Market overview

- + Strong market technicals, with a favorable balance of supply and demand, have continued to support municipal bond results.
- + We believe tax changes resulting from the Tax Cuts and Jobs Act (TCJA) of 2017 will remain a primary driver of demand for municipal bonds. Under the new law, the \$10,000 cap on state and local tax deductions, the so-called SALT cap, has caused surprisingly larger individual tax bills for people in states with high income taxes (especially states like California, New York and New Jersey). Although the TCJA went into effect on Jan. 1, 2018, many investors did not fully understand the personal impact until they filed their tax returns in spring of 2019. Inflows to municipal mutual funds now total \$67 billion year-to-date, on pace for a record year. Positive inflows began in January and continued through the end of the third quarter as investors realized the ramifications of the state and local tax deduction cap. High-yield municipals did experience brief outflows in September as a result of a selloff in US Treasuries.
- + During the quarter, positive market performance stemmed, in part, from escalating US/China trade tensions, including President Trump's announcement that he would impose 10% tariffs on \$300 billion in Chinese imports. This drove investors to bonds, which are perceived as a safe haven.
- + Outperformance in the hospital and tobacco sectors were the primary drivers of positive total returns across the municipal bond yield curve. Within the investment grade segment, lower-rated investment grade credits outperformed their higher-quality counterparts.
- + New municipal issuance during the quarter totaled \$103 billion. This brings year-to-date issuance to \$277 billion, 10% higher than the same period last year. Steady issuance is expected to continue through the end of the year as issuers take advantage of historically low rates.
- + As expected by market consensus, the US Federal Reserve cut interest rates by 0.25% on July 31st and by another 0.25% on September 18th. According to Fed Chairman Powell's comments, these cuts are a mid-cycle adjustment rather than a series of aggressive cuts. However, his comments have not stopped the market from pricing in additional cuts. Meanwhile, lack of consensus among Fed governors regarding rate cuts has trickled into general market sentiment, resulting in increased volatility among risk assets.

Positioning and outlook

- + We maintain the portfolio's preference for revenue bonds over general obligation bonds. The largest sector allocations were in the transportation and health care sectors.
- + Our approach to investing aims to deliver a highly competitive yield while diversifying both sector and individual security risks.
- + Looking ahead, municipal fundamentals should remain strong. We believe the state and local tax deduction limit will continue to drive performance, although not to the same magnitude seen thus far in 2019.

Performance highlights

- + Invesco Limited Term Municipal Income Fund Class A shares at net asset value (NAV) posted a return of 0.65% for the third quarter, compared to its style-specific benchmark, the S&P Municipal Bond Investment Grade Short Intermediate Index, which returned 0.63%. (Please see the investment results table on page 2 for fund and index performance).

Contributors to performance

- + An overweight exposure and security selection among AA through BBB-rated bonds added to relative return during the quarter.
- + Overweight exposures to the health care and transportation sectors also benefited relative performance.
- + Security selection among Illinois issues added to relative return during the quarter.

Detractors from performance

- + Security selection among the highest quality bonds (AAA-rated bonds, specifically) detracted from relative performance during the quarter.
- + Security selection among state and local general obligation bonds as well as pre-refunded bonds was a slight detractor from relative return.
- + On the state level, security selection among California bonds detracted from relative return.

Expense ratios	% net	% total
Class A2 Shares	0.38	0.38
Class A Shares	0.63	0.63
Class C Shares	1.38	1.38
Class Y Shares	0.38	0.38

Per the current prospectus

From Lipper Fund Awards from Refinitiv, ©2019 Refinitiv. All rights reserved. Used under license. The 2019 Lipper Fund Award winners are selected based on the highest risk-adjusted performance among funds within a given category. The calculation periods extend over 36, 60, and 120 months. The highest Lipper Leader for Consistent Return (Effective Return) value within each eligible classification determines the fund classification winner over three, five or 10 years. A high Lipper rating does not necessarily imply that a fund had the best total performance or that the fund achieved positive results for that period. Lipper Inc. is a major independent mutual fund tracking organization. Other share classes may have different performance characteristics.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary, and you may have a gain or a loss when you sell shares. No contingent deferred sales charge (CDSC) will be imposed on redemptions of Class C shares following one year from the date shares were purchased. Performance shown at NAV does not include applicable CDSC or front-end sales charges, which would have reduced the performance. Performance shown prior to the inception date of Class C shares is that of Class A2 shares, restated to reflect the higher 12b-1 fees applicable to Class C shares. Class Y shares have no sales charge; therefore, performance is at NAV. Returns less than one year are cumulative; all others are annualized. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. See current prospectus for more information. Index returns do not reflect any fees, expenses, or sales charges. Index source: FactSet Research Systems Inc.

1 Ratings source: Standard & Poor's, Moody's or Fitch, as applicable. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. A negative in Cash indicates fund activity that has accrued or is pending settlement. Pre-Refunded/Escrowed to Maturity (Prerefunded/ETM) bonds are issues backed by an escrow account, invested in US Treasuries, which is used to pay bondholders. Other includes bonds rated below single B and bonds currently not paying a coupon. For more information on the rating methodology, please visit www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage. Class Y shares and Class A2 shares are available only to certain investors. See the prospectus for more information.

Diversification does not guarantee a profit or eliminate the risk of loss.

A portion of the fund's income may be subject to some state and local taxes.

S&P Municipal Bond Investment Grade Short Intermediate Index consists of bonds in the S&P Municipal Bond Index with a min maturity of 1 year and a max of 8 years. An investment cannot be made directly in an index.

S&P Municipal Bond Index is a broad, market value-weighted index that seeks to measure the performance of the U.S. municipal bond market. An investment cannot be made directly into an index.

The Bloomberg Barclays Municipal Bond Index is an unmanaged index considered representative of the tax-exempt bond market. An investment cannot be made directly in an index.

The Bloomberg Barclays Municipal High Yield Bond Index is an unmanaged index considered representative of noninvestment-grade bonds. An investment cannot be made directly in an index.

Option adjusted duration is a measure, as estimated by the fund's portfolio managers, of a bond fund's price sensitivity to changes in interest rates. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates. **Weighted average effective maturity (WAM)** is a measure, as estimated by the fund's portfolio managers, of the length of time the average security in a bond fund will mature or be redeemed by its issuer. It takes into account mortgage prepayments, puts, adjustable coupons and potential call dates.

About risk

An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer's credit rating.

Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.

Junk bonds have greater risk of default or price changes due to changes in the issuer's credit quality. Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.

Securities which are in the medium- and lower grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks, such as greater credit risk, market risk, liquidity risk, management risk, and regulatory risk.

The fund may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation.

Municipal securities have the risk that legislative or economic conditions could affect an issuer's ability to make principal and/or interest payments.

The fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the fund.
