Performance data quoted represents past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data quoted. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. Market returns are based on the midpoint of the bid/ask spread at 4:00 p.m. EST and do not represent the returns an investor would receive if shares were traded at other times. Index returns do not reflect fund returns. Returns less than one year are cumulative. An investor cannot invest directly in an index.

About Risk:

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short-selling and margin maintenance requirements. Ordinary brokerage commissions apply. The fund's return may not match the return of the Underlying Index. The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the fund.

Investments focused in a particular sector, such as information technology, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Stocks of medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues
