Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com](https://www.invesco.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Returns less than one year are cumulative; all others are annualized. Index source: RIMES Technologies Corp. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance.

Effective Sept. 30, 2020, the Invesco International Select Equity Fund changed its marketed benchmark from the MSCI ACWI Ex USA Growth Index (NR) to the MSCI ACWI Ex USA Index (NR) to better reflect the Fund's investment approach. For performance information related to the MSCI ACWI Ex USA Growth Index, please see the Fund's product page on [invesco.com/us](https://www.invesco.com/us). **Class Y and R6 shares have no sales charge; therefore, performance is at NAV. Class Y shares are available only to certain investors. Class R6 shares are closed to most investors. Please see the prospectus for more details.**

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

The MSCI All Country (AC) World Ex-U.S. Index is an index considered representative of developed and emerging market stock markets, excluding the US. The index is computed using the net return, which withholds applicable taxes for non-resident investors. An investment cannot be made directly in an index.

About Risk

Stock and other equity securities values fluctuate in response to activities specific to the company as well as general market, economic and political conditions.

Depository receipts involve many of the same risks as a direct investment in foreign securities, and issuers of certain depository receipts are under no obligation to distribute shareholder communications to the holders or to pass through to them any voting rights.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty, and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile.

Many countries in the European Union are susceptible to high economic risks associated with high levels of debt, notably due to investments in sovereign debts of European countries such as Greece, Italy, and Spain.

The Fund is considered non-diversified and may experience greater volatility than a more diversified investment.

Preferred securities may include provisions that permit the issuer to defer or omit distributions for a certain period of time, and reporting the distribution for tax purposes may be required, even though the income may not have been received. Further, preferred securities may lose substantial value due to the omission or deferment of dividend payments.

The fund may from time to time invest a substantial amount of its assets in securities of issuers located in a single country or a limited number of countries.

Stocks of small and medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Note: Not all products available at all firms. Financial professionals, please contact your home office.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

Alpha (cash adjusted) is a measure of performance on a risk-adjusted basis. **Beta** (cash adjusted) is a measure of relative risk and the slope of regression. **R-squared** is the percentage of a fund or security's movements that can be explained by movements in a benchmark index. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio indicates better risk-adjusted performance. **Standard deviation** measures a fund's range of total returns and identifies the spread of a fund's short-term fluctuations. **Tracking Error** is defined as the expected standard deviation of a portfolio's excess return over the benchmark index return. The **up and down capture** measures how well a manager was able to replicate or improve on periods of positive benchmark returns and how severely the manager was affected by periods of negative benchmark returns.

Past performance is no guarantee of future results. Open-end mutual funds and exchange-traded funds are considered a single population for comparison purposes. For factsheets that display Morningstar Star Ratings; Ratings are calculated for funds with at least a three year history. The overall rating is derived from a weighted average of three-, five- and 10- year rating metrics, as applicable, excluding sales charges and including fees and expenses. Had fees not been waived and/or expenses reimbursed currently or in the past, the Morningstar rating would have been lower. Ratings are as of the most recent quarter end and are subject to change every month. The top 10% of fund in a category receive five stars, the next 22.5% four stars, the next 35% three stars, the next 22.5% two stars and the bottom 10% one star. Ratings for other share classes may differ due to different performance characteristics.

Before investing, consider the Fund's investment objectives, risks, charges and expenses. Visit [invesco.com/fundprospectus](https://www.invesco.com/fundprospectus) for a prospectus/summary prospectus containing this information. Read it carefully before investing.
