

Small caps: Great things can come in small packages

In general, small-cap stocks are often overlooked in favor of bigger, more established companies. But what small caps lack in broad recognition, historically they have made up for in long-term performance. And small companies can complement large-cap stocks by providing diversification and exposure to a wider variety of growth opportunities.

1 Are you as diversified as you think?

Investing in traditional large-cap indexes can result in only a handful of stocks driving the performance of your whole portfolio.

2 Small cap value stocks are attractively valued versus large caps

We see compelling opportunity for small cap value to potentially outperform the S&P 500.

Invesco Small Cap Value Fund (Limited Offering)*

A fund designed to invest in small companies that aren't fully appreciated by the market. The fund seeks to provide investors exposure to smaller-cap companies whose stock price has become disconnected from the intrinsic value¹ of the business. Maintaining a longer-term investment horizon allows this traditional approach to value investing to play out across cycles.

Reasons to consider this fund

Patient approach
Focusing on companies' intrinsic value¹ creates opportunities where investors may have overreacted to market noise.

A high-conviction approach
We use a highly selective process to identify undervalued stocks, resulting in a portfolio that is distinct from the benchmarks.

Time tested
Our tried and true process has been tested through various market and economic cycles.

Investment objective: The Fund's investment objective is long-term capital appreciation.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com](https://www.invesco.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Index source: FactSet Research Systems Inc. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance.

Class Y and R6 shares have no sales charge; therefore, performance is at NAV. Class Y shares are available only to certain investors. Class R6 shares are closed to most investors. Please see the prospectus for more details. Performance shown prior to the inception date of Class R6 shares is that of Class A shares and includes the 12b-1 fees applicable to Class A shares. Please keep in mind double-digit returns are not normal and cannot be maintained.

About risk

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty, and management risks. An investment in a derivative could lose more than the cash amount invested.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Investments in real estate related instruments may be affected by economic, legal, or environmental factors that affect property values, rents or occupancies of real estate. Real estate companies including REITs or similar structures, tend to be small and mid cap companies, and their shares may be more volatile and less liquid.

Stocks of small and medium-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

A value style of investing is subject to the risk that the valuations never improve or that the returns will trail other styles of investing or the overall stock markets.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risk, charges and expenses.
