Invesco Unit Trusts

Closed-End Strategy: Select Opportunity
Portfolio 2022-4
A specialty unit trust

Objective
The Portfolio seeks to provide current income and the potential for capital appreciation. The Portfolio seeks to achieve its objective by investing in a portfolio consisting of common stocks of closed-end investment companies (known as “closed-end funds”) that invest in various global fixed income and equity securities. As indicated by the information publicly available at the time of selection, none of the Portfolio’s closed-end funds employed “structural leverage” through the issuance of preferred shares or debt securities.

Portfolio composition (As of the business day before deposit date)

| Covered Call | BlackRock Enhanced Capital and Income Fund, Inc. |
| Sector Equity | BlackRock Enhanced Equity Dividend Trust |
| Eaton Vance Enhanced Equity Income Fund | EOI |
| Madison Covered Call & Equity Strategy Fund | MCN |
| Nuveen Dow 30® Dynamic Overwrite Fund | DIAX |
| Nuveen S&P 500 Buy-Write Income Fund | BMX |
| Voya Global Equity Dividend and Premium Opportunity Fund | IGD |
| Global Allocation | BlackRock ESG Capital Allocation Trust |
| Thornburg Income Builder Opportunities Trust | TBLD |
| Global Equity | John Hancock Hedged Equity & Income Fund |
| Global Income | abrdn Global Infrastructure Income Fund |

The trust portfolio is provided for informational purposes only and should not be deemed as a recommendation to buy or sell the individual securities shown above.

Portfolio diversification (As of the business day before deposit date)

- Covered Call 34.95%
- Sector Equity 29.85%
- U.S. Equity 10.33%
- Global Allocation 9.94%
- Global Equity 4.99%
- Global Income 4.98%
- U.S. Allocation 4.96%

Selection process
The strategy selects investments with the goal of providing monthly income from a diversified portfolio of closed-end funds. The selection process is summarized below:

Closed-end Fund Universe: Structural Leverage Screen
Exclude funds that employed structural leverage through the issuance of preferred shares or debt securities, as indicated by information publicly available at the time of selection

Fundamental Analysis
Assessment of fund manager performance, valuation, dividend level and sustainability, diversification, credit quality and liquidity

Closed-End Strategy: Select Opportunity Portfolio

For illustrative purposes only. Diversification does not guarantee a profit or eliminate the risk of loss.

See page 2 for the footnotes on trust specifics.

About risk

There is no assurance the trust will achieve its investment objective. An investment in this unit investment trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and that the value of trust units may therefore be less than what you paid for them. Recently, an outbreak of a respiratory disease caused by a novel coronavirus, COVID-19, has spread globally in a short period of time, resulting in the disruption of, and delays in, production and supply chains and the delivery of healthcare services and processes, as well as the cancellation of organized events and educational institutions, quarantines, a decline in consumer demand for certain goods and services, and general concern and uncertainty. COVID-19 and its effects have contributed to increased volatility in global markets, severe losses, liquidity constraints, and lowered yields. The duration of such effects cannot yet be determined but could be present for an extended period of time and may adversely affect the value of your units. This trust is unmanaged and its portfolio is not intended to change during the trust's life except in limited circumstances. Accordingly, you can lose money investing in this trust. The trust should be considered as part of a long-term investment strategy and you should consider your ability to pursue it by investing in successive trusts, if available. You will realize tax consequences associated with investing from one series to the next.

You could experience dilution of your investment if the size of the Portfolio is increased as units are sold. There is no assurance that your investment will maintain its proportionate share in the Portfolio's profits and losses.

The Portfolio invests in shares of closed-end funds. Shares of these funds tend to trade at a discount from their net asset value and are subject to risks related to factors such as management's ability to achieve a fund's objective, market conditions affecting a fund's investments and use of leverage, if any. You will bear not only your share of the Portfolio's expenses, but also the expenses of the underlying funds. By investing in other funds, the Portfolio incurs greater expenses than you would incur if you invested directly in the funds.

The value of fixed income securities in the closed-end funds will generally fall if interest rates rise. In a low interest rate environment risks associated with rising rates are heightened. The negative impact on fixed income securities from any interest rate increases could be swift and significant. No one can predict whether interest rates will rise or fall in the future.

Certain of the closed-end funds may invest in securities rated below investment grade and considered to be “junk” or “high-yield” securities. Securities rated below “BBB” by Standard & Poor's or below “Baa3” by Moody's are considered to be below investment grade. These securities are considered to be speculative and are subject to greater market and credit risks. Accordingly, the risk of default is higher than with investment grade securities. In addition, these securities may be more sensitive to interest rate changes and may be more likely to make early returns of principal.

Certain closed-end funds in the Portfolio invest in corporate bonds. Corporate bonds are debt obligations of a corporation, and as a result are generally subject to the various economic, political, regulatory, competitive and other such risks that may affect an issuer. Like other fixed income securities, corporate bonds generally decline in value with increases in interest rates. During periods of market turbulence, corporate bonds may experience illiquidity and volatility. During such periods, there can be uncertainty in assessing the financial condition of an issuer. As a result, the ratings of the bonds in certain closed-end funds in the Portfolio may not accurately reflect an issuer's current financial condition, prospects, or the extent of the risks associated with investing in such issuer's securities. A security issuer may be unable to make payments of interest, dividends or principal in the future. This may reduce the level of dividends a closed-end fund pays which would reduce your income and cause the value of your units to fall.

The financial condition of a security issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your units. This may occur at any point in time, including during the primary offering period.

Certain of the closed-end funds in the Portfolio invest in securities of foreign issuers, presenting risks beyond those of U.S. issuers. These risks may include market and political factors related to an issuer's foreign market, international trade conditions, less regulation, smaller or less liquid markets, increased volatility, differing accounting and tax practices and changes in the value of foreign currencies which may have both economic and tax consequences.

The Portfolio invests significantly in funds that write call options on their assets. The use of options may require an underlying fund to sell portfolio securities at inopportune times or at prices other than current market values, may limit the amount of appreciation a fund can realize on an investment, or may cause a fund to hold a security it might otherwise sell. To the extent an underlying fund purchases options pursuant to a hedging strategy, the fund could lose its entire investment in the option.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. For this and more complete information about the trust(s), investors should ask their financial professional(s) for a prospectus or download one at invesco.com/uit.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Invesco unit investment trusts are distributed by the Sponsor, Invesco Capital Markets, Inc. and broker dealers including Invesco Distributors, Inc. Both firms are indirect, wholly owned subsidiaries of Invesco Ltd.
