

Invesco Fundamental High Yield Corporate Bond ETF

PHB

Fund description

The Invesco Fundamental High Yield® Corporate Bond ETF (Fund) is based on the RAFI® Bonds US High Yield 1-10 Index (Index). The Fund will generally invest at least 80% of its total assets in the securities that comprise the Index. The Underlying Index is comprised of U.S. dollar-denominated high yield corporate bonds which are SEC-registered securities, Section 3(a)(2) securities, or Rule 144A securities under the Securities Act and whose issuers are public companies domiciled in the United States. Only investible non-convertible, non-exchangeable, non-zero, fixed coupon high-yield corporate bonds qualify for inclusion in the Index. Based on the Fundamental Index® methodology developed by Research Affiliates, LLC, the Index is compiled and calculated by ALM Research Solutions, LLC. The Fund does not purchase all of the securities in the Index; instead, the Fund utilizes a "sampling" methodology to seek to achieve its investment objective. The Fund and the Index are rebalanced monthly and reconstituted annually in March.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower.

Fund inception: November 15, 2007

Not a Deposit Not FDIC Insured Not Guaranteed by the Bank May Lose Value Not Insured by any Federal Government Agency.

Shares are not individually redeemable. Shares may be acquired from the Fund and tendered for redemption to the Fund in Creation and Redemption Units only, typically consisting of 100,000 Shares.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The Wells Fargo High Yield Bond Index is comprised of US dollar-denominated bonds registered for sale in the United States whose issuers are public companies listed on major US stock exchanges.

¹The Bloomberg US Corporate High Yield Index covers the US dollar-denominated, non-investment grade, fixed-rate, taxable corporate bond market.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

An issuer may be unable or unwilling to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuers credit rating.

The Fund may hold illiquid securities that it may be unable to sell at the preferred time or price and could lose its entire investment in such securities.

Reinvestment risk is the risk that a bond's cash flows (coupon income and principal repayment) will be reinvested at an interest rate below that on the original bond.

The Fund may invest in privately issued securities, including 144A securities which are restricted (i.e. not publicly traded). The liquidity market for Rule 144A securities may vary, as a result, delay or difficulty in selling such securities may result in a loss to the Fund.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

The Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the underlying Index, and may be subject to greater volatility.

The values of junk bonds fluctuate more than those of high quality bonds and can decline significantly over short time periods.

Investments focused in a particular sector, such as consumer discretionary, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

Important information

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

Fundamental Index®, Research Affiliates®, Fundamental High Yield® and all other Research Affiliates trademarks, trade names, patented and patent-pending concepts are the exclusive property of Research Affiliates, LLC. Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Credit ratings are assigned by Nationally Recognized Statistical Rating Organizations based on assessment of the credit worthiness of the underlying bond issuers. The ratings range from AAA (highest) to D (lowest) and are subject to change. Not rated indicates the debtor was not rated, and should not be interpreted as indicating low quality. Futures and other derivatives are not eligible for assigned credit ratings by any NRSRO and are excluded from quality allocations. For more information on rating methodologies, please visit the following NRSRO websites: www.standardandpoors.com and select 'Understanding Credit Ratings' under Rating Resources 'About Ratings' on the homepage.; www.ratings.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage.

Effective Duration is a measure of a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for bonds with embedded options.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.
