Forward thinking-companies streamline to strengthen their positions.

Aging

Demographic trends are changing consumption patterns in many sectors.

Invesco Global Fund

EQUITY | INTERNATIONAL AND GLOBAL EQUITY

A: OPPAX R6: OGLIX Y: OGLYX

A fund designed to invest in the world's top-performing companies

The fund is our flagship global equity product, seeking to offer investors exposure to high-quality companies with sustainable competitive advantages that are positioned to potentially benefit from long-term structural growth trends.

Reasons to consider this fund

- 1 55+ year history**

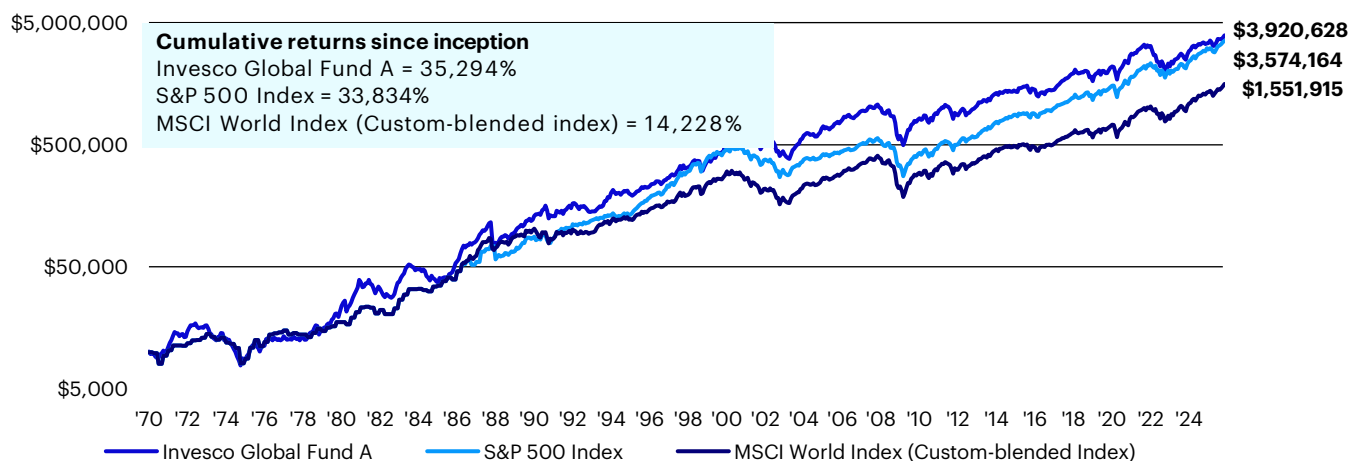

The fund is one of the first global equity strategies in the industry, launching in 1969.
- 2 Power of compounding**

Positions are bought at perceived attractive prices, and given the fund's low 7% turnover,¹ this portfolio of organic growers has the potential to compound economic returns.
- 3 Strong track record**

The portfolio manager runs the fund with a consistent process and has demonstrated a long-term track record of outperformance.

Consistent philosophy, process, and investment team

Over the course of five decades, the Global Equity team has provided sustained outperformance

Source: Morningstar, as of 3/31/26. Performance quoted above includes changes in net asset value and reinvested distributions, but not the maximum applicable sales charge. If sales charge was considered, performance quoted above would be lower. An investment cannot be made into an index. Index performance includes total returns from when first available. **Past performance does not guarantee future results.**

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com](https://www.invesco.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Index source: FactSet Research Systems Inc. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance.

Invesco Global, International & Regional Equities Group²

Annual Total Expense Ratios: Class A 1.03%; Class R6 0.70%; Class Y 0.80%

1. Class A inception date: 12/22/1969, Class R6 inception date: 01/27/2012, Class Y inception date: 11/17/1998.

| Calendar year total returns (%) | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 |
|---------------------------------|------|-------|--------|-------|-------|-------|--------|-------|-------|-------|
| Class A shares at NAV | 0.15 | 36.23 | -13.55 | 31.56 | 27.61 | 15.36 | -32.14 | 34.03 | 16.27 | 15.24 |
| MSCI ACWI Growth Index | 3.27 | 30.00 | -8.13 | 32.72 | 33.60 | 17.10 | -28.61 | 33.22 | 24.23 | 22.44 |

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit [invesco.com](https://www.invesco.com) for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or a loss when you sell shares. Returns less than one year are cumulative; all others are annualized. As the result of a reorganization on May 24, 2019, the returns of the fund for periods on or prior to May 24, 2019 reflect performance of the Oppenheimer predecessor fund. Share class returns will differ from the predecessor fund due to a change in expenses and sales charges. Index source: RIMES Technologies Corp. Please keep in mind that high, double-digit returns are highly unusual and cannot be sustained. Had fees not been waived and/or expenses reimbursed in the past, returns would have been lower. Performance shown at NAV does not include the applicable front-end sales charge, which would have reduced the performance. Class Y and R6 shares have no sales charge; therefore performance is at NAV. Class Y shares are available only to certain investors. Class R6 shares are closed to most investors. Please see the prospectus for more details.

The Fund's investment objective is to seek capital appreciation.

The **MSCI All Country World Index** is an unmanaged index considered representative of large- and mid-cap stocks across developed and emerging markets. The index is computed using the net return, which withholds applicable taxes for non-resident investors. The **MSCI World Index (Custom-blended Index)** is composed of the S&P 500 Index through March 31, 1986, the MSCI World Index from April 1, 1986 through June 30, 2022, and the MSCI All Country World Growth Index from July 1, 2022 to present. Index performance includes total returns from when first available. **MSCI All Country World Growth Index (USD)** is an unmanaged index considered representative of large- and mid-cap growth stocks across developed and emerging markets. The **S&P 500® Index** is an unmanaged index considered representative of the US stock market. The **MSCI World Index** is an unmanaged index considered representative of stocks of developed countries. An investment cannot be made directly in an index.

About risk: The Fund's value may be affected by changes in the stock markets. Stock markets may experience significant short-term volatility and may fall or rise sharply at times. Adverse events in any part of the equity or fixed income markets may have unexpected negative effects on other market segments. Different stock markets may behave differently from each other and U.S. stock markets may move in the opposite direction from one or more foreign stock markets.

The risks of investing in securities of foreign issuers, including emerging markets, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

The performance of an investment concentrated in issuers of a certain region or country is expected to be closely tied to conditions within that region and to be more volatile than more geographically diversified investments. Many countries in the European Union are susceptible to high economic risks associated with high levels of debt, notably due to investments in sovereign debts of European countries such as Greece, Italy, and Spain.

Growth stocks tend to be more sensitive to changes in their earnings and can be more volatile.

To the extent an investment focuses on securities issued or guaranteed by companies in a particular industry, the investment's performance will depend on the overall condition of those industries, which may be affected by the following factors: the supply of short-term financing, changes in government regulation and interest rates, and overall economy.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The investment techniques and risk analysis used by the portfolio managers may not produce the desired results.

The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making investment decisions.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their financial professional for a prospectus/summary prospectus or visit [invesco.com/fundprospectus](https://www.invesco.com/fundprospectus).
