Seek to enhance returns through active security selection and sector allocation and implement a passive approach to duration management.

\$31.3 billion in fixed income assets under management

Technology Automation

Continuous technological improvements to drive scale and create efficient, seamless trade execution.

22,254 custom fixed income client accounts

Why Government SMAs

Predictable income and maturity stream to limit interest rate risk

Portfolio Highlights

Predictable Income

Laddered structure with regular coupon payments and different maturity dates can provide a predictable fixed income stream

Interest Rate Diversification

Minimize interest rate risk by reinvesting maturing bond proceeds into securities with different yield profiles

Model Based Process

Model based ladder strategies, where the underlying client portfolio will be rebalanced to the model using the investment team's proprietary trading technology

Portfolio Targets

Targeted Duration	2.5 Years
Maturity Range	0 to 5 Years
Holdings Range	20
Cash Range	0% to 5%
Currency	U.S. Dollar
Asset Allocation	100% U.S. Treasury

Source: Invesco, As of 3/31/2026

Diversification does not guarantee a profit or eliminate the risk of loss. There can be no assurance that any investment process or strategy will achieve its investment objective.

Disclosure

Definitions

Average Credit Rating - An internal measurement created by Invesco Managed Accounts LLC and is calculated by taking the highest rated of the 3 major rating agencies (S&P, Moody's, and Fitch) at the security level. It is then changed into a numerical value, asset weighted and then calculated to be shown at the portfolio level in Standard & Poor's format. Not-rated securities are not included in the average credit rating calculation.

Coupon - The average rate of the coupons of the bonds in the portfolio, weighted based on each holding size relative to the portfolio.

Completion Fund - A no-fee mutual fund to give SMA clients access to high-yield municipal sectors that cannot be efficiently held as individual securities within a standard account. The Invesco SMA Municipal Bond Fund is a no-fee fund for exclusive use in Income Plus SMAs. Portfolio breakdowns are calculated using a weighted average of all individual positions including the portfolio statistics for the completion fund which is a weighted average of all the underlying holdings in the fund.

Current Yield - Calculated by dividing the annual coupon payment by the bond's current market price.

Effective Duration - Calculation for bonds with embedded options that takes into account that expected cash flows fluctuate as interest rates change. This figure is expressed in years.

High Yield Bonds - Rated below investment grade, as defined by S&P BB or below. High yield securities involve greater risk and are less liquid than higher grade issuers. Changes in general economic conditions, financial conditions of the issuers and in interest rates may adversely impact the ability of issuers to make timely payments of interest and principal.

Taxable Equivalent Yield (TEY) - Is the return that a tax-exempt bond needs to possess for its yield to equal the yield on a comparable taxable bond. This is a tool investors can use to compare the returns between a tax-free and taxable bond alternative. It is calculated by taking the tax-free bond yield and dividing it by one minus the tax rate.

Yield to Maturity - The yield an investor would receive if all bonds were held to maturity.

Yield to Worst - The lowest possible yield an investor can receive on a bond without the issuer defaulting.
