by the securities included in the trust over the 12 months preceding the trust's deposit date, and is reduced to account for the effects of fees and expenses which will be incurred when investing in a trust. Each historical 12 month distribution rate is calculated by dividing the historical 12 month distributions amount by the trust's initial \$10 public offering price per unit. There is no guarantee the issuers of the securities included in the trust will declare dividends or distributions in the future. Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the historical 12 month distributions per unit and each historical 12 month distribution rate will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the trust. The distributions paid by the trust, as well as the corresponding rates, may be higher or lower than the figures shown due to certain factors that may include, but are not limited to, a change in the dividends or distributions paid by issuers, actual expenses incurred, currency fluctuations, the sale of trust securities to pay any deferred sales charges, trust fees and expenses, variations in the trust's per unit price, or with the call, maturity or the sale of securities in the trust. Distributions made by certain securities in the trust may include non-ordinary income.

Objective

The Portfolio seeks above-average total return. The Portfolio seeks to achieve its objective by investing in a portfolio of stocks selected by Invesco Capital Markets Inc., the Sponsor, based on information provided by CFRA, an independent research firm.*

The stocks, referred to as the PowerPicks list, represent the collective “best ideas” by CFRA. The PowerPicks are drawn from all the economic sectors that comprise the S&P 500 Index. Creation of the PowerPicks annual portfolios began on January 1, 1997. In 2004, the mid-year PowerPicks list was introduced, followed by quarterly updates beginning in November 2008. The Portfolio contains companies that may be positioned for superior growth over the coming 12 months based on several factors, including proprietary research provided by CFRA. The Sponsor selected the final portfolio based upon the information supplied by CFRA. The stocks comprising the Portfolio may not necessarily represent the full list of stocks in a PowerPicks update, or the full list of stocks selected by CFRA.

You can now own the PowerPicks list in one simple Unit Investment Trust.

About risk

There is no assurance the trust will achieve its investment objective. An investment in this unit investment trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and that the value of trust units may therefore be less than what you paid for them. This trust is unmanaged and its portfolio is not intended to change during the trust's life except in limited circumstances. Accordingly, you can lose money investing in this trust. The trust should be considered as part of a long-term investment strategy and you should consider your ability to pursue it by investing in successive trusts, if available. You will realize tax consequences associated with investing from one series to the next.

Common stocks do not assure dividend payments. Dividends are paid only when declared by an issuer's board of directors and the amount of any dividend may vary over time. An issuer may be unwilling or unable to declare dividends in the future, or may reduce the level of dividends declared. This may result in a reduction in the value of your Units.

The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your Units. This may occur at any point in time, including during the initial offering period.

The Portfolio is concentrated in securities issued by companies in the information technology industry. The information technology industry faces risks related to rapidly changing technology, rapid product obsolescence, cyclical market patterns, evolving industry standards and frequent new product introductions. Negative developments in this industry will affect the value of your investment more than would be the case in a more diversified investment.

You could experience dilution of your investment if the size of the Portfolio is increased as Units are sold. There is no assurance that your investment will maintain its proportionate share in the Portfolio's profits and losses.

The Portfolio's performance might not sufficiently correspond to published hypothetical performance of the Portfolio's investment strategy. This can happen for reasons such as an inability to exactly replicate the weightings of stocks in the strategy or be fully invested, timing of the Portfolio offering or timing of your investment, and Portfolio expenses. The hypothetical performance presented is not the past performance of the Portfolio.

Value, blend and growth are types of investment styles. Growth investing generally seeks stocks that offer the potential for greater-than-average earnings growth, and may entail greater risk than value or blend investing. Value investing generally seeks stocks that may be sound investments but are temporarily out of favor in the marketplace, and may entail less risk than growth investing. A blend investment combines the two styles.

1 Including sales charges. As of deposit date.

2 Represents the value of 100 units on the deposit date. The value of the minimum investment amount of 100 units may be greater or less than \$1,000.00 following the deposit date.

3 Assuming a public offering price of \$10 per unit. There is no initial sales charge if the public offering price per unit is \$10 or less. If the public offering price per unit exceeds \$10, an initial sales charge is paid at the time of purchase. The per unit amount of the initial sales charge is 1.85% of the dollar amount that the public offering price per unit exceeds \$10.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses.
