Invesco Intermediate Term Municipal Income Fund

The fund seeks a high level of current income exempt from federal income tax, consistent with preservation of capital by investing primarily in intermediate municipal bonds that are investment grade at the time of purchase.

### Three potential benefits for investors

1. **Taxable Equivalent Yield (%)**
   - What A Taxable Bond Needs To Earn To Match A Municipal Bond.
   - **Blue**
     - VKLMX 30 Day SEC Yield: 3.56%
     - Taxable Equivalent Yield: 6.01%

2. **Consistent Outperformance ($)**
   - With an investment of $10,000 at inception, VKMLX consistently outperformed the index.
   - **Blue**
     - 31,777 for VKLMX
     - 29,016 for the index

3. **Diversified Opportunities**
   - The Fund may invest up to 35% in below investment grade and non-rated bonds.
   - **Blue**
     - Investment Grade: 73.87%
     - BB: 8.21%
     - B: 1.58%
     - CCC and below: 0.04%
     - Total below investment grade and non-rated: 16.29%

For illustrative purposes only. Thirty-Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. Taxable Equivalent yield is based on the 2023 top federal tax rate of 40.8%, including the 3.8% tax on unearned income under the Patient Protection and Affordable Care Act, as applicable. Results would vary if a different tax rate were used. As of September 30, 2023.

**Access + Acumen = Greater Possibilities**

The Invesco Municipal Bond team uses a collaborative approach to manage funds. By combining our size and experience, we focus on delivering potentially better outcomes and identifying the best opportunities for our clients.

- **Blue**
  - $62.4 billion in AUM
  - 5th largest municipal bond manager in the industry, based on AUM
  - 2nd largest high yield municipal bond manager in the industry, based on AUM
  - 24 experienced credit analysts who thoroughly vet each bond before purchase

1. Morningstar, Muni National Intermediate Category, as of September 30, 2023. Securities rated BB or lower are below-investment-grade securities. Securities rated BBB or higher are considered investment grade securities. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. If securities are rated differently by the rating agencies, the higher rating is applied. Not Rated indicates the debtor was not rated and should not be interpreted as indicating low quality. For more information on the rating methodology, please visit [www.standardandpoors.com](http://www.standardandpoors.com) and select ‘Understanding Credit Ratings’ under ‘About Ratings’ on the homepage.

Performance quoted is past performance and cannot guarantee comparable future results; current performance may be lower or higher. Visit invesco.com/performance for the most recent month-end performance. Performance figures reflect reinvested distributions and changes in net asset value (NAV). Investment return and principal value will vary so that you may have a gain or loss when you sell shares. Performance shown at NAV does not include applicable front-end sales charges (max 2.50%), which would have reduced the performance. Fund performance reflects any applicable fee waivers and/or expense reimbursements. Had the adviser not waived fees and/or reimbursed expenses currently or in the past, returns would have been lower. Class R6 and Class Y shares have no sales charge; therefore, performance is at NAV. Class R6 and Class Y shares are available only to certain investors. See the prospectus for more information. Performance shown prior to the inception date of Class R6 shares is that of Class A shares and includes the 12b-1 fees applicable to Class A shares.

About risk:
Interest rate risk refers to the risk that bond prices generally fall as interest rates rise and vice versa.
An issuer may be unable to meet interest and/or principal payments, thereby causing its instruments to decrease in value and lowering the issuer’s credit rating.
Junk bond values fluctuate more than high quality bonds and can decline significantly over a short time.
There is no guarantee that the Fund's income will be exempt from federal and state income taxes.
All or a portion of the fund’s otherwise tax-exempt income may be subject to the federal alternative minimum tax.
Derivatives may be more volatile and less liquid than traditional investments and are subject to market, interest rate, credit, leverage, counterparty and management risks. An investment in a derivative could lose more than the cash amount invested.
Securities which are in the medium- and lower grade categories generally offer higher yields than are offered by higher-grade securities of similar maturity, but they also generally involve more volatility and greater risks, such as greater credit risk, market risk, liquidity risk, management risk, and regulatory risk.
The Fund may invest in municipal securities issued by entities having similar characteristics, which may make the fund more susceptible to fluctuation. Municipal securities have the risk that legislative or economic conditions could affect an issuer’s ability to make principal and/or interest payments.
The investment techniques and risk analysis used by the portfolio managers may not produce the desired results.
Based on a Master Settlement Agreement (“MSA”) with 46 states and six other US jurisdictions, large US tobacco manufacturers have agreed to make annual payments to government entities in exchange for the release of all litigation claims. Several states have sold bonds backed by those future payments, including (i) bonds that make payments only from a state’s interest in the MSA and (ii) bonds that make payments from both the MSA revenue and from an “appropriation pledge” by the state which requires the state to pass a specific periodic appropriation to make the payments and is generally not an unconditional guarantee of payment by a state. Settlement payments are based on factors, including, but not limited to, annual domestic cigarette shipments, cigarette consumption, inflation and the financial capability of participating tobacco companies. Payments could be reduced if consumption decreases, if market share is lost to non-MSA manufacturers, or if there is a negative outcome in litigation regarding the MSA, including challenges by participating tobacco manufacturers regarding the amount of annual payments owed under the MSA.
Inverse floating rate obligations may be subject to greater price volatility than a fixed income security with similar qualities. When short-term interest rates rise, they may decrease in value and produce less or no income and are subject to risks similar to derivatives.
The Fund may hold illiquid securities that it may be unable to sell at the preferred time or price and could lose its entire investment in such securities.
The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risks associated with an investment in the Fund.
Before investing, investors should carefully read the prospectus and/or summary prospectus and carefully consider the investment objectives, risks, charges and expenses. For this and more complete information about the fund(s), investors should ask their financial professional for a prospectus/summary prospectus or visit invesco.com/fund prospectus.
