

Invesco Financial Preferred ETF (PGF)

Diversify¹ with tax-efficient yield in the financial sector

With an emphasis on quality, Invesco's Financial Preferred ETF, based on the ICE Exchange-Listed Fixed Rate Financial Preferred Securities Index, offers broad-based financial-focused exposure to preferred securities, potentially providing higher yields than many of its fixed income and dividend-generating peers.

Potential for high monthly income

Financial sector preferred securities offer the potential for attractive yields when compared to other fixed-rate investments

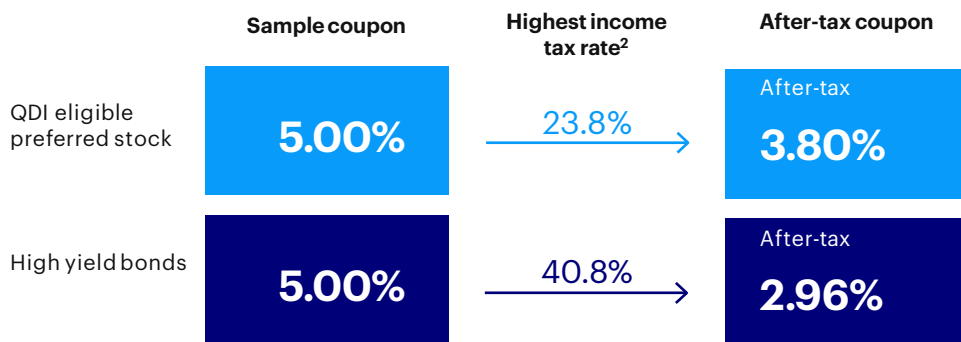

A hybrid between equity and fixed income, preferred securities sit above common equity in a firm's capital structure and often pay a fixed coupon, which takes a priority over common stock dividends.

Source: Bloomberg L.P. as of September 30, 2022. Yield to Worst was represented in this chart. **Past performance is not a guarantee of future results.** The following indexes were used to measure yield: US equities: S&P 500 Index; 10-year US treasury: ICE BofAMLUS Treasury Current 10-Year Index; US investment grade corporate: ICE BofAML US Corporate Index; REITs: MSCI US REIT Index; US high yield corporate: ICE BofAML US High Yield Index; Financial Preferreds: Wells Fargo Hybrid & Preferred Securities Financial Index. An investment cannot be directly into an index.

Tax efficient yield

Similar to traditional equity securities, many preferred issuers pay qualified dividend income (QDI), which is taxed at a lower rate than ordinary income.

Seeking high quality, tax-advantaged income potential and potentially lower risk

By emphasizing quality over quantity, Invesco's Financial Preferred ETF may offer key advantages when compared to other preferred investment options.

- Higher quality**
Securities must have single B or higher rating
- Tax-advantaged income potential**
100% are QDI³ eligible securities
- Potentially reduce risk**
Convertible preferreds excluded

For illustrative purposes only. Invesco does not offer tax advice. Please consult your own tax professional for information regarding your own tax situation. Preferred securities may include provisions that permit the issuer to defer or omit distributions and that if the fund owns a security that is deferring or omitting its distributions, the fund may be required to report the distribution on its tax returns, even though it may not have received this income.

1 Certain funds and portfolios, particularly the Invesco ETFs, in and of themselves do not qualify as diversified investment strategies.

2 Includes highest tax rate of 37% and 0.9% Medicare surtax.

3 QDI is a type of dividend subject to capital gains tax rates that are lower than the income tax rates applied to ordinary dividends.

Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which performance data quoted would have been lower. Returns less than one year are cumulative. An investment cannot be made directly into an index. Index returns do not represent fund returns.

After Tax Held and After Tax Sold: Year-end After-Tax Returns are based on preliminary data and are subject to adjustment.

Credit Rating: A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debt. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. For more information on rating methodologies, please visit the following NRSRO websites: www.standardandpoors.com and select 'Understanding Ratings' under Rating Resources on the homepage; www.moodys.com and select 'Rating Methodologies' under Research and Ratings on the homepage; www.fitchratings.com and select 'Ratings Definitions' on the homepage.

ICE Exchange-Listed Fixed Rate Financial Preferred Securities Index measures the performance of exchange-listed U.S. dollar-denominated hybrid securities, preferred stock and convertible preferred stock. **S&P U.S. Preferred Stock Index** - The S&P U.S. Preferred Stock Indices measure the performance of various segments of the U.S. preferred stock market. Preferred stocks are a class of capital stock that pays dividends at a specified rate and has a preference over common stock in the payment of dividends and the liquidation of assets. **ICE BofAML US Treasury Current 10-Year Index** is a subset of the Bank of America Treasury Master Index. The index measures the total return performance of U.S. Treasury bonds with an outstanding par that is greater than or equal to \$25 million. The maturity range of these securities is greater than ten years. **ICE BofAML US Corporate Index** is an unmanaged index which tracks the performance of US dollar denominated investment grade rated corporate debt publicly issued in the US domestic market. **MSCI US REIT Index** is a free float-adjusted market capitalization weighted index that is comprised of equity Real Estate Investment Trusts (REITs). **ICE BofAML US High Yield Index** is an unmanaged index that tracks the performance of U.S. dollar denominated, below investment-grade rated corporate debt publicly issued in the U.S. domestic market. One cannot invest directly in an index.

About Risk:

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund. Investments focused in a particular sector, such as financial, are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments. Preferred securities may be less liquid than many other securities, and in certain circumstances, an issuer of preferred securities may redeem the securities prior to a specified date.

Stocks of small and mid-sized companies tend to be more vulnerable to adverse developments, may be more volatile, and may be illiquid or restricted as to resale.

The Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the underlying Index, and may be subject to greater volatility.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

High yield securities involve greater risk and are less liquid than higher grade issues. Changes in general economic conditions, financial conditions of the issuers and in interest rates may adversely impact the ability of issuers to make timely payments of interest and principal.

The risks of investing in securities of foreign issuers can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

The Fund invests in financial instruments that use the London Interbank Offered Rate ("LIBOR") as a reference or benchmark rate for variable interest rate calculations. LIBOR will be phased out by the end of 2021, and it's anticipated that LIBOR will cease to be published after that time. To assist with the transition, US dollar LIBOR rates will continue to be published until June 2023. There is uncertainty on the effects of the LIBOR transition process, therefore any impact of the LIBOR transition on the Fund or its investments cannot yet be determined. There is no assurance an alternative rate will be similar to, produce the same value or economic equivalence or instruments using the rate will have the same volume or liquidity as LIBOR. Any effects of LIBOR transition and the adoption of alternative rates could result in losses to the Fund.

Yield to worst is a measure of the lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their financial professional for a prospectus/summary prospectus or visit [invesco.com/fund/prospectus](https://www.invesco.com/fund/prospectus).
