Invesco KBW Premium Yield Equity REIT ETF

**Fund description**
The Invesco KBW Premium Yield Equity REIT ETF (Fund) is based on the KBW Nasdaq Premium Yield Equity REIT Index (Index). The Fund generally will invest at least 90% of its total assets in the securities of small- and mid-cap equity REITs that have competitive dividend yields and are publicly-traded in the US that comprise the Index. Keefe, Bruyette Woods, Inc. and Nasdaq, Inc. compile, maintain and calculate the Index, which is a modified-dividend yield-weighted index that seeks to reflect the performance of such companies. The Fund and the Index are rebalanced and reconstituted on the third Friday of March, June, September and December.

**Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.**

**Investment risks**

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund’s return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Investments focused in a particular sector, such as real estate, are subject to greater risk and are more greatly impacted by market volatility, than more diversified investments.

REITs are pooled investment vehicles that trade like stocks and invest substantially all of their assets in real estate and may qualify for special tax considerations. REITs are subject to risks inherent in the direct ownership of real estate. A company’s failure to qualify as a REIT under federal tax law may have adverse consequences to the REIT’s shareholders. REITs may have expenses, including advisory and administration, and REIT shareholders will incur a proportionate share of the underlying expenses.

Securities that pay high dividends as a group can fall out of favor with the market, causing such companies to underperform companies that do not pay high dividends.

**Glossary**

**30 Day SEC Unsubsidized Yield** reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

**30 Day SEC Yield** is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

**Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

**Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock’s market price to a company’s net asset value.

**Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

**Weighted Average Return on Equity** is net income divided by net worth.

**Weighted Market Capitalization** is the sum of each underlying securities market value.
