

Invesco Next Gen Connectivity ETF

KNCT

Fund description

The Invesco Next Gen Connectivity ETF (Fund) is based on the STOXX World AC NexGen Connectivity Index (Index). The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index is comprised of companies with significant exposure to technologies or products that contribute to future connectivity through direct revenue. The Fund and the Index are rebalanced after the close of trading on the second Friday of March, June, September and December.

Effective after the close of markets on Aug. 25, 2023, the Fund's name, ticker, underlying index, index provider, investment objective, investment strategy and management fee changed. The Fund's name and ticker changed from Invesco Dynamic Networking ETF (ticker: PXQ) to the Invesco Next Gen Connectivity ETF (ticker: KNCT). The Fund's Index Provider changed from ICE Data Indices, LLC to STOXX Ltd. and its Underlying Index changed from the Dynamic Networking Intellidex Index to the STOXX World AC NexGen Connectivity Index; and as a result, the Fund's objective and strategy changed to seek to track the investment results of the new Underlying index by investing at least 90% of its total assets in securities that comprise the new Underlying Index. The Fund's management fee was also reduced from 0.50% to 0.40%. See the prospectus for more information.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency. Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

¹The S&P Composite 1500 Communications Equipment Index consists of all communications equipment stocks included in the S&P Composite 1500 Index.

²The Dynamic Networking Intellidex Index is comprised of common stocks of 30 US networking companies.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Investments focused in a particular sector, such as communication services and information technology, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Fund may engage in frequent trading of its portfolio securities in connection with the rebalancing or adjustment of the Underlying Index.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Companies associated with networking and connectivity technologies can be significantly affected by corporate capital expenditure trends and competitive pressures. Companies that develop and support such technologies may rely on a combination of patents, copyrights, trademarks and trade secret laws to establish and protect their proprietary rights in their products and technologies. There is no assurance that the steps taken by such companies will be adequate to prevent misappropriation of their technology or that competitors will not independently develop technologies that are substantially equivalent or superior.

Important information

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
