Market overview

- + Emerging market equities were marred by volatility in the third quarter, mainly driven by the ongoing trade dispute between the US and China.
- + China's equity indexes and ADRs (American Depository Receipts) of Chinese stocks continued to be whipsawed as the anticipated outcome of US/China trade issues dampened global growth.
- + Protests in Hong Kong escalated as the quarter drew to a close, bringing this international business hub to a standstill. Elsewhere, Japan and South Korea locked horns in a trade war.
- + Emerging markets underperformed developed market equities, largely due to the drag from Asian indexes.

Positioning and outlook

- + We added several new holdings during the quarter, including Russian internet portal company **Yandex**, Brazil-based retailer **Lojas Americanas** and **Samsung Biologics**, a manufacturer of bio-health care products based in South Korea (1.55%, 1.04% and 1.09% of total net assets, respectively). We exited positions in South Korean cosmetics company **Cosmax**, Hungary-based **OTP Bank** and **Moscow Exchange**, which provides access to Russian financial markets (all 0.00% of total net assets).
- + Since the beginning of the quarter, investors have rotated away from momentum stocks to value stocks and increased their aggregate exposure to Chinese equities, despite macroeconomic turbulence.
- + We look to avoid short-term tactical positions and macroeconomic calls. We remain focused on applying our well-established, bottom-up, research intensive approach to identifying extraordinary companies with durable earnings growth, sustainable advantages, real options that will unfold over time, and appropriate valuations.

Performance highlights

- + Invesco Oppenheimer Emerging Markets Innovators Fund Class A shares at net asset value (NAV) outperformed its benchmark index for the quarter. (Please see the investment results table on page 2 for fund and index performance.)

Contributors to performance

- + An overweight in the information technology (IT) sector was a key contributor to relative return. Within IT, Taiwan-based integrated circuits producer **Silergy** was a notable contributor. Brazil-based financial technology services company **Pagseguro Digital** was also among the largest contributors to relative results.
- + Fund holdings in the financials and communication services sectors outperformed those of the benchmark index, adding to relative results.
- + Geographically, stock selection in China and Argentina had the largest positive effect on relative return. Stock selection and an overweight in Taiwan were beneficial as well.
- + China-based smartphone camera components supplier **Sunny Optical Technology** was the fund's leading individual contributor for the quarter. The company benefited from an increase in HSL (handset lens) sales.

Detractors from performance

- + Underweights in the consumer staples and utilities sectors detracted from relative return.
- + Fund holdings that detracted from relative return include China-based e-commerce service **Baozun** and Argentina-based technology service provider **Globant**.
- + Geographically, stock selection and an underweight in Brazil hampered relative return. Underweights in Russia and Thailand also detracted from relative performance.
- + **Fila Korea**, the South Korean luxury sportswear company, was the largest individual detractor for the quarter. The company reported a slowdown in sales across all regions. We are keenly monitoring management's strategy and the competitive landscape.

The fund's positioning versus the MSCI Emerging Markets Mid Cap Index (% underweight/overweight)

Investment results

Average annual total returns (%) as of Sept. 30, 2019

Period	Class A Shares		Class C Shares		Class Y Shares	Style-Specific Index

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges.

Expense ratios	% net	% total	Asset mix (%)	
Class A Shares	1.70	1.71	Intl Common Stock	92.83
Class C Shares	2.45	2.46	Cash	8.33
Class Y Shares	1.45	1.46	Other	-1.16

Per the current prospectus

Net = Total annual operating expenses less any contractual fee waivers and/or expense reimbursements by the adviser in effect through at least May 28, 2021. See current prospectus for more information.

A negative in Cash or Other, as of the date shown, is normally due to fund activity that has accrued or is pending settlement.

For more information you can visit us at www.invesco.com/us

Class Y shares are available only to certain investors. See the prospectus for more information.

Asset allocation/diversification does not guarantee a profit or eliminate the risk of loss.

The fund holdings are organized according to the Global Industry Classification Standard, which was developed by and is the exclusive property and service mark of MSCI Inc. and Standard & Poor's.

The MSCI Emerging Markets Mid Cap Index includes mid-cap representation across 26 emerging markets countries. An investment cannot be made directly in an index.

About risk

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

In general, stock values fluctuate, sometimes widely, in response to activities specific to the company as well as general market, economic and political conditions.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.

NOT FDIC INSURED | MAY LOSE VALUE | NO BANK GUARANTEE

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses.
